MAJOR UPDATES

For 2026 we have focused on adapting #surfingtrails in design, fit and functionality while pushing forward with our enduro roots. With our continuous success with IONIC, now Traze and all enduro favourites are easily to be found in the fan-favorite.

The ARCON line is continuously pushing innovation in protection. Together with RE ZRO we are expanding our solutions for all kinds of riders, offering the unique blend of ultimate protection with sustainable solutions.

As a celebration of our freeride mindset, we are launching a **Scrub Utah** jersey and pants. With bold designs and modern fit, based on previous Red Bull Rampage favorites, we want to celebrate yearly presence of our ION riders in the red dirt of Utah.

The **ARCON HD Pro Nico Vink Signature Model** is our flagship bikepark body armor model, created and tested by the complete freeride community. For them we now have the chest and back piece available, separated to limit level 2 protection to an area of choice.

Enjoy surfing trails,

The ION team

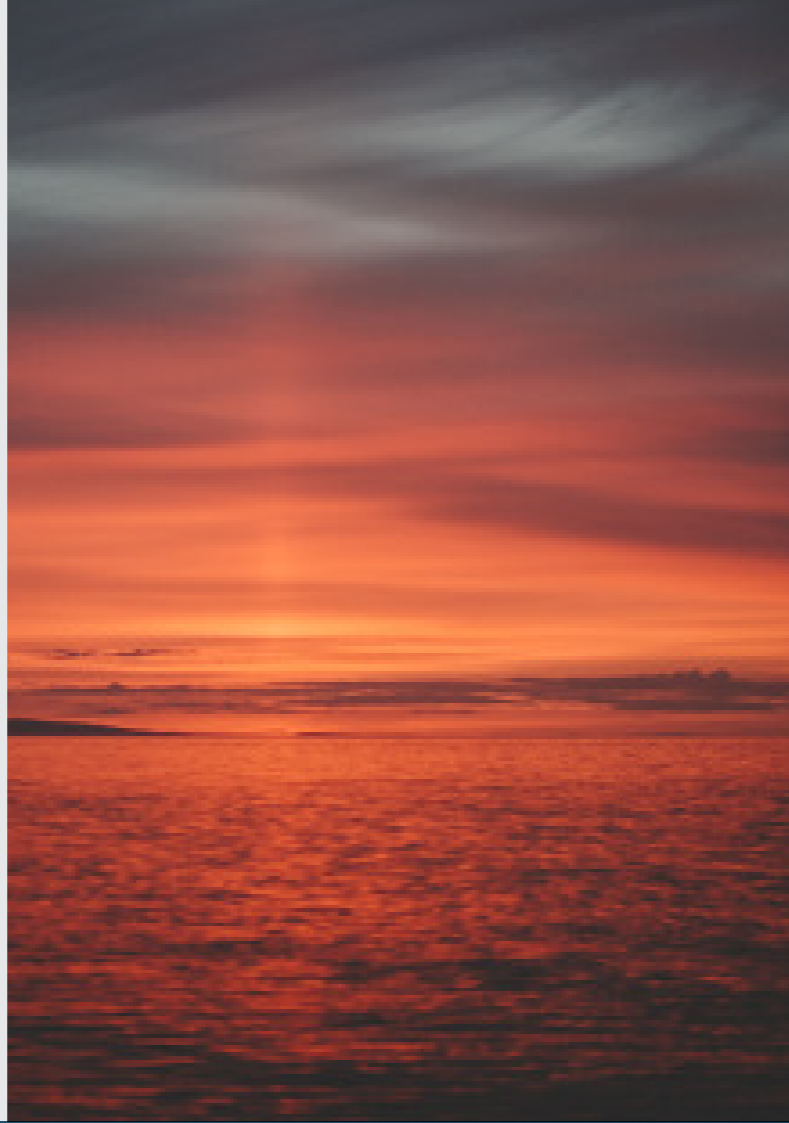

2026

WHAT'S NEW

—

Creativity ignites the spirit. It transforms the ordinary into the extraordinary, revealing the vibrant tapestry of our imagination. As we embark on our journey this year, we embrace the notion that every creation is a celebration of individuality and innovation. The exploration extends beyond physical boundaries, inviting us to delve into the realms of thought and inspiration. Explore beyond 2.0 collection put the focus on the creative part of exploring. It's designed to empower individuals to unleash their full potential. It encourages us to take risks, to experiment, and to weave our unique narratives into the fabric of existence.

