

KARIN GERTENBACH HEAD OF MARKETING

With its strong Hawaiian roots, Stand Up Paddling (SUP) has quickly become a mainstream sport, appealing to a huge range of users due to its accessibility and variety. Fanatic started with SUP boards back in 2010. By using our Boardsport expertise "since 81", we have been a key leader and pioneer in the sport from the start.

The last 12 months have been very difficult for the majority of people affected by the Corona crisis, including the Fanatic family. At least a tiny positive side effect was that many people were able to to do outdoor sports and Stand Up Paddling was on top of the list.

SUP is by far the easiest to access watersport, with a broad range of users varying from professional wave riders, downwind racers & long distance record breakers; all the way through to yoga & fitness enthusiasts, or families & kids just having fun at the beach or lake. SUP is not only a sport, it's also a lifestyle, with a great community.

Sustainability is a key issue for us going forward, working on products with the least possible strain on natural resources, whilst offering the longest life cycle is our goal – and working with dedicated paddlers and organizations to raise awareness of the current pollution issues in our oceans and waterways, all part of a broader Sustainability programme for our company as a whole.

At Fanatic we are building composites and inflatable SUPs that will allow you to enjoy the stoke and progress in our wonderful sport, no matter what level you are at and what designs you like.

So, wherever you find yourself on the water this season, we hope you enjoy your board!

13

LET'S FACE IT

Our sport depends on a healthy environment - we all do! But up until today our sport is not the most sustainable thing in the world. We're consuming a large number of fossile fuels to develop, produce, transport and ultimately also get to the spot and ride our boards. Being out there itself is clean and the best we can do – but the way to get there leaves a trail. We at Fanatic are well aware of this and we're taking action to reduce our trail as much as we can - and more!

In order to offer you an affordable, long lasting product that's as eco-friendly as possible, we're optimizing the entire process to save fuels, plastics and energy on the production side and support carbon offset projects to balance our consumption on the other side. It's a continuous process we're pushing together with our partners to protect what we love.

OUR PROCESS

R&D

In order to develop as efficiently as possible, every single prototype is developed by our R&D Team and built by Sebastian Wenzel - all the knowledge stays in-house. Our huge database allows minimal prototyping to the final production shape.

EEDING.

SYNERGIES

PRODUCTION

Our boards are built at the leading production facility of the industry - not only in terms of quality, but also in terms of social responsiveness and sustainability.

SHIPPING

We're constantly improving ways to combine shipping from our production lines to our centralized warehouse in Europe and other key locations for our worldwide distribution. Together with our Boards&More partner brands ION and Duotone we're making sure our products make their way to you with the smallest fuel consumption possible.

Materials

A major factor for sustainability is quality and longevity. No one wants to buy a board that looks like a tree but also rides like a log or breaks like a match. We implement natural elements wherever possible, but focus on quality. Our Fly Eco – built with Flax, Wood & Cork Layup – shows what's possible and we're excited to further expand the use of natural components.

PACKAGING

We've created a task force in order to optimize packaging to the minimum, using recycled materials, replacing single-use plastics with paper/cardboard and packing in a way to make recycling convenient for our customers.

CARBON OFFSET

We calculate and offset the carbon emmissions caused by our products and processes by supporting recognized carbon offset projects, to make our products 'Carbon Neutral'.

FANATIC

ION

Be a part of the process and stay informed about our initiative "Save Our Playgrounds" – a platform to coordinate actions by Boards&More brands Fanatic, ION and Duotone to protect our environment. You can find more information on Fanatic.com.

DUOTONE

CLEA

PARTNERSHIPS IN SUSTAINABILITY PROJECTS

LIZZY CARR PLANET PATROL

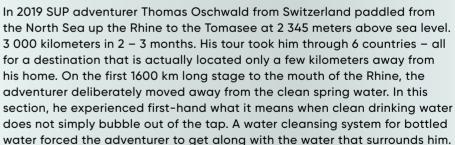

Planet Patrol (formerly called Plastic Patrol) helps to organise clean-ups all over the world (44 countries and counting), bringing communities together at specified events to identify and collect plastic waste, photograph and log the evidence through the Planet Patrol App, before clearing it away. On World Clean Up Day Planet Patrol was organising global clean up actions in differents segments – a great achievement – which we're proudly supporting!

MICHAEL WALTHER ZERO EMISSIONS

Since 2008, Michael is pursuing two goals with his projects. With his extreme adventure tours, he wants to highlight the possibilities of climate-friendly technologies and demonstrate that it is often a matter of will and not of skill when it comes to achieving goals – on both board development and in climate protection. In 2018 Michael was paddling to the edge of the glaciers in Greenland to raise awareness for climate change. He was following "The Great Route" from Aasiaat to llulissat to find out more about the life on the rough island in the past and in the present. In 2020, Michael paddled from Basel (Switzerland) to Kiel (Germany) for the same purpose.

THOMAS OSCHWALD STAND UP FOR SAFE WATER

PURE WATER FOR GENERATIONS

In 2017 Pascal Roesler, a businessman from Munich, paddled from Munich to the mouth of the Danube into the Black Sea, 2 467 km and 63 days on the water with his Falcon Air, about 600 000 paddle strokes in total. He did that all for a good cause – to raise awareness of the need for clean water, essential for our planet's survival. In 2018 he went down the river Salzach, accompanied by our river SUP ambassador Oliver Heldt. The Salzach runs 225 kilometers before flowing into the river Inn.

Nowadays Pascal is touring through Germany to visit school classes in order to educate the youngsters in terms of water awareness. For that cause he bought a bunch of Pure SUPs from Fanatic!

Easy to sail and effortless to uphaul, the Ride SUP rig is the ideal solution for light wind windsurfing on SUP boards (with mast track insert), or Windsurf/SUP boards such as our Viper Air and Ripper Air. All components are designed to make rigging as simple as possible, so you can just rig and go in as little as 30 seconds!

Light Dacron sail for a smooth power delivery and a light feeling

3-piece compact boom works as a normal boom but can be stored more easily

Mastbase extension and boom with markings help setup the sail easily Entire rig comes in an ultracompact bag that is easy to transport / store
