# WHAT'S NEW

The 2023/24 AllWave comes in a completely new shape. It's super easy to paddle and catches wave after wave, whether it's clean overhead walls, or small and choppy. Between the 5 sizes 7'9" / 8'2" / 8'7" / 8'10" and 9'2" everyone will find the right model for their skills and body weight. Due to the new outline and a new rail shape, the board is shorter but carries the same volume and therefore is more compact. The biggest innovation is the underwater hull: A new rocker curve makes sure the board rips in any conditions – from messy small waves, to more powerful, clean and faster swell.

- New compact outline: Shorter overall length for paddling comfort and easy surfing in less powerful waves
- New rail shape for stability, security and clean turns
- Sharper rails around the tail for acceleration and grip while turning, rounded rails in the nose area for easy surfing
- Lightweight domed deck for more volume in the stance area
- New extreme bottom shape: Deeper single concave in the stance area turns into a double concave and into a pronounced V-double concave between the fins
- New bottom shape for intuitive rail to rail surfing and speed in turns without losing grip on the rail

ALLWAVE

## DOWNWINDER

The best way to fly!  
The Downwinder was developed for one purpose only: To paddle on the foil as easy as possible and to surf any kind of swell as long as possible. The fascination of downwind foiling takes on a whole new dimension with this board. Available in 5'10" and 6'2" and completely optimised for downwind foiling. The shape is based on a SUP race board and helps you to get on the foil even in the smallest swell with maximum control! This board will take your downwinding to a new level.

- Stretched outline for more speed and smaller foils
- Extremely large volume in the nose for better pumping
- Lowered deck for more paddle control and more direct foil control
- Round nose for easier pop-up and controlled touchdowns
- Rounded rails in the front of the board prevent clipping on touchdowns
- Beveled rails in the tail for better release when getting on the foil
- Tail kick for easier pop up and free pumping of the board

The 2023/24 Sky SUP is a compact SUP foil board perfect for shredding any size waves on a foil for paddlers or surfers at any level and it can be used as a wing foiling board too. The main focus for 2023/24 was to keep the boards as compact as possible without compromising stability, comfort, ease of paddling and catching waves. The new boards feature a rounder, more surf-inspired outline, a new rocker to account for the shorter length and a completely new deck and rail shape.

- Recessed deck shape for more stability, direct connection to the water, early flight and maximum leverage for pumping and turning
- V bottom shape in the nose which transitions into flat in the back half of the board for early take-off, clean water release and less sticky touch downs
- Beveled rails from nose to tail to help the rail clear the water during tight turns
- Kick tail for a tight transition of a small wave while still giving the board plenty of clearance to pump and turn
- Nose keel to help the board tracking in a straight line when paddling out through the lineup and while catching waves

## SKY SUP

# YOUNG BLOOD EDITION

## YOUNG BLOOD SUP

The Falcon Air Young Blood inflatable racing SUP is designed for the next generation of SUP racers who want to focus on speed, training and covering long distances.

- Stretched narrow outline with a narrow tail for clean and fast waterline / efficient strokes
- Double Layer Light technology
- Silicon rail edges for better release and reduced drag
- Produced at the world's most renowned manufacturer with top quality materials and production processes, providing unmatched air pressure/stiffness ratio

## YOUNG BLOOD PADDLE

The Carbon 35 Young Blood adjustable paddle with its matt finish 35% Carbon / Glass shaft and a strong, ABS protected Carbon Composite blade is the perfect match!

RIDER: ANNA DEHEACK

# NEW PADDLE RANGE

## NEW PADDLE RANGE

Our completely new developed paddle range is designed for everyone: From beginner to pro rider, for all genders and ages. A highlight of our 2023/24 paddle range are the completely redesigned blades for a super controlled stroke with better traction and a higher efficiency as well as the newly developed thin paddle shaft with a thinner diameter. This leads to a significantly improved handling while keeping the same stiffness when paddling.

The Anti Twist System on all adjustable paddles makes sure that handle and blade are always lined up correctly and never twist. Available with a 7.3" or smaller 6.9" blade and a newly developed thin diameter shaft with only 26 mm or 28 mm diameter. All paddles come with integrated ABS blade protection and the adjustable versions have a range from 170 - 220 cm.

