FUSE DRYSUIT . STRIKE SERIES . ONYX SERIES . CAPTURE SERIES

STRIKE VS. ONYX

WHAT’S THE DIFFERENCE?

We want to enable athletes from various kinds of water sports to get the maximum out of their session – every time. That’s why we focused on tailoring our wetsuits to the specific needs of all kinds of water enthusiasts, resulting in two different wetsuit lines. Differing in small details, fit and features they set you up to face the elements.

STRIKE

The Strike offers roomy comfort thanks to a wider circumference at biceps, waist, hip, and legs as well as an easy, hassle-free entry. Fight the windchill thanks to the large and smooth skin neoprene panel on the back. Special crash pads against impacts and abrasion on shins and ribs provide extra protection for a confident feeling on the water.

SLIGHTLY THINNER BICEPS

THINNER WAIST

THINNER HIP

THINNER THIGH

THINNER LOWER LEG

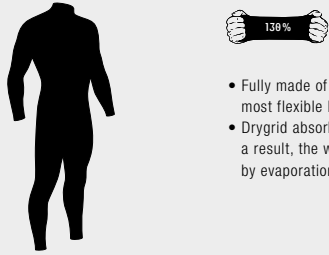

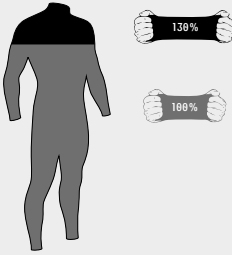

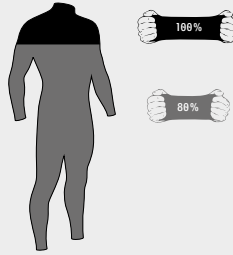

ONYX

The Onyx, on the other hand, offers the second-skin-sensation with a tighter cut at arms, waist, hips and, legs. Thanks to the minimized panel design and reduced extra features, the Onyx is lighter and more flexible in some places, resulting in improved freedom of movement.

WETSUITS TECHNOLOGY

LEVELS

| | SELECT | AMP | CORE | ELEMENT |
|----------|--|---|---|---|
| OUTSIDE |  <ul style="list-style-type: none">Fully made of Cyber-Stretch 130 % the most flexible lining available.Drygrid absorbs up to 30% less water. As a result, the wetsuit is lighter and cooling by evaporation is reduced. | |  |  |
| I_FOAM |  <p>The I_Foam is an extreme lightweight and stretchy neoprene foam. Thanks to its lower density the I_Foam also contributes to heat insulation and better flexibility.</p> | |  <p>The S_Type standard foam is made from limestone instead of oil. It offers good stretch and warmth.</p> | |
| INSIDE |  <ul style="list-style-type: none">Large area of Plasma_Plush 2.0 for best possible heat retention and a fast drying suitSilk_Stuff in sleeves for high comfort level and more flexibility |  <ul style="list-style-type: none">Quick drying Plasma_Plush 2.0 on back panel against windchillHot_Stuff 2.0 on body and legs for the perfect combination of warmth and stretchSilk_Stuff on sleeves for high comfort level and more flexibility |  <ul style="list-style-type: none">Hot_Stuff 2.0 for the perfect combination of warmth and stretchSilk_Stuff on lower legs and sleeves for high comfort level |  <ul style="list-style-type: none">Silk_Stuff inside lining for a higher comfort level on the element level |
| FEATURES | | | | |
| SEAMS | <ul style="list-style-type: none">Power_Seams on the outside for a longer lasting lifespanMaki_Tape 2.0 around the crotch, knees and shinTaping only where needed to keep the stretch level at the highest level | <ul style="list-style-type: none">Maki_Tape 2.0 protecting the seams on the inside on the entire lower bodyTaping only where needed to keep the stretch level at the highest level | <ul style="list-style-type: none">Maki_Tape 2.0 protecting the seams on the inside at crotch and kneesTaping only where needed to keep the stretch level at the highest level | |

