THE FREEDOM OF ESCAPE.

It's the moment of complete weightlessness at the peak of an ollie, the sensation and satisfaction from a locked-in press, the split-second between burying an edge into a deep drift and watching it explode. That freedom, that momentary escape, that second of pure kinetic energy; that's all that matters.

This season we went back to the drawing board. We questioned, debated, doodled, shaped, overhauled, nitpicked, organized and reorganized time and time again. In the end, we created a hardworking, versatile collection inspired by the freedom of escape.

Snowboarding has always been about the freedom of doing things your own way. Ride a soft board in powder. Run your ankle straps at the top of your boots. Tighten your laces till you can't feel your toes. Hell, who needs gloves? Escape from expectations. We designed this collection to make every turn, every landing, every tweak, every momentary escape, as satisfying as possible. No matter how you ride it.

We are the SDS, and this is the next chapter of our disruption by design. Built by the Syndicate, ridden by Everyone.

UNIBODY

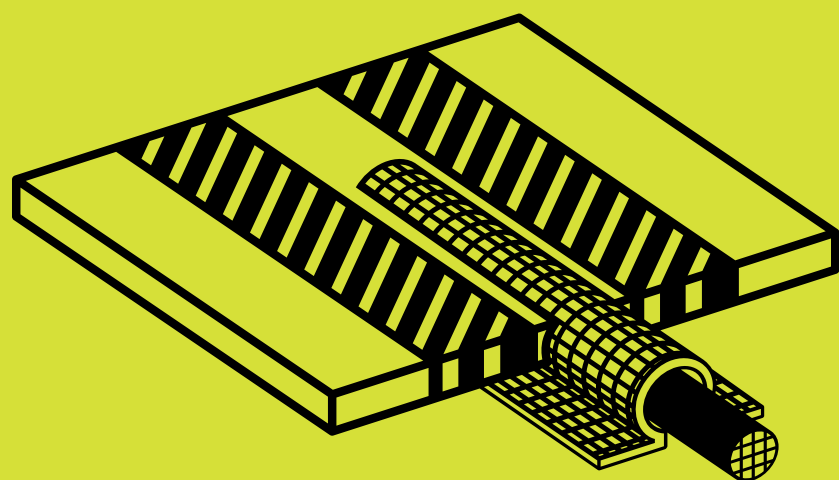

BOARD TECH

HOTRODS

HOTROD CONSTRUCTION

OMEGA CONSTRUCTION

New for this season, Omegas are the next generation of responsive, ride-anything tech. Made of carbon, the Omegas act as housing built around the HotRods and are designed to provide additional power and responsiveness.

CARBON HOTRODS

Thin rods of carbon that are milled into the board's core starting at the insert pack and extending into the nose and / or tail. Carbon HotRods are super responsive and powerfully snappy.

BAMBOO HOTRODS

Thin rods of bamboo are milled into the board's core starting just inside the insert packs and extending into the nose and / or tail. Bamboo HotRods are very pressable and playful.

HOTROD CONFIGURATION

DIRECTIONAL DOUBLE

Two HotRods in the board's tail for medium to powerful responsiveness.

DIRECTIONAL SINGLE

A single HotRod in the board's nose for stability at speed and overall liveliness.

TWIN SINGLE

A single HotRod in the board's nose and tail; pressable yet poppy.

DIRECTIONAL TRIPLE

One HotRod in the board's nose and two HotRods in the tail; powerful and versatile.

TWIN DOUBLE-V

V-shaped HotRods in the board's nose and tail; next level snap and pop.

CAMBER

FREE-THE-RIDE

Designed for all-mountain prowess and float in the deep. Rockered in the nose, flat under the front foot, with a positive cambered tail.

CONTACT ROCKER

Flat camber between the bindings with rocker outside the bindings; smooth flexing and pressable.

FUSION CAMBER

Positive camber with small pockets of rocker at the contact points; the modern go-to for all-mountain performance.

STAY POSITIVE CAMBER

Powerful and predictable, tried-and-true camber.

TAPER

Featured in directional boards built with wider noses than tails helping with agile turns and added float in deep snow.

