

A black and white photograph of a desert landscape. In the foreground, there are large, craggy rock formations. A dirt road winds through the middle ground, where two cyclists are riding away from the camera. The background shows a vast, flat desert plain with distant mountains under a cloudy sky. Six orange plus signs are scattered across the image: three in the upper half and three in the lower half, arranged in a roughly rectangular pattern around the central text.

**THIS IS THE DIFFERENCE.**

Every ride is different—  
even when the route stays the same.  
It's not just about the miles you cover,  
but how you feel along the way.  
That's why we don't believe in standards.  
We believe in you. In your movement, your  
anatomy, your ride. We measure you so your bike  
adapts to you—not the other way around.  
After 20 years of research, we've learned that  
true comfort isn't just a feeling—it's  
engineered. Engineered to push further, ride  
longer, and feel better with every pedal stroke.  
Because we know that improving every minuscule  
detail, results in maximum performance.  
This is the difference.

**SQLab**

# THIS IS THE DIFFERENCE.

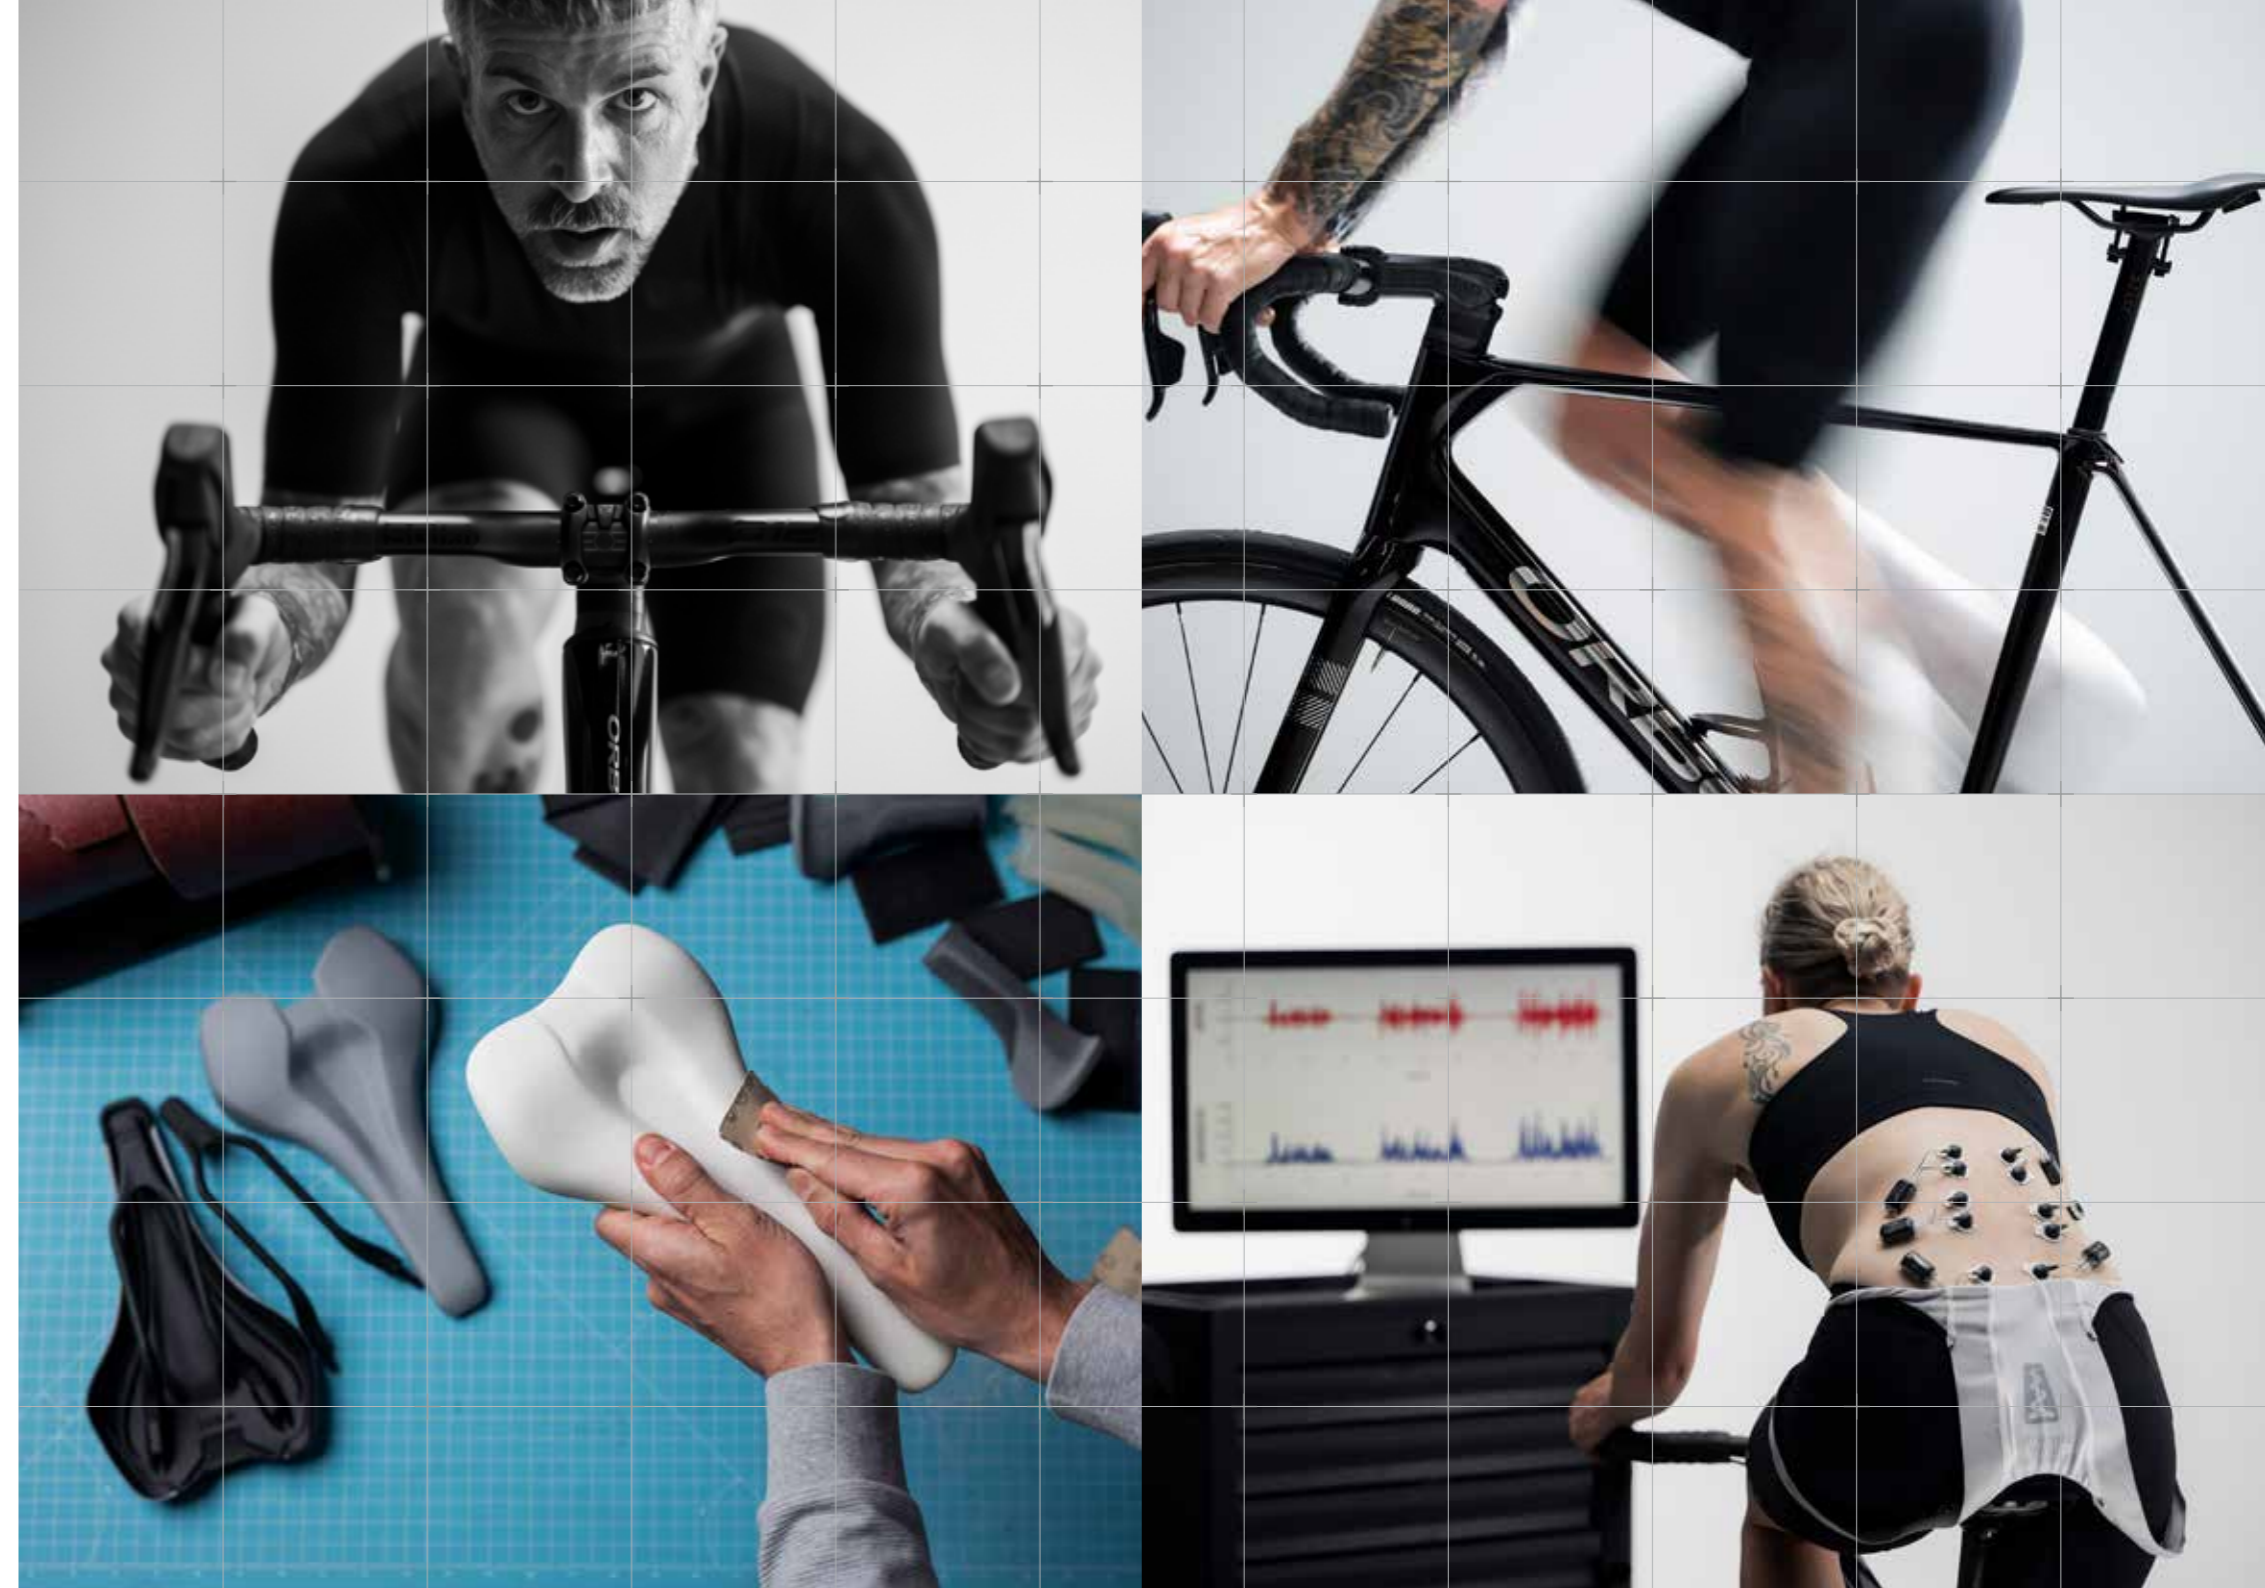

At SQlab, we don't believe in guesswork. Every innovation starts in the Lab – the heart of our research and development. Here, science, biomechanics, and cutting-edge technology come together to redefine the riding experience.

We measure. We analyze. We optimize.

From pressure mapping to extensive field testing, every product is backed by data and designed with ergonomic precision. The SQlab Lab is where riders' needs meet science, ensuring that comfort, performance, and health are not just promises, but proven facts.

But innovation doesn't stop with technology. It's about rethinking cycling ergonomics from the ground up. Every curve of a saddle, every millimeter of a grip, every design decision follows one simple principle: it has to work better – for every rider.

The SQlab Lab is not just a place. It's a mindset. A commitment to making cycling healthier, more efficient, and more enjoyable. Because when science meets cycling, you feel the difference.

## ERGONOMICS IS OUR DNA

At SQlab, we rethink cycling –from the rider’s perspective. Because anyone who wants to ride longer, healthier, and with more joy needs products that fit perfectly.

That’s why we develop ergonomic solutions for every contact point on the bike: hands, pelvis, and feet. Whether on the road, trail, or during daily commutes –our goal remains the same: maximum performance, noticeable comfort, and lasting prevention.

At the heart of it all is our intelligent sizing system. By precisely measuring the three key contact points and tailoring product concepts to individual needs, cyclists find exactly what fits –helping them boost their performance and avoid discomfort or injury.