NICO VINK
SIGNATURE MODEL

RE ZRO®

ARCON HD PRO CHEST PROTECTOR

A masterpiece born from the silent wisdom of freeride legend Nico Vink and ION's unwavering commitment to innovation. After 20+ years of experience from racing to big mountain freeriding, Nico shares his testament to protect the new and old 2-wheel guy or woman out there.

For two years, we have worked closely with Nico Vink and combined his expertise with our innovative protection mindset, resulting in a protector that redefines the boundaries of safety and performance. The Arcon HD Pro boasts a 3D structure that adapts seamlessly to any rider through the SyncBody elastic straps, offering a fit so precise it feels like a second skin. Its 360° AC Cooling structure gives the rider an unmatched breathability, like you are wearing less instead of more. All in mind to ensure you stay cool under pressure, whether you're hitting big lines or pushing your limits in the bike park.

Nico Vink and our R&D Department left no stone unturned and worked together with RE ZRO to innovate the market with a Level 2 protection both front and back. This allows you to ride with the same love for biking as Nico Vink; with unshakeable confidence, progress in your mind and excitement for every ride.

The Arcon HD Pro Chest Protector is built with RE ZRO key components which are a combination of energy-absorbing Level 2 protectors and RE ZRO Power Slide Caps.

Both the chest and back sections are 3D pre-shaped, offering a new personalized fit and are extremely comfortable to use under or above the jersey.