BOARD TECH

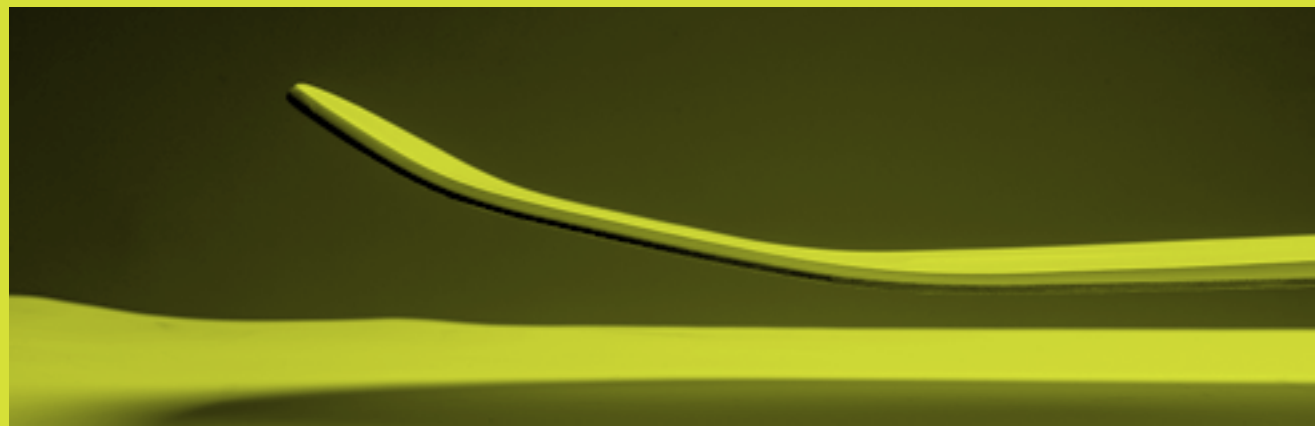

DIAMOND 3D

Designed to increase float in deep snow, improve handling in variable terrain, smooth turn initiation, reduce edge-catch and complement all-mountain riding in all senses. The 3D Diamond is available in Directional and Twin Configurations.

**DIRECTIONAL
DIAMOND 3D**

**TWIN
DIAMOND 3D**

DOUBLE KICK

New for this season, Double Kick is an aggressive, two-part rise in the board's nose or tail, built for increased pressability and better landings.

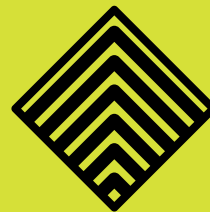

IMPACT PLATES

Built to lessen impact and dampen chatter, these woven glass plates are built under the board's insert packs.

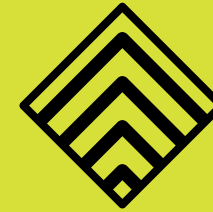

BASE MATERIALS

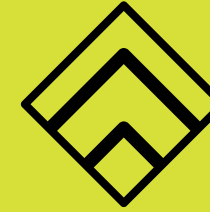

SINTERSPEED BASE

Our premium base material featuring high molecular content and insane wax absorption thanks to its open structure. Our fastest and most advanced base for demanding riders.

SINTERSTRONG BASE

The new go-to, this hardworking base is easy to fix with great wax retention. A low maintenance daily driver for riders of all ability levels.

IMPACT BASE

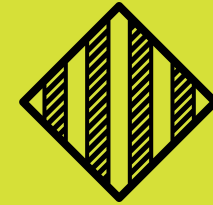

Our newly upgraded ISOSPORT 4400 base material features improved wax absorption, increased durability and the most bang for your buck.

CORES

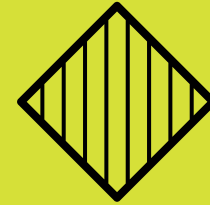

SUPERPOP

Our lightest and most responsive core, built with alternating strips of 10mm strips of poplar and 20mm strips of paulownia.

POPCORE

Our most versatile and durable core, built with alternating strips of 20mm strips of poplar and 20mm strips of paulownia.

STOMPCORE

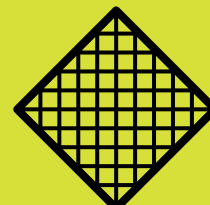

Our most stable and predictable core, built with 100% poplar construction.