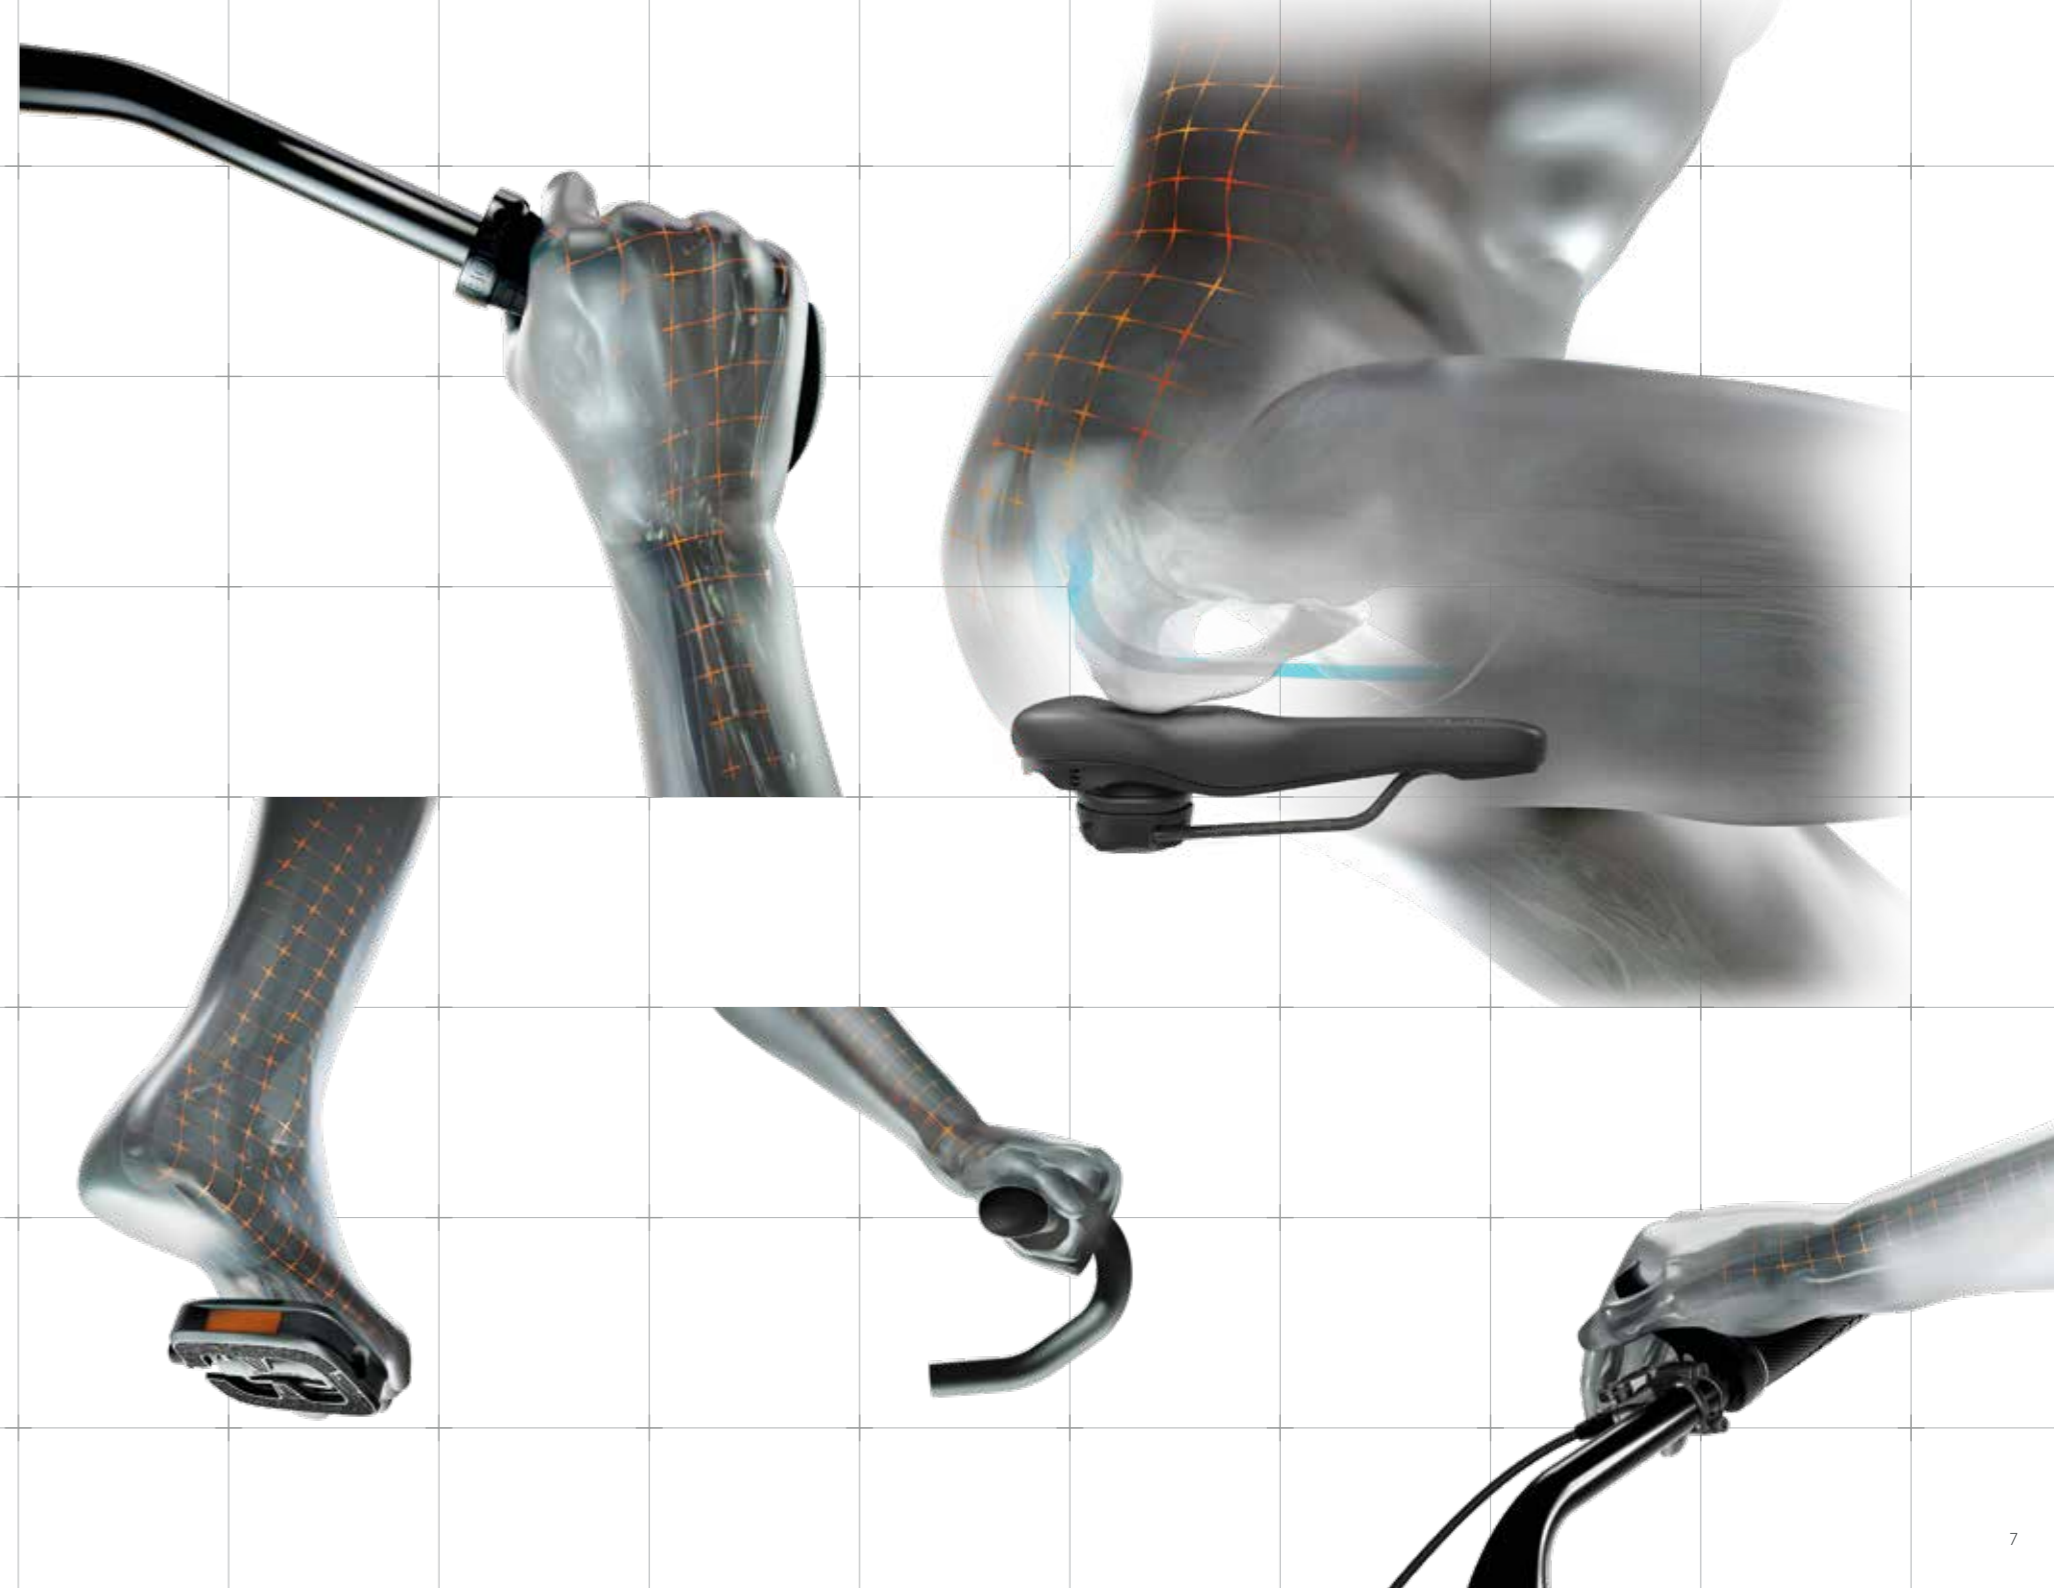

To ensure this ergonomic approach is reflected not only in our products but also in the customer experience, we regularly and thoroughly train our dealer network. This way, our customers benefit from expert advice and dedicated support –right where they need it most.

This is the Difference.

60X

## Saddle 60X Ergowave active 2.2

Just in time for the start of the season, SQlab has launched an optimized version of the popular 60X saddle –developed for use on E-MTBs, in enduro, and all-mountain riding. The new generation impresses with a shorter saddle nose for increased freedom of movement while maintaining proven ergonomics and high comfort.

Based on community feedback, the 60X 2.2 has been further developed specifically for technical trails and demanding terrain. The tried-and-tested step saddle concept ensures targeted pressure distribution and supports an efficient riding position. Non-slip grip material at the rear provides extra support on steep climbs, while the integrated active technology supports natural pelvic movement –for greater dynamics and efficiency on the trail.

The 60X 2.2 combines comfort, control, and performance at the highest level –ideal for anyone who doesn't want to compromise off-road.