LEVEL 2 - PROTECTION

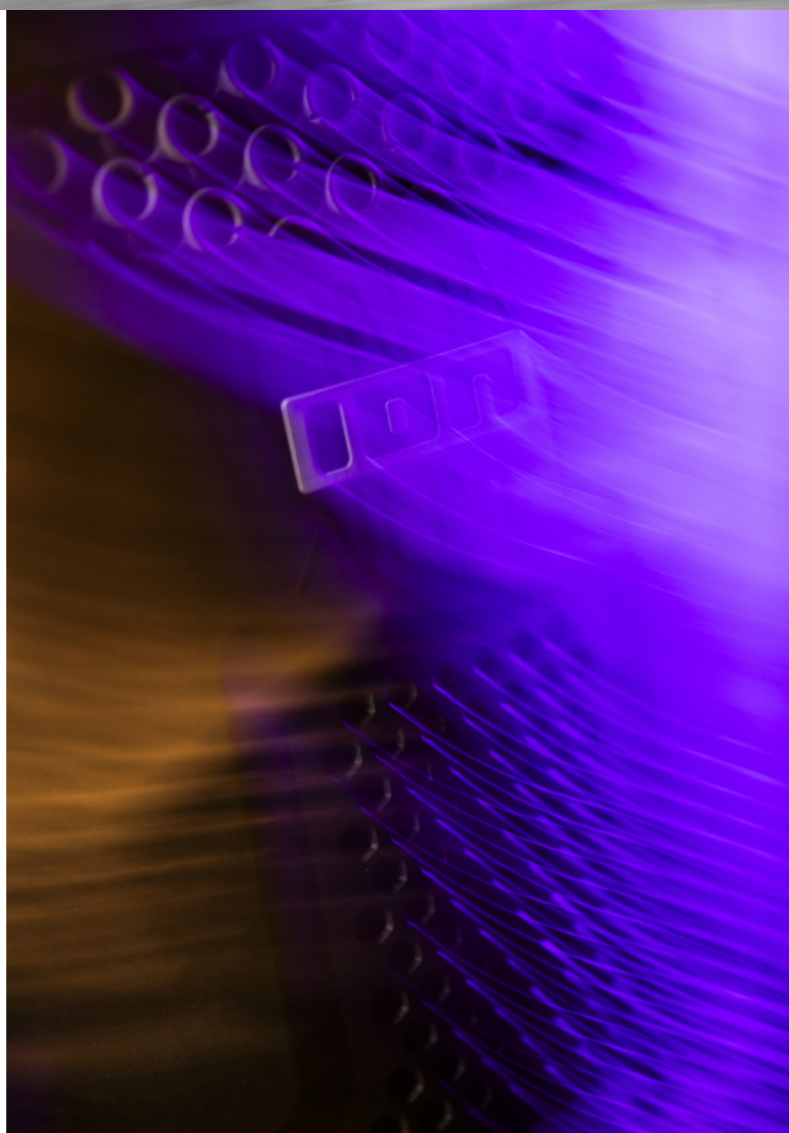

You find full Level 2 protection on the back, as well as on the chest. Additionally, RE ZRO Power Slide Caps are strategically placed on front and back for extra impact and sliding properties.

RIDE WITH BREEZE

The unique RE ZRO shape, and large ventilation openings in the RE ZRO Powder Slide Caps, give it the 360° AC_cooling; an almost imperceptible feel while riding.

PRO DESIGN

The Syncbody elastic straps fit the Arcon HD Pro chest protector with any rider. They can be easily customized in length and position, while the one buckle closure makes it easy for any kind of rider to put the protector on and off quickly.

THE FIRST BIODEGRADABLE L-2 PROTECTION

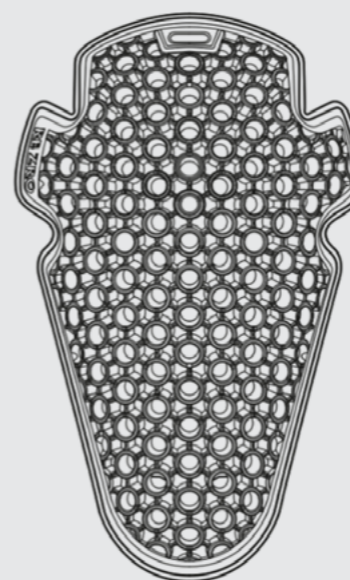

RE ZRO is our new partner for the expanding ARCON line, that pushes the transformation of the body armor category with biodegradable level 2 protection ingredients.

<https://youtu.be/ZS1SYAHfkBE>

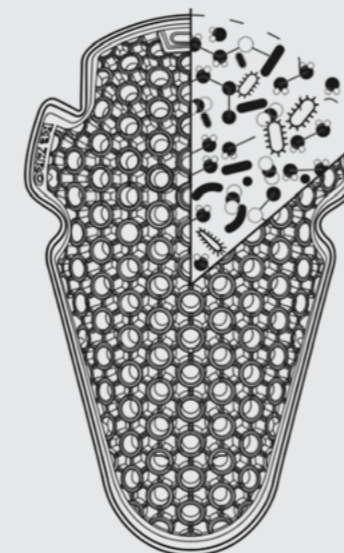

1. The biodegradation process will only start when the products find themselves in a landfill environment.
Landfill environment = Microbe rich and Oxygen depleted.
2. Microbes and fungi colonize at a molecular level.
3. They feast on the carbon of the plastic.
4. Leaving only biogas and biomass behind.