MINISHRED CORE

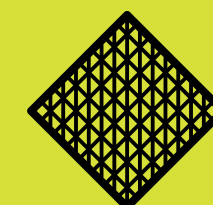

Built to be the lightest and snappiest youth core, built with 100% paulownia wood core.

GLASS LAMINATES EXPLAINED

BIAX

Fiberglass with two different axes, built to be torsionally more playful and pressable.

TRIAx

Fiberglass running in three different axes, built for torsional rigidity and added snap.

AUXTECH™

HINGED PATTERNS FOR NEXT LEVEL CONNECTED COMFORT

Auxetic Shape Technology™ is the result of years of refining and rethinking how binding parts work and how we can improve their grip and durability.

Auxetic patterns are geometric patterns that become thicker perpendicularly when stretched. Think of them as a network of tiny hinges that when pressure is applied, actually expand and open. This creates a more direct connection to the boot.

Better surface area pressure distribution with an ergonomic shape means a better connection overall.

The one-piece, one-material design also means increased durability no matter the conditions.

Better grip, increased durability and better connected-comfort, that's AuxTech.

BINDING TECH

THE MOST ADJUSTABLE BINDINGS IN THE GAME

We believe that everyone rides better and enjoys snowboarding more when their bindings are adjusted to their riding style. That's why we make the most customizable bindings on the market with space age materials and durable, riding-first designs.

PIVOTMOUNT

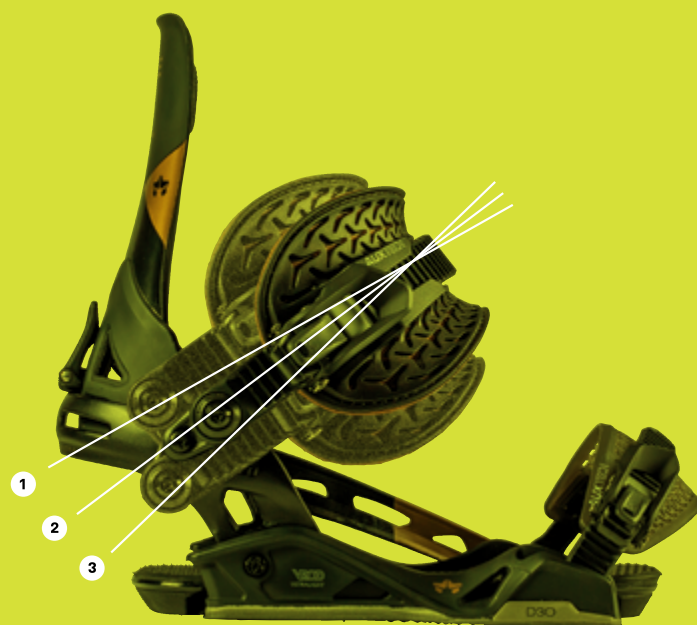

A Rome exclusive binding innovation, PivotMounts are small adjustable pieces that allow riders to move the position of their ankle straps on their boots. The higher up on your boot the ankle strap sits, the more power and turn initiation. The lower the strap goes, the more surfy and tweakable your riding will be.

PivotMount Max provides 8 different strap options per side of the ankle strap, 64 configurations total.

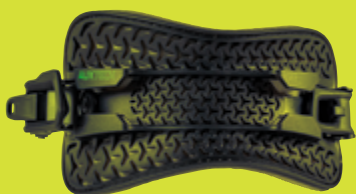

PivotMount offers 4 different positions of ankle strap placement per side of the strap, 16 total configurations are possible.

- 1 MAX RESPONSE
- 2 NEUTRAL OUT OF THE BOX
- 3 MAX TWEAK

ANKLE STRAPS

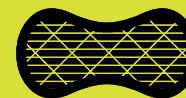

PROFLEX ANKLE STRAP

All-new and powered by AuxTech™, these are incredibly expandable, super-durable and provide superior locked-in hold.

ULTRALIGHT ANKLE STRAP

Cushy and supportive, this lightweight injected EVA ankle strap is built with a dog bone shape for maximum surface area and connected comfort.

PUREFLEX ANKLE STRAP

Built with maximum coring and minimally styled, this ankle strap is medium flexing and built to tweak.