### All Mountain & Enduro

## ION Limited Edition

When technical precision meets progressive style, something truly special is created: the exclusive special edition by S QLlab and ION combines the strengths of both brands into a bold statement of shared ambition, team spirit, and passion for cycling.

S QLlab stands for maximum ergonomics, sports medicine expertise, and top-tier performance. ION brings style, function, and a clear attitude to the trail. This partnership has given rise to two special editions that embody exactly that –uncompromising function paired with striking design.

The spotlight is on two products:

The S QLlab 611 Infinergy® ERGOWAVE® active 2.1 ltd. ION ClipOn ensures well-thought-out pressure distribution, active support with every pedal stroke, and optimal comfort on long, demanding rides.

The 70X 2.0 Pro grips offer secure hold, excellent damping, and an ergonomic shape for high-performance use.

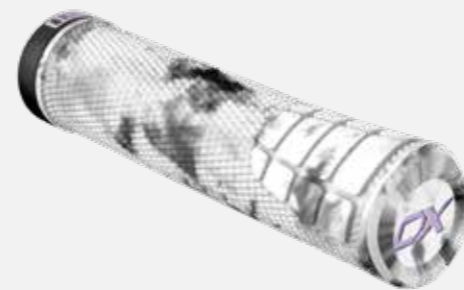

The design –bold black and white with purple highlights –represents the fusion of two worlds and a shared vision: taking cycling to the next level.

A strong team. Two strong brands. One edition.