*For more info on RE ZRO's biodegradability, please visit:
www.re-zro.com/terms

IN USE

14.4% IN 3 MONTHS

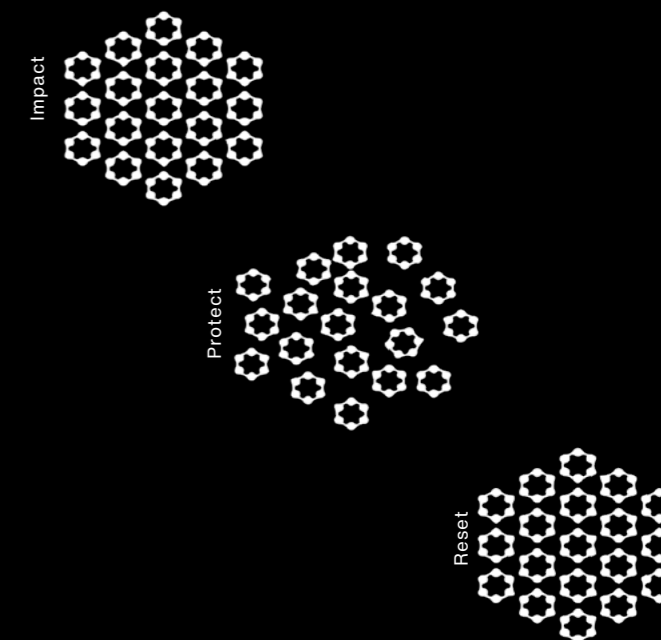

3-5 YEARS

LEVEL 2 PROTECTION

RE ZRO's proprietary technology protects the riders through the fracture of the molecular bonds under impact, releasing energy through heat and sound, a material behaviour known as shear-thinning. The Supermolecules then recombine immediately after impact, RE setting to ZRO.

ADAPTIVE SIZING –PERFECT FIT, MAXIMUM PERFORMANCE

Traditional sizes are often insufficient to optimally fit our protector to different body shapes. This is exactly where the Adaptive Sizing model from ION x SQlab comes in: based on ergonomic insights, a new sizing system has been developed that goes beyond standard sizes and for the first time takes body proportions into account.

