# WHAT'S NEW

## VTS COMPLETE, THE VISUAL TRIM SYSTEM.

In addition to developing superior components, we have always focused on speeding up the rigging process and simplifying the trim so that everyone can activate one hundred percent of the sail's performance.

In 1997, DUOTONE introduced dots in the top of the sail using them as a visual indicator for the correct downhaul tension. The VISUAL TRIM SYSTEM was born.

Now with the introduction of the VTS TAIL we have finally made the correct outhaul tension visible as well.

The VTS downhaul dots and the brand new VTS TAIL together result in the VTS COMPLETE - a complete, extremely easy-to-use trim system that visually displays the perfect tension of down- AND outhaul. With this, anyone can trim their DUOTONE sail as quickly, precisely and powerfully as our sail designers, testers and team riders.

**S/L/S**

## STRONG - LIGHT - SUPERIOR

We asked ourselves the question, „If you ignored all limitations and pushed all technical possibilities to the limit, how far can we go? What would be the result?“

A wish list was quickly drawn up with the criteria that were important to us: maximum performance, maximum dynamics and minimum handling forces but without any restrictions in terms of durability. Or in other words: the ultimate windsurfing equipment that technology, raw materials and design can produce with NO compromises. Any product that carries the SLS suffix is proven to offer a better weight to performance and durability ratio than any comparable products from other brands. We back that up with DUOTONE's unmatched warranty promise, offering a 5-year warranty on SLS sails and a 2-year unlimited warranty on all SLS hardware products like masts, booms and extensions!

## LIGHT DONE RIGHT CONSTRUCTION (SUPER\_HERO + SUPER\_STAR)

In addition to optimizing performance, reducing the sail weight was a primary goal. With a modified panel layout, reinforcement patches with high-strength high-modulus fibres „Made in Germany“ and a new mast sleeve construction, designer Kai Hopf achieved a weight reduction of a clearly noticeable 200 to 300 g! Unlike other brands, the thickness of the fabric and film used has not been reduced and thus the well-known durability and longevity is fully maintained! That's exactly why we call it LIGHT DONE RIGHT CONSTRUCTION.