## Mike Metzger 25 Limited Edition

It's loud. It's bold. And it's absolutely one of a kind: the new limited edition of the SQlab 60X ERGO-WAVE® active 2.2 –designed by Mike Metzger, freestyle motocross legend. This saddle carries Mike's unmistakable signature: an intense green eye design replaces the iconic spark plugs –a symbol of his untamed creativity and fearless individuality.

The perfect match: the new 70X 2.0 Pro grips in vibrant toxic green. Just as eye-catching as they are functional, they deliver top-tier grip and precise control even when the trail gets rough. Ergonomically refined, they give you total control –for uncompromising line choices and maximum riding fun.

This edition is a statement for anyone who forges their own path. For free spirits, thrill-seekers, and those who are tired of blending in.

The mix of provocative design and proven SQlab ergonomics makes this setup a true eye-catcher – and a real weapon on the trail.

SQlab x Mike Metzger –this isn't just a collaboration, it's a way of life.

## SQ Shorts ONE14

The SQ-Shorts ONE14 are purpose-built for gravel riding, combining high comfort, smart functionality and sustainable materials. At their core is the updated SQ-Pad 14 2.0, featuring a thin, ergonomically shaped TPE layer that reduces shear forces, pressure and vibrations—minimizing friction and pressure points even on long rides.