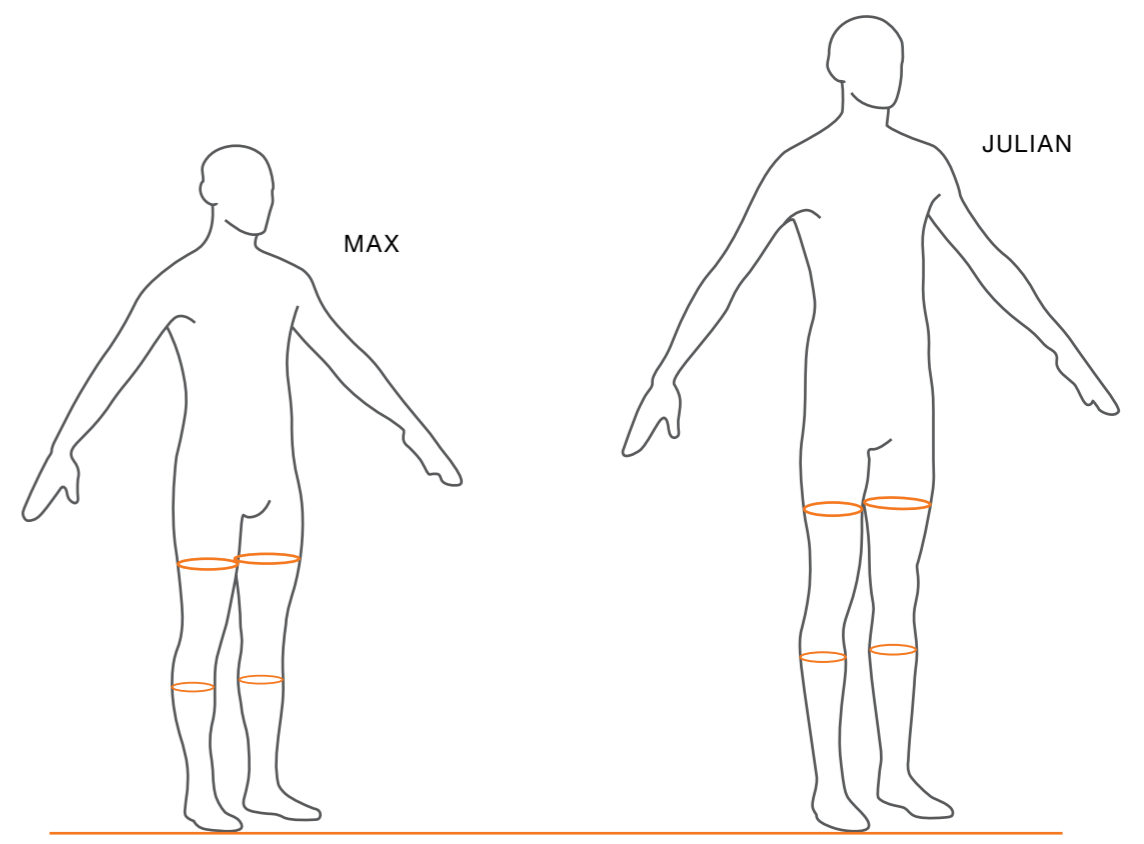

The starting point: instead of focusing on traditional sizing strategies, for the fit of knee or shin protectors we know focus on the thigh or calf circumference as particularly important. A protector that is too long or too short can significantly impair the fit, protective effect, and comfort.

For these specific products, protection sizes will be available from S to XL, with two extra lengths variants: Tall and Short. The size selection takes place in two steps:

1. Determining the circumference (e.g., thigh for knee protectors) >>> defines the basic size (S–XL)
2. Considering the body height >>> selection of Tall or Short

The new Adaptive Sizing ensures a more precise fit and optimizes both comfort and protection – fully in line with the shared mission of ION and SQlab: to unite technology and ergonomics to elevate the riding experience to a new level.

SCRUB SELECT GRDXKN

GRDXKN is a novel interplay between graphics and fabrics. By printing the technology onto the fabric, the weight stays low and the flexibility high. The function and design are integrated are elevated to a common level.