SOFTFLEX ANKLE STRAP

Simplicity reigns supreme with these comfy, smooth flexing ankle straps.

TOE STRAPS

PROGRIP TOE STRAP

Powered by AuxTech™, this innovative network of small hinges provides unmatched hold and locked-in grip.

PUREGRIP TOE STRAP

Built for foolproof simplicity, this minimalist styled toe strap has maximum coring for a lightweight and versatile design.

HIGHBACK ROTATION

Designed so riders can adjust their highbacks to mirror the angle of their heelside edge for maximum power transfer.

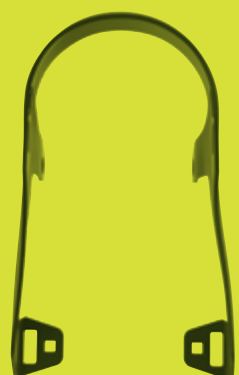

HIGHBACK CANTING

Built so that riders can adjust the angle of their highback to mirror the angle of their lower leg for increased connection and stability.

ADJUSTABLE BASEPLATE

Created to help fit a wider range of boot models and sizes.

FULLWRAP

Redesigned, recalibrated and reenergized, our FullWrap platform is pure power and maximum energy transfer. The all-new FullWrap platform is a sturdy, bombproof chassis that loves to send it.

ASYMWRAP

Built to maximize tweakability and provide a surfy board feel, our innovative AsymWrap platform started the conversation about how bindings can and should ride.

D3O SUBBASE PAD

Designed for maximum impact absorption and dampening, D3O is a space age material used in the subbase pads on our bindings.

COMPOSITE CONSTRUCTION

Our highbacks and baseplates are made of up a variety of combined materials. These composites are all designed to flex differently and provide different levels of response or tweakability.

POWERGRAFT HIGHBACK

This industry-first design features a layered composite glass fiber upper, overmolded into a nylon lower region for next level power, without sacrificing torsional tweakability.

BOOTS

20-21 BOOTS

OVERHAULED AND UNDERFOOT.

Fully reimagined and restructured, our boot collection is built to make finding the perfect boot easier than ever.

BOOTS

LACING BREAKDOWN

Each model features three unique lacing systems.

BOA

Quick entry, locked-in hold and support.

HYBRID BOA

The best of both worlds; the smooth flex of lacing with the locked-in hold of BOA.

LACES

Tried and true, smooth flexing and forgiving.

NEW

GUIDE

RUGGED, DEPENDABLE AND READY TO EXPLORE.

Our most supportive and powerful boot, the Guide Collection is designed for riders who want an ultra-supportive flex profile with backcountry sensibilities. With a fully redesigned pattern, the Guide is built with our new DuraFit Shell for increased structural integrity and responsiveness. Each model features our GripLight outsole with Vibram Icetrek for maximum traction, and our Ultralon F.I.T. Liner for premium comfort that refuses to pack out. The Guide is the go-to boot for setting the boot pack and stomping cliff drops.

GUIDE

NEW

LIBERTINE

SLEEK, VERSATILE AND LIGHTWEIGHT.

The Libertine Collection is redesigned this season for riders who want a medium to responsive flexing boot that's equally at home cruising resort laps, blasting through the park or slaying a deep day. Built with our new DuraFit Shell for added durability, the Libertine Collection is all about lightweight, pressure-point-free performance thanks to our Ultralon F.I.T. Liner for superior fit and feel. Now featuring the Women's Libertine BOA, this collection is built to keep you on hill longer and tweaking harder.

BODEGA

SURFY, PRESSABLE AND INSANELY TWEAKABLE.

The Bodega Collection is our offering for riders who want a high-performance boot with a tweak happy flex profile. The Bodega is supportive in key regions, like the ankle, but still plush and tweakable overall thanks to the PRO F.I.T. Liner and its molded SkateCuff 3D. With the addition of the Women's Bodega BOA, this collection is all about a softer flex with ride-anything performance.