The pad integrates seamlessly into the shorts for a smooth, body-hugging fit. Quick-drying, elastic straps ensure secure support without constriction, while subtle leg logos and integrated thigh pockets add a modern, functional touch.

## Handlebar Tape 714 Green & Brown

The SQlab 714 handlebar tape is specifically designed for gravel and adventure bikes, combining ergonomic function with a unique look. Whether in refined brown—perfectly coordinated with classic tanwall tires—or in vibrant green for a fresh, eye-catching setup: this handlebar tape brings not only color but also thoughtful technology to the cockpit.

The grippy diamond structure and a special non-slip rubber compound ensure optimal hold in any weather—providing full control, even on challenging off-road trails. An integrated damping layer on the underside absorbs fine vibrations and protects against early muscle fatigue—delivering noticeable comfort on long rides.

With a length of 2500 mm, the tape provides enough material for personalized wrapping techniques—whether you prefer a sporty, direct feel or a more comfort-oriented setup.

### Gravel

Weight: 215g

## Saddle 614 Ergowave active 2.1 S'Qantara

Dusty trails, endless gravel roads and the soft hum of tires –gravel riding means freedom, vast horizons and adventure on two wheels. And this is exactly what it's made for: the 614 ERGOWAVE® active 2.1 –now finally available with the popular S'Qantara cover.

Perfect ergonomics for gravel bikes: The proven ERGOWAVE® shape, with its wave-like contour, ensures efficient pressure distribution –especially over long distances. The slightly raised rear section supports the sit bones and relieves pressure from the perineal area.

The active technology allows the saddle to follow the natural pedaling motion, which reduces strain on the spinal discs and helps to increase the efficiency. The highlight: the breathable S'Qantara foam. Not only does it offer a premium feel and distinctive look, but it also ensures a pleasant seating climate in changing conditions –cool in summer, dry on long rides. A material that perfectly combines comfort and control.

For those who go the extra mile. For those who seek comfort with character.

### Gravel

Rails: S-Tube

Article number: 57260-2069

# 612R

## Saddle 612R Ergowave 2.0 Carbon

The 612R 2.0 Carbon marks a milestone for SQRlab – developed for those who want to push their limits and get the most out of themselves and their gear.

The new generation of the 612R is engineered with a precise balance between longitudinal stiffness and lateral flexibility – thanks to the innovative Flex-Wing technology. It dynamically adapts to the pedaling motion while reliably relieving pressure from the sensitive perineal area.

Its short, performance-oriented shape combined with the pronounced dip reduces pressure in exactly the right spots and supports an optimal riding position – even in a deep aero tuck. The width of the dip increases proportionally with the saddle width, offering anatomically accurate relief for different body types – whether male or female.

Carbon rails and CFK base ensure extreme weight reduction without compromising stability. The result: a saddle that combines direct power transfer with long-distance comfort – perfect for anyone looking to put every watt to efficient use. Sharp, modern design meets technical precision.

This is more than just a new road saddle: It's a statement. For speed. For precision. For pure performance.

### Road Race

Rails: Carbon 7x9mm

Weight: from 125g

Relief of the perineal area: 60%

Sizes: 12, 13, 14, 15 cm

Price: 349,99 €

Article number: 57260-2033

## Handlebar Tape 712 Grey

The new SQlab 712 handlebar tape in elegant grey combines modern design with thoughtful functionality. Developed for performance-oriented riders, it delivers optimal grip, comfortable damping and a direct, precise steering feel—even on long rides or in changing weather conditions.

Its finely tuned material provides controlled cushioning without a spongy sensation, ensuring a direct connection to the bike. The lightly textured surface guarantees secure grip—whether you're wearing gloves or riding bare-handed.

The 712 tape pairs perfectly in color with the new 612R ERGOWAVE® 2.0 Carbon saddle. Together they form not only an ergonomic match but also a visually harmonious setup—for anyone who values a clean line and cohesive design.

### Road

## 612 Ergowave active 2.2

The SQlab 612 ERGOWAVE® active 2.2 is crafted with great expertise and attention to detail in Spain – designed for those who expect top-level performance and value sustainable, European quality.

Thanks to production close to our German headquarters, we benefit from short transport routes, high delivery reliability, and close collaboration with local partners. The result is a saddle that not only meets the highest standards but can also respond flexibly to market demands.

The proven ERGOWAVE® shape relieves pressure in the perineal area, positions the rider for powerful pedaling, and enhances efficiency on road bikes and MTB race bikes. The wave-shaped contour supports pelvic rotation, reduces pressure peaks and promotes blood circulation – even on long, intense rides.

The active technology with individually adjustable movement freedom enables a natural pelvic motion, protecting the lower back and spinal discs.

Every 612 ERGOWAVE® active 2.2 is manufactured according to strict quality standards – delivering maximum performance, comfort and a good feeling on every ride.

**SHAPED BY SCIENCE.  
CRAFTED FOR COMFORT**

+

## Grip 710 2.0

The SQualab 710 2.0 is part of our new grip series built around a unique ergonomic concept: three-dimensional sizing. Grip circumference, length and wing shape vary with each size, ensuring a precise fit tailored to your hand. This innovative approach creates a grip that feels custom-made –for more comfort, better control and fewer pressure points.

The 710 2.0 combines the relieving benefits of a wing grip with a slim, sporty shape that doesn't restrict your freedom of movement. It's ideal for everyday rides, long-distance tours and light trails –wherever performance and comfort matter in equal measure.

Even during dynamic riding, the grip stays direct, responsive, and secure. Thoughtfully designed details such as the Ergobar for a defined finger position, a lamella structure to absorb vibrations and the ergonomically angled wing to relieve pressure on the ulnar nerve all contribute to a ride free from discomfort and fatigue.