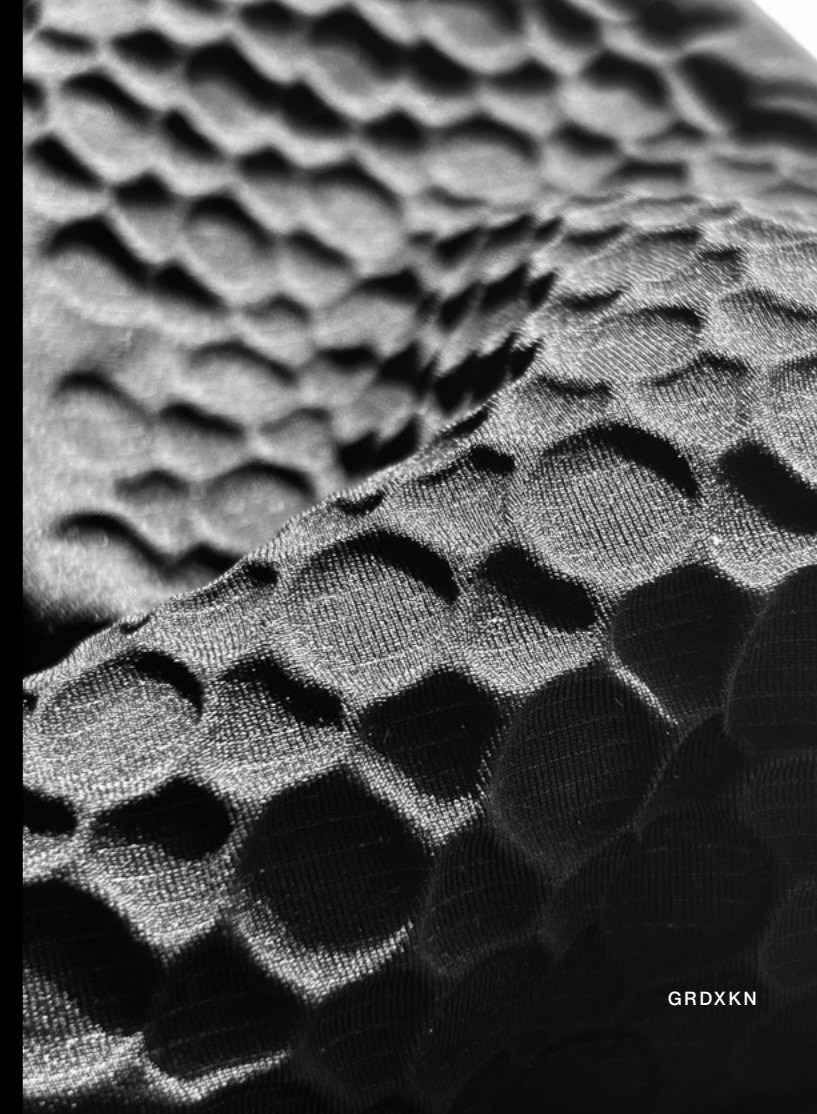

STABILIZING

The structure printing technology stabilizes the textiles with special support architecture, thus stiffens these to be even more tear-resistant. Making the fabric ready for any track or challenge

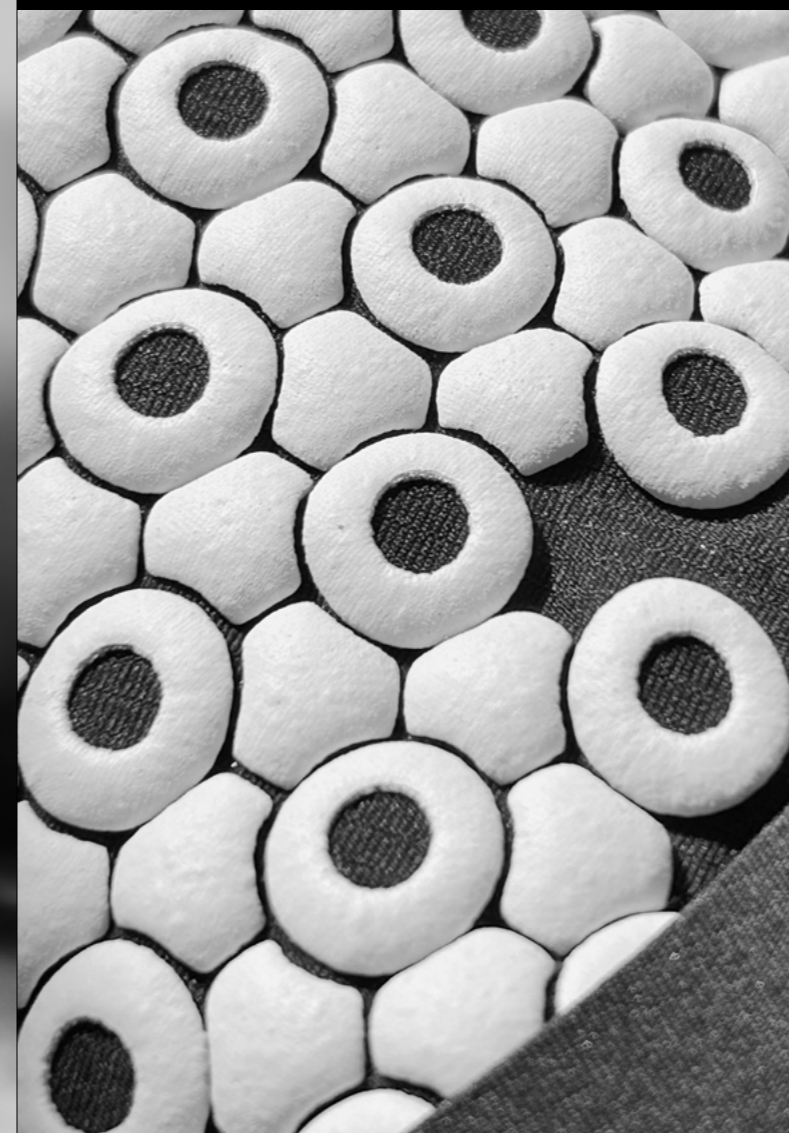

LOW WEIGHT

Due to the foamed material composition, GRDXKN is a high level of balance between stability and low weight.