WETSUITS TECHNOLOGY

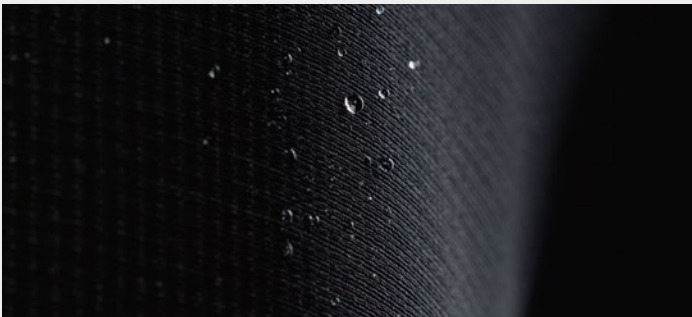

FEATURES

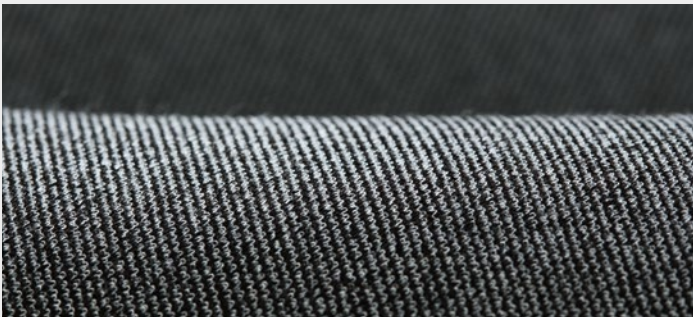

PLASMA_PLUSH 2.0
Premium lining offering the best of heat retention and stretch. The high pile fabric traps air for snugly warmth and isolation while the vertically aligned channel structure transports moisture away quickly – for a dry suit after your break in between sessions.

HOT_STUFF 2.0
Hot_Stuff 2.0 thermo inside lining provides more stretch and heat insulation and more comfort and a plushier hand feel through bigger loops. Hot_Stuff 2.0 is one of the stretchiest linings in the world of wetsuits.

DRYGRID
Leave the water at its rightful place down below, not in your wetsuit – Drygrid absorbs up to 30% less water. As a result, the wetsuit is lighter and cooling by evaporation is reduced. Last but not least the look of the Drygrid contributes to the sophisticated detailing.

SILK_STUFF
Smooth inside lining for a comfortable feeling on bare skin. Despite its snugly appearance it proves to be really hardcore when it comes to the interior's superb flexible characteristics.

I_FOAM
The I_Foam is an extreme lightweight and stretchy neoprene foam. Thanks to the new foamed structure with more air trapped inside and a lower density the I_foam also contributes to heat insulation and better flexibility.

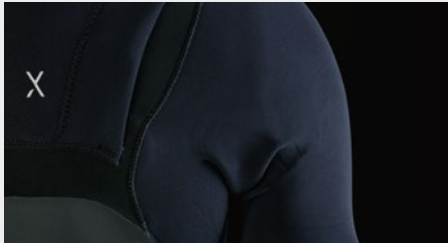

SEAM_REINFORCEMENT
All stress points are reinforced and secured by melco tape from the inside to ensure a longer lifespan of the seams.

CORDLOCK
Let's get down to the nitty-gritty details. A soft cord lock for front zip wetsuits that can be adjusted with only one hand. Additionally, it comes in an inconspicuous fashion that won't bother you while riding.

MAKI_TAPE 2.0
Highly elastic neoprene tape reinforces the seams on the lower body and mostly stressed cuff area from the inside.

SWEEP_CUT
Seam-free shoulder construction for increased paddle reach and shoulder rotation.

POWER_SEAMS
Ultra slim outside sealing technology for a long lasting life span providing freedom of movement and comfort wrapped in a smart package. The Power_Seams adding a special touch and unique look to all ION Select models.

|---|---|---|---|---|---|

STORM_WHISTLE

The Storm_Whistle®! The incredible Storm_Whistle®! is twice as loud as any other mouth-blown whistle in the world and it even works in and under the water.

HERO_METER

Wanna know if you are a true hero on the water? Just check out the Hero_Meter on the left wrist! It will tell you roughly the surrounding temperature and the equivalent hero-level ...

RE_FLECTIVE

Being out on the water can be seriously dangerous especially when it is getting dark much earlier. In case of an emergency you can rely on additional re-reflective prints on shoulder and hood area.

P_ZIP

The ultimate answer to a full bladder in a drysuit when it's freezing outside: This TIZIP Master_Seal® zipper provides the crucial feature for a long day on the water.