The 710 2.0 supports a relaxed, sporty riding position and is available in three sizes to match your hand perfectly –because true ergonomics can't be one-size-fits-all.

MTB / Trekking Sport

Weight: from 127 g

Material: Shock Absorption TPE Compound

Sizes: S, M, L

Price: 34,99 €

Article number: 57250-2101

## Grip 721 2.0

Cycling through the city streets in the morning, feeling the wind in your face and arriving with a good feeling –that’s exactly what the SQlab 721 2.0 was made for. Designed for everyone who uses their bike for everyday life –commuting to work, heading to the corner café or simply navigating the urban jungle.

The wide, ergonomically shaped support surface specifically relieves pressure on the ulnar nerve and provides a stable and pain-free grip, especially in an upright riding position. The raised outer edge offers a secure riding feel –particularly useful when frequently stopping and starting in city traffic. The Ergobar intuitively guides the hands into the correct position for a natural grip on the handlebar.

The three-size system (S/M/L) allows for a customized fit: grip circumference, length and wing shape are tailored to each hand size. Soft, flowing lamellae in the thumb area ensure effective damping –ideal for uneven surfaces in the urban environment.

The integrated chip design allows and easy installation of rearview mirrors –for improved visibility and safety in traffic.

Additionally, the grip is fully compatible with the Innerbarends 410 2.0 and 411 2.0, allowing occasional changes in hand position and muscle relaxation from shoulders to neck.

### City

Material: Durable TPE Compound

Sizes: S, M, L

Price: 39,99 €

Article number: 57250-2112

## Grip 702 2.0

The SQlab 702 2.0 grips are made for everyone exploring the world on a trekking bike – whether on long day tours or spontaneous escapes into nature. Thanks to a smart sizing system in S, M, and L, grip circumference, length, and wing shape are optimally adapted to different hand sizes.

The wide, ergonomically shaped contact surface specifically relieves pressure on the ulnar nerve, while the distinctive Ergobar promotes a natural hand position – for consistently comfortable grip even on extended rides.

The raised outer edge provides a feeling of stability and control, while soft lamellae with seamless transitions deliver noticeable damping –ideal for vibrations caused by rough terrain or cobblestones. At the same time, the base joint of the thumb is relieved.

Compatible with Innerbarends 410 2.0 and 411 2.0, these grips allow additional hand positions –boosting ergonomics on long journeys. A cleverly integrated chip design also allows an easy mounting of a mirror for added safety in traffic.

The 702 2.0 combines ergonomics, functionality and comfort –for relaxed hands and enjoyable miles.

### Trekking Comfort

Material: Durable TPE Compound

Sizes: S, M, L

Price: 39,99 €

Article number: 57250-2110

## Grip 711 2.1

The S QLab 711 2.1 is a performance grip and a true all-rounder. Developed for all-mountain and trail riders, it prioritizes control, feedback and ergonomics.

The focus is on providing targeted support for the hand in an active riding position: While the grippy block structure –inspired by motocross –ensures direct contact and precise handling, even in wet and muddy conditions.

The ergonomically shaped outer surface protects the ulnar nerve by increasing the contact area, reducing pressure points –even during harder impacts. The Ergobar on the underside promotes a natural finger position and enhances stability on technical sections. Combined with the three-size system (S/M/L), the grip adapts perfectly to hand size and riding style –ensuring optimal pressure distribution and fatigue-free riding.

Unlike traditional comfort grips, the 711 focuses on a sporty, direct contact point –for maximum control and sensitive steering behavior.

# 70X

## Grip 70X 2.0 Pro

Make your ride more colorful...

The SQlab 70X 2.0 Pro grip combines precise control, thoughtful ergonomics, and a healthy dose of style. Built for demanding MTB rides, its non-slip surface guarantees maximum grip security even in wet or sweaty conditions—whether you're grinding uphill or bombing through rough downhill sections.

The proven ergonomic pattern with targeted zoning delivers optimal pressure distribution and precise bike handling and promotes an intuitive hand position—for greater stability, control and less fatigue.

And because high performance doesn't have to come in black, the 70X 2.0 Pro is available in three eye-catching colors:

- **Orange:** Bold, vibrant and full of energy –perfect for riders who like to stand out.
- **Turquoise:** Fresh, lively and dynamic—for bringing good vibes to every trail.
- **Sand:** Natural, calm and adventurous—the ideal choice for those who love to lose themselves in nature.

**Function meets color:** With the 70X 2.0 Pro, you're not just showing off your riding skills—you're expressing your personality.

## SQ Pads 2.0

### Ergonomics Meets Performance

With the SQ-Pads 2.0, SQLab sets new standards in the field of ergonomic padding for cycling shorts. Developed from experience in saddle research and with a clear focus on the individual requirements of different riding styles, the SQ-Pad series offers an innovative solution for maximum comfort, targeted pressure relief and exceptional freedom of movement.

The second generation of SQ-Pads is based on the know-how of the current saddle generation and is precisely tailored to its ergonomic characteristics. The core of each pad (excl. 12) is made from a special orthopedic thermoplastic elastomer (TPE), which effectively absorbs shear forces—an essential advantage over traditional foam materials.