GRDXKN

AERODYNAMIC

The structure print creates a concave structure - 'golf ball structure' - that has aerodynamic effects on the surface. Perfect fitting for where each second counts.

ABRASION-RESISTANT

GRDXKN intentionally combines different materials making the surface abrasion-resistant.

VENTILATING

The structure is very variable in shape and dept, with cavities created that offer breathability effect on the clothing, needed when pushing the limits on the bike.

GRDXKN®

SAVE OUR PLAYGROUNDS

You rely on our gear every day. That is why it was designed to withstand years of use and is ready for more. Ion products are made from durable and innovative materials, opted by approved suppliers to SAVE our playgrounds.

At last it's about extending our product's lifecycle and we believe less consumption is more for the planet. Nevertheless, building sports gear will always have an environmental footprint. Therefore, we see it as our mission to counteract the development of environmental pollution by doing our best to keep the sea and air clean and our earth healthy.

"Save our playgrounds" is an initiative to coordinate and bundle all actions of our brand to protect our environment. It is paired with steady efforts to minimize our company's footprint whenever possible." We take these efforts very serious because we are responsible for ensuring that also future generations can live the stoke of surfing elements.

For more details check www.ion-products.com/bike/save-our-playgrounds/

PRODUCTION

We are committed to bringing production and marketplace closer together while optimizing our global supply chain structure with new production sites in Europe.

MATERIALS

ION is continuously sourcing for new, innovative and more sustainable materials. We are committed to avoid the use of harmful chemicals by opting for approved materials and suppliers. The majority of our fabric manufacturers are bluesign® and Ökotex 100 certified.

PACKAGING

We invest in sustainable packaging that over time reduces its environmental footprint.

MINDSET

We see it as our mission to minimize the environmental footprint with several efforts in all business areas.

partnerships

ION relies on the behavior and resources of several key partners who work to improve the way we build our products and conduct our business.

In order to make it easier for our partners and consumer to find our eco efforts in the ION product range, we introduced the product seal "save our playgrounds – fair & clean content".

We commit to the six focus points shown above, and apply this label when achieved all six of them.

SCRUB

SCRUB UTAH

The Scrub Utah capsule design is a visual voice to the spirit of our riders' annual pilgrimage to the red-stone meca of freeride. Clean, confident graphics echo the historic lines drawn at Rampage by the ION Athletes, while the updated fit—trim yet unrestrictive—lets the jersey and pants move as naturally as a scrub turn on dusty sandstone.

Built from light but durable fabrics, each piece balances ventilation, abrasion resistance and all-day comfort, ready for bike-park laps or back-country surfing trails. Scrub Utah is a quiet salute to the terrain that keeps challenging us, and to the freeride mindset that keeps bringing us back.

BODY AMPLIFIED TECHNOLOGY

The innovative Scrub panel design that combines a perfect mix of lightweight with highly durable materials. The use of robust fabrics ensures a long lifetime of your gear even with many ground contacts.

GRDXKN[®]

An industry first printing technology to strengthen fabrics, directly onto the fabric. Via this technique the weight stays low and the flexibility high. The function and design are integrated and elevated to a common level.

DURABLE POLYAMID ELASTIC (DPE)

DPE is the newest most durable fabric in our range, made out of 30% Nylon 6.6, 60% Nylon and 10% Spandex which makes it nearly unbreakable, applied on the whole Scrub range. Also extremely lightweight with only 176g/m2.