Please check page 19 for details

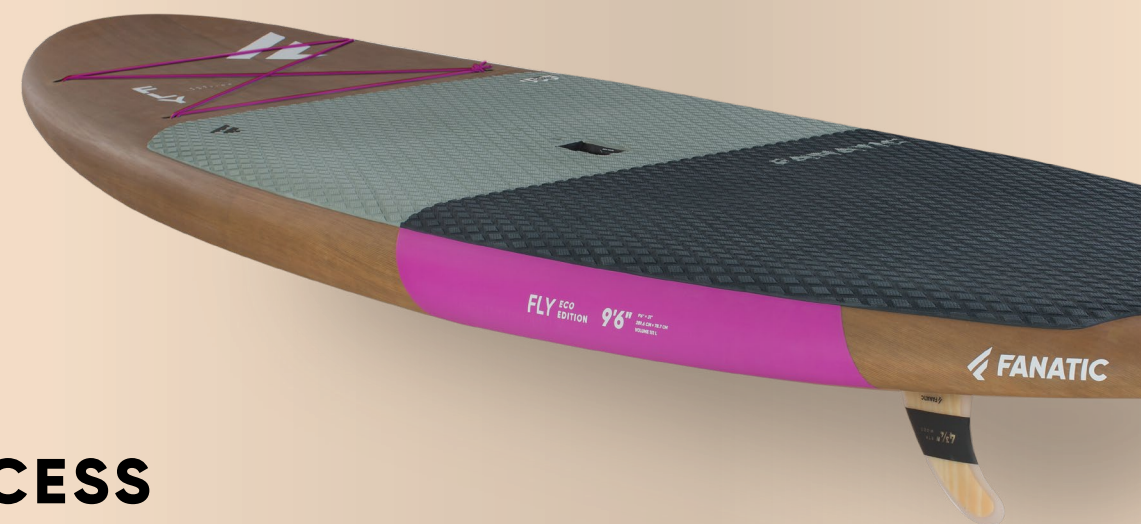

# OCEAN MINDED

### LET'S FACE IT

Our sport depends on a healthy environment – we all do! But up until today our sport is not the most sustainable thing in the world. We're consuming a large number of fossile fuels to develop, produce, transport and ultimately also get to the spot and ride our boards. Being out there itself is clean and the best we can do – but the way to get there leaves a trail. We at Fanatic are well aware of this and we're taking action to reduce our trail as much as we can – and more!

In order to offer you an affordable, long lasting product that's as eco-friendly as possible, we're optimizing the entire process to save fuels, plastics and energy on the production side and support carbon offset projects to balance our consumption on the other side. It's a continuous process we're pushing together with our partners to protect what we love.

THE BOARD WITH THE ECO FRIENDLIEST MATERIALS

## OUR PROCESS

AS EFFICIENT AS IT GETS

### R&D

In order to develop as efficiently as possible, every single prototype is developed by our R&D Team and built by Sebastian Wenzel – all the knowledge stays in-house. Our huge database allows minimal prototyping to the final production shape.

EXCEEDING THE STANDARD

### PRODUCTION

Our boards are built at the leading production facility of the industry – not only in terms of quality, but also in terms of social responsiveness and sustainability.

B&M SYNERGIES

### SHIPPING

We're constantly improving ways to combine shipping from our production lines to our centralized warehouse in Europe and other key locations for our worldwide distribution. Together with our Boards&More partner brands ION and Duotone we're making sure our products make their way to you with the smallest fuel consumption possible.

ALL NATURAL?

### MATERIALS

A major factor for sustainability is quality and longevity. No one wants to buy a board that looks like a tree but also rides like a log or breaks like a match. We implement natural elements wherever possible, but focus on quality. Our Fly Eco – built with Flax, Wood & Cork Layup – shows what's possible and we're excited to further expand the use of natural components.

GREENER, SMARTER, BETTER

### PACKAGING

We've created a task force in order to optimize packaging to the minimum, using recycled materials, replacing single-use plastics with paper/cardboard and packing in a way to make recycling convenient for our customers.

CHECK ON YOUR BOARD

### CARBON OFFSET

We calculate and offset the carbon emissions caused by our products and processes by supporting recognized carbon offset projects, to make our products 'Carbon Neutral'.