BOA®

SEQUENCE BOA + HEEL LOCK

H-SERIES TONGUE DIAL
H-SERIES HEEL LOCK DIAL

Dual lace BOA boots, targeted regions for quick adjustment and locked-in response for advanced pressure distribution and response

TX3 LACES

- Designed with slightly more give than wire laces
- Better for impact and 'true to riding' flex

FOCUS BOA

H-SERIES UPPER DIAL
M-SERIES FOREFOOT DIAL

Dual lace BOA boots, upper and lower zone customization which overlap at the ankle, built for maximum adjustability

HYBRID HP HEEL LOCK BOA

H-SERIES HEEL LOCK DIAL

High-power hold to complement hybrid lacing styles, advanced heel hold and ankle support

HYBRID MP HEEL LOCK BOA

M-SERIES HEEL LOCK DIAL

Mid-power hold to complement hybrid lacing styles, advanced heel hold and ankle support

SEQUENCE BOA

H-SERIES TONGUE DIAL

Simultaneous dual zone closure with one dial for even distribution of pressure

GRIFLIGHT OUTSOLE WITH VIBRAM

Our most responsive outsole with advanced traction, thanks to Vibram Ictreack 2 compound

GRIPFLEX OUTSOLE

Medium to responsive flex pattern, strategic lugs and lightweight construction

MINISHRED OUTSOLE

One-piece rubber outsole for a softer flex with maximum traction

ULTRALON FOAM

Ultralon Foam is space-age material that provides advanced heat moldability with unprecedented levels of comfort and fit. Our Ultralon F.I.T. liners use a mixture of two different densities of Ultralon Foam to create a liner that is simultaneously resistant to packing out and insanely comfortable. The inner layer is plush, and cozy, so your feet always feel snug. The second layer provides maximum support, heat moldable customization and performance to the boot.

ULTRALON F.I.T. LINER

Our most plush and customizable liner for advanced fit that refuses to pack out. Built with dual density Ultralon Foam for maximum performance and fit longevity, our SkateCuff 3D molded ankle support system and Ultra Footbeds with dual density foam for targeted heel and arch support.

PRO F.I.T. LINER

Fully heat-moldable for maximum snug fit and dialed-in performance. Built with our SkateCuff 3D ankle support system, expandable toe box and Pro Footbeds for support and out-of-the-box comfort.

RAD F.I.T. LINER

Plush and supportive, this fully heat-moldable liner features SkateCuff 3D, an expandable toe box, TriZone lining and Rad Foambeds for comfort.

DURAFIT SHELL

This innovative welded TPU material provides next level waterproofing, abrasion resistance and helps keep the boot's overall structure and flex pattern season after season.