LASER CUT VENTING HOLES

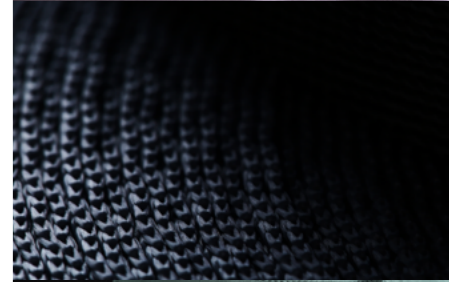

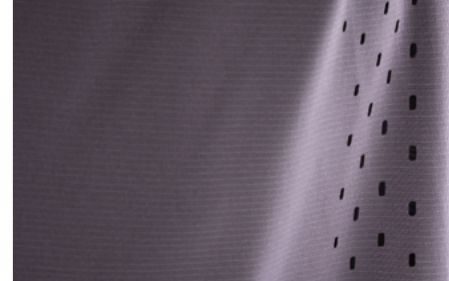

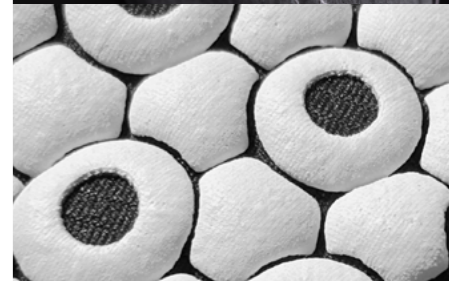

Strategically placed laser cut holes to make sure there is enough ventilation for the rider, front and back

POWER KNIT

A recycled polyester/polyester mix, can be found across the whole jersey, and it uses a special tight knitting technique, like woven fabric, so fibers are not easily snagged.

RATCHET FRONT CLOSURE

Functional closure system that gives the rider the perfect personal fit, easy to use with or without gloves

RE ZRO®

STAY COOLER FOR LONGER WITH OUR MARKET LEADING VENTILATION.

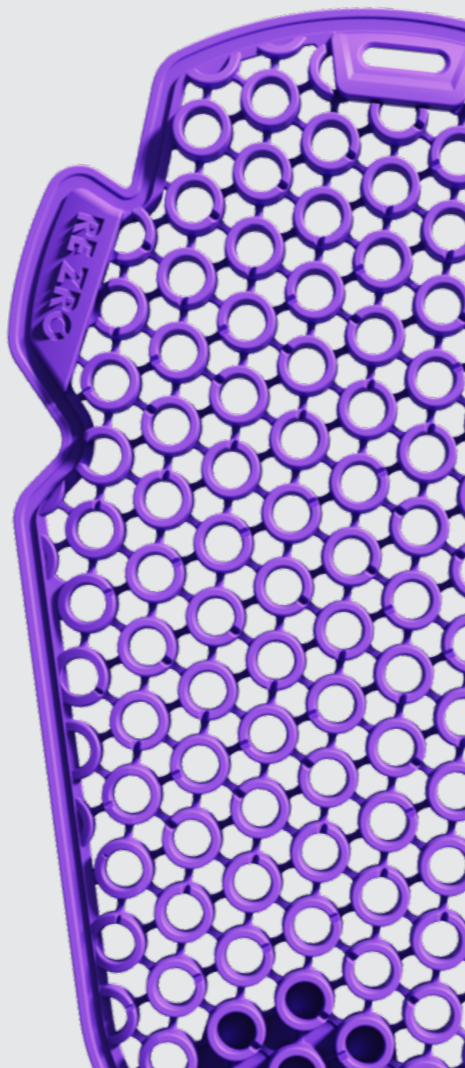

LIGHTWEIGHT AND LOW PROFILE GIVING YOU THE ABILITY TO PUSH TO THE LIMITS UNINHIBITED.

ULTIMATE FREEDOM OF MOVEMENT WITHOUT SACRIFICING PROTECTION.

We've partnered with TOTO-TOA® to make a smarter and safer impact on the environment. When recycling is not available, the RE ZRO® material is designed to quickly biodegrade* when responsibly disposed of and left in landfills and the natural environment, where most plastics end up.

Special ingredients are added during the manufacturing process of the RE ZRO® materials to speed up the biodegradation process in an oxygen-depleted environment. At the end of lifewhen a RE ZRO® product is disposed of in a landfill, the special ingredients are activated, and the biodegradation process begins. This takes three to five years, whereas traditional synthetic products take hundreds of years.