HOT_STUFF 2.0

Hot_Stuff 2.0 thermo inside lining provides more stretch and heat insulation and more comfort and a plushier hand feel through bigger loops. Hot_Stuff 2.0 is one of the stretchiest linings in the world of wetsuits.

MAKI_TAPE 2.0

Highly elastic neoprene tape reinforces the seams on the lower body and mostly stressed cuff area from the inside.

SEAM REINFORCEMENTS

All stress points are reinforced and secured by melco tape from the inside to ensure a longer lifespan of the seams.

SKIN

The closed cell stucture prevent heat evapratve heat loss. Vital for sailing in stormy conditions

WARD OF THE WINDCHILL

With wind and water reppelant material

WARM

Hot_Stuff 2.0 ensures no limitation in stretch and keeps you warm at the same time

PROTECTION

Crash_Padz make sure you are protected where needed

WINDCHILL FACTOR ■■■■

DRY_GRID

Leave the water in its rightful place down below, not in your wetsuit – Drygrid absorbs up to 30% less water. As a result, the wetsuit is lighter and cooling by evaporation is reduced. Last but not least the look of the Drygrid contributes to the sophisticated detailing.

PLASMA_PLUSH 2.0

Premium lining offering the best of heat retention and stretch. The high pile fabric traps air for snugly warmth and insulation while the vertically aligned channel structure transports moisture away quickly – for a dry suit after your break in between sessions.

SILK_STUFF

Smooth inside lining for a comfortable feeling on bare skin. Despite its snugly appearance it proves to be really hard core when it comes to the interior's superb flexible characteristics.

POWER_SEAMS

Ultra slim outside sealing technology for a long lasting life span providing freedom of movement and comfort wrapped in a smart package. The Power_Seams adding a special touch and unique look to all ION Select models.

PLASMA_PLUSH 2.0

Premium lining offering the best of heat retention and stretch. The high pile fabric traps air for snuggly warmth and insulation while the vertically aligned channel structure transports moisture away quickly – for a dry suit after your break in between sessions.

HOT_STUFF 2.0

Hot_Stuff 2.0 thermo inside lining provides more stretch and heat insulation and more comfort and a plushier hand feel through bigger loops. Hot_Stuff 2.0 is one of the stretchiest linings in the world of wetsuits.

SILK_STUFF

Smooth inside lining for a comfortable feeling on bare skin. Despite its snuggly appearance it proves to be really hard core when it comes to the interior's superb flexible characteristics.

I_FOAM

The I_Foam is an extreme light-weight and stretchy neoprene foam. Thanks to the new foamed structure with more air trapped inside and a lower density the I_foam also contributes to heat insulation and better flexibility.

SUPERIOR WARM

Quick drying Plasma_Plush 2.0 lining ensuring great warmth

OPTIMUM STRETCH

Limitless freedom of movement thanks to less panels and the use of our stretchiest linings

POWER_SEAMS

GBS Seams combined with Power_Seams where needed to ensure you stay warm

PROTECTION

Crash_Padz make sure you are protected where needed

PLASMA_PLUSH 2.0

Premium lining offering the best of heat retention and stretch. The high pile fabric traps air for snugly warmth and insulation while the vertically aligned channel structure transports moisture away quickly – for a dry suit after your break in between sessions.

HOT_STUFF 2.0

Hot_Stuff 2.0 thermo inside lining provides more stretch and heat insulation and more comfort and a plushier hand feel through bigger loops. Hot_Stuff 2.0 is one of the stretchiest linings in the world of wetsuits.

SILK_STUFF

Smooth inside lining for a comfortable feeling on bare skin. Despite its snugly appearance it proves to be really hard core when it comes to the interior's superb flexible characteristics.

I_FOAM

The I_Foam is an extreme light-weight and stretchy neoprene foam. Thanks to the new foamed structure with more air trapped inside and a lower density the I_foam also contributes to heat insulation and better flexibility.

JACKETS

LINE CONCEPT

ION NEO JACKETS & HOODIES are essential companions for cold and windy days on or off the water. Serving as an additional wind stopping outer layer and for extra warmth, these tops can be worn whilst using a harness due to the harness hole opening. Designed with a relaxed fit, you'll be loving these for action-packed sessions!