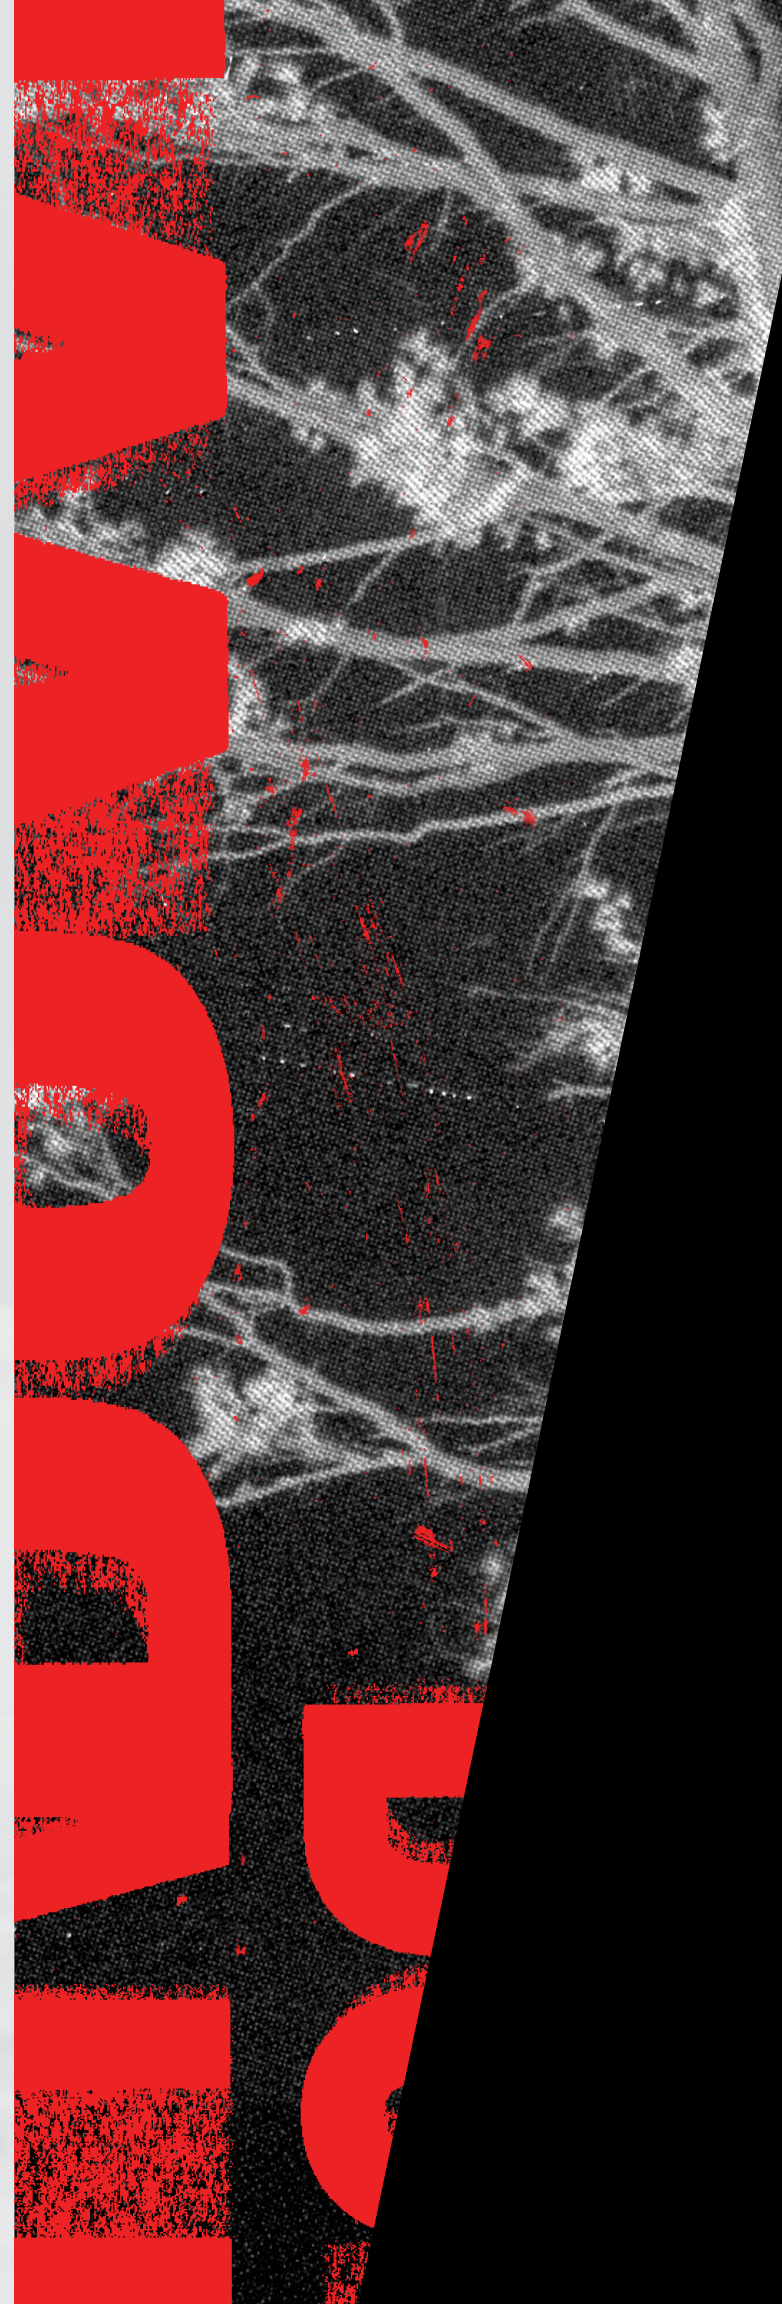

INNER SHELL HARNESS

Easy to adjust cinch and pull design, built so riders can quickly tighten the shell and the liner together.