NEO TOPS

LINE CONCEPT

The ION NEO TOPS are a must-have for every watersports nut hitting the sea or surf in milder climates. Although mainly used in warmer waters to keep the sun and wind off the skin, they can also be used as a second layer underneath your wetsuit. Thanks to the plush, wool-like Hot_Stuff lining, these tops have a luxurious texture that feels great, even on bare skin! The NEO TOPS have a more detailed and technical construction than that of the standard Rashguard, providing 100% UV protection, efficient heat retention and a reduction in irritations and bruising often caused by the harness or surfboard.

RASHGUARDS

LINE CONCEPT

All ION RASHGUARDS are made of highly elastic SpanFlex_UV jersey. The hand feel of this supreme material makes the difference! They can be used to protect you from the windchill effect, UV radiation and abration but also work as a thin extra layer underneath the wetsuit.

WETSHIRTS

LINE CONCEPT

ION WETSHIRTS are where fashion meets function. Made from a quick-dry and stylish fabric, they protect against UV radiation and shield sensitive skin from the harsh elements. The WETSHIRT can be worn as a trendy tee with shorts at the beach, or with boardies on the water. Either way, we guarantee you'll look the part.

NEO ACCESSORIES

LINE CONCEPT

In the ION point of view the smallest items in the product range deserve the same dedication and precision as every complex item. Therefore the NEO ACCESSORIES are a small but essential part of the whole equipment and sometimes these small items decide whether you have a great day on the water or you go home in deep frustration.

Extend your session with our selection of NEO ACCESSORIES – protecting you and keeping you warm.

FOOTWEAR

2020

BALLISTIC . MAGMA . PLASMA

TECHNOLOGY FEATURES

BALLISTIC

The BALLISTIC range is our premium line and the crème de la crème of water footwear. If you're looking for exceptional warmth and maximum protection then this is the line for you. With support and stretch in all the right places, it's further enhanced with well thought out and cleverly designed features. All of the BALLISTIC line have the following standard features to provide supercharged feedback even through layers of Neoprene, plus a little bit more ...

Ballistic Sole: The famous and unique Aramid sol protects against razor sharp reef, mussels and other abrasive objects.

Plasma Plush 2.0: Premium lining offers the best of heat retention and stretch. The high pile fabric traps air for snugly warmth and insulation while the vertically aligned channel structure transports moisture away quickly.

Wrap_Up Sole: The usual flat sole evolves and wraps around the foot for a snug fit.

Segmented Sole: Further development of the creative and strategic cuttings providing a good mixture between support and flexibility.

MAGMA

The Magma enters its second generation just comes not as flashy. The perfect blend of that desirable 'barefoot' sensation and unrivalled warmth, an external split-toe and ultra-thin rubber layup is incorporated into its forward-thinking design. All of the magma styles have the following standard features:

Ankle Strap: Stay secure and supported.

Hot_Stuff 2.0: Hot_Stuff 2.0 thermo inside lining provides more stretch and heat insulation and more comfort and a plushier hand feel through bigger loops.

Segmented Sole: Creative and strategic cuttings have been integrated into the sole to enhance the flexibility in critical areas of the foot.

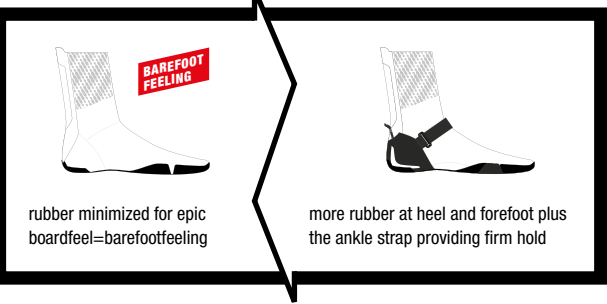

PLASMA

The PLASMA line will meet the demands of the budget orientated rider looking for quality. Offering a great fit and protection from the elements, ION wraps it all up in a spicy and unique design. All of the PLASMA models have the following standard features:

Segmented Sole: Creative and strategic cuttings have been integrated into the sole to enhance the flexibility in critical areas of the foot.

Rubber Wings: Added support to the vulnerable ankle areas

SOCK VS BOOT

| THOSE THREE STYLES SHARE THE SAME LAST | | | |
|--|-----------------------|--------------------|---------------------------|
| IS: INTERNAL SPLIT | ES: EXTERNAL SPLIT | NS: NO-SPLIT | RT: ROUND TOE NO-SPLIT |
| Socks 6/5; 3/2 | Boots 6/5; 3/2 | | Boots 6/5; 3/2 |
| Shoes 2.5 | Toes 2.0 | | Shoes 2.5 |
| | Boots 6/5; 3/2 | | Boots 6/5; 3/2 |
| | Shoes 2.5 | | Shoes 2.5 |
| | | Boots 6/5; 3/2 | Boots 6/5; 3/2 |
| | | Shoes 2.5 | Shoes 2.5 |
| | | Slipper 1.5 | |

COMPARISON NS/RT

For those who don't like that string between the toes we offer the NO-SPLIT and the ROUND TOE NO SPLIT. As the outline shows the RT has got a smaller root base than the other models. This ensures a tight fit on each foot and a better heat retention for your toes.

HARDCAPS

LINE CONCEPT

It won't come as a surprise to know that ION is evolving their line of Hardcaps with the same passion and innovation as they do all other products. This approach provides the basis and strong foundations for the ION Head Shell range, manufactured in a factory well known for the production of aviation helmets. ION is setting new standards for watersports: Hardcaps with a weight-optimised, yet robust construction and cosy materials on the inside. All ION Hardcaps meet the CE 1385 standard. ION provides the best protection in three different constructions.

HARNESS TECHNOLOGY

FEATURES

C_BAR 3.0
Comfort, lightweight, and a sleek design – the C_Bar 3.0 unites all these advanced features into a single piece. Fiber reinforced injection material with a modular exchangeable aluminum hook and Dynema webbing (rope). The tension lever tightens the harness without changing the buckle settings.

C_BAR 2.0
Fiber reinforced injection material with a modular exchangeable metal hook and rope.The tension lever tightens the harness without changing the buckle settings.

C_BAR
Fiber reinforced injection material with a modular exchangeable metal hook.The tension lever tightens the harness without changing the buckle settings.

METAL DOUBLE_D_BUCKLE
Ultralight and rigid Double_D closing system allows a quick and perfect adjustment of the spreader bar webbings. This system has already proven itself in various sports items like climbing gear or helmets.

C_30_BUCKLE
Easy to handle carbon adjustment of the spreader bar webbings with a pleasantly light weight.

SILICON_PRINT
The silicone increases friction, thereby keeping the harness in place.

INSIDE_EVA
Inside EVA prevents the harness from slipping.

INTERNAL_FLEX_BELT
A flexible closing belt system on the inside guarantees a snug fit and adapts perfectly to the rider's individual anatomy.

NEOPREN_BELT
A improved technical feature, designed to increase the feeling of flex, twist and overall comfort of wave and freestyle riding.

BOARDBAG TECHNOLOGY

FEATURES

CURV_PLATE

A thermo molded Curv plate ensures great stiffness combined with light weight and durability. The plate is protecting the area that is getting the most friction while traveling.

SHERPA_BELT

The sherpa_belt makes travelling even easier: simply put the belt around your shoulders and have your hands free for all the other stuff you need to take care of while traveling.

LIGHTWEIGHT

Thanks to the use of thin and lightweight ripstop fabric combining with ultra-lightweight foam padding, ION board bags ensure best board protection at minimal weight.

BAG_BREEZE 2.0

The Bag_Breeze 2.0 does exactly what it says on the tin! The two TPU patches on the front and back of the bag, are combined with the mesh inserts at the front and tail to ensure great ventilation. The mesh inserts are completely EVA padded, perfect to protect your precious board. Say goodbye to a hot damp interior and hello to a breezy bag for your wetsuit and board!

CONNECTIVE_HANDLE

Gone are the days of hauling your boardbag in an awkward fashion across airport floors. ION has developed the Connective_Handle as a simple solution for those tricky times. Using this accessory, you can connect the front handle of the Tec Boardbag to your trolley bag or airport trolley and calmly cruise to the check in counter.

PROFILE_TEC

On top of the 8mm basic foam layer a half circle foam profile with a thickness of 10mm is implemented. Working as a kind of damping system for your board; at the same time the air ventilation works better with this construction and lets your board get dry faster.

RAIL_GUARD

Put your mind at ease with the Rail_Guard feature. Covering the full rail of the board, the thick piping protects the rails from clumsy baggage handlers, over zealous taxi drivers and all other kinds of impact.