The result: less friction, fewer pressure peaks, more efficiency, and significantly improved comfort on the bike. Technically well thought out – for the highest demands. Instead of thick, spongy padding, SQLab focuses on flat, firm pads that harmoniously move with the body's movements. The pads seamlessly integrate into the SQ-Shorts without slipping or bulking up. Depending on the model, the thickness ranges from 4 to 8 mm:

- SQ-Pad 2.0 10—for ambitious riders who value a compact but efficient pad. 8 mm thick, universally applicable, firm and supportive.
- SQ-Pad 2.0 11—for long rides with additional cushioning. 6 mm thick, balanced in stability and flexibility.
- SQ-Pad 2.0 14—the new all-round solution: With a redesigned shape and even better adaptability. For sporty, comfortable rides across all distances.
- SQ-Pad 2.0 12—especially sporty and direct: 5 mm, very firm, with perfect body adaptation for intense rides.
- SQ-Pad 2.0 ONE12 R—the racing pad for active riding positions and maximum performance. Only 4 mm thick, but with high long-term comfort.

More than just padding – a holistic ergonomic concept. The SQ-Pads are not an isolated product but an integral part of SQLab's holistic ergonomic concept. The close connection between saddle, cycling shorts, and pad is unique in its coordination and offers a new dimension of comfort and function. Whether on long gravel adventures, fast road rides or sporty MTB tours –the SQ-Pads deliver performance where it matters: directly at the contact point between rider and bike.

**Product Update Notice:**  
All SQ-shorts will gradually be equipped with the new SQ-Pad 2.0. The transition period (Running Change) will begin in Q4 2025 and be completed by the end of Q1 2026. At the same time, the change to transparent, subtle logos at the leg cuffs will take place –for an even more harmonious design.

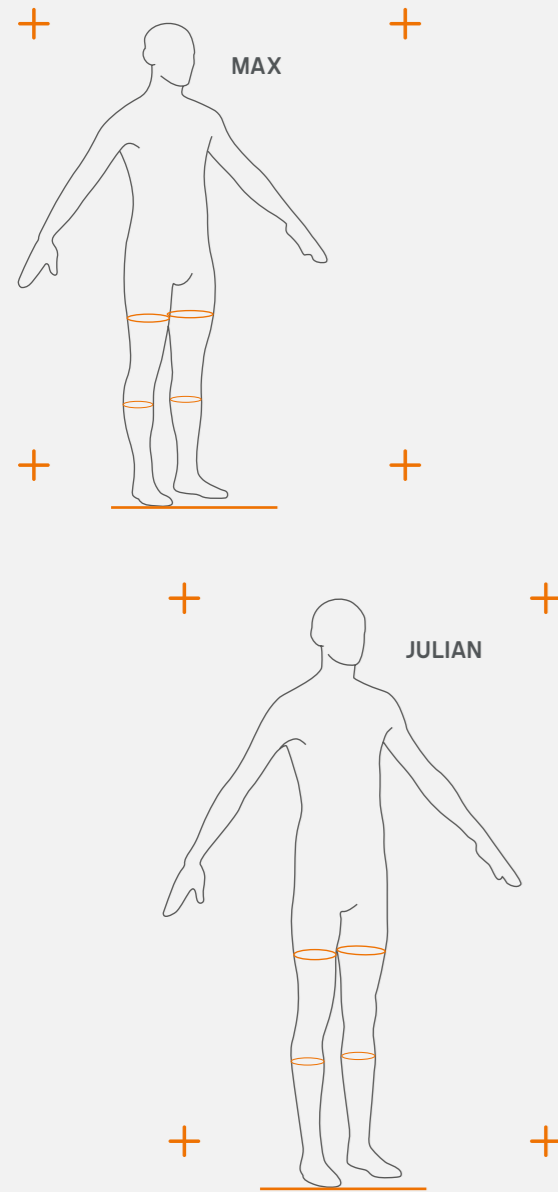

# ION PROTECTION

ION Protection – now even smarter through ergonomics expertise.

As one of the leading providers in the bike protection sector, ION has always stood for uncompromising protection, progressive designs, and maximum freedom of movement on the trail.

Through the merger with SQlab, the expert in bike ergonomics within the Boards & More group, two worlds come together: the proven ION Protection meets precise sizing, thoughtful fit, and ergonomic detail optimizations.

The result: protection solutions that not only perform reliably but also adapt even better to the body – for maximum safety, comfort, and a natural wearing feel.

## ADAPTIVE SIZING – perfect fit, maximum performance

Traditional clothing sizes are often insufficient to optimally fit protectors to different body shapes. This is exactly where the Adaptive Sizing model from ION x SQlab comes in: based on ergonomic insights, a new sizing system has been developed that goes beyond standard sizes and for the first time takes body proportions into account.

The starting point: Many customers initially orient themselves to their usual clothing size –for example, “both M.” However, for the fit of knee or shin protectors, the thigh or calf circumference is particularly important. A protector that is too long or too short can significantly impair the fit, protective effect, and comfort.

The solution: Each clothing size from S to XL will now be available in two length variants: Tall and Short. The size selection takes place in two steps:

1. Determining the circumference (e.g. thigh for knee protectors)
  - »» defines the basic size (S-XL)
2. Considering the body height
  - »» selection of Tall or Short

Practical example: Julian wears size M, is tall and therefore uses M Tall. Max also wears size M, but is shorter and uses M Short.

The new Adaptive Sizing ensures a more precise fit and optimizes both comfort and protection –fully in line with the shared mission of ION and SQlab: to unite technology and ergonomics to elevate the riding experience to a new level.

## ION K-PACT/K-PACT ZIP

ION K-Pact –Protection that fits – The updated ION K-Pact sets new standards with a 25% larger protection surface and a Level 2-certified ARCON protector, delivering uncompromising safety in rough conditions. Additional side and upper pads enhance protection without limiting freedom of movement.

The new spacer mesh ensures optimal breathability and stretch –comparable to neoprene, but more sustainable. A durable front panel with hot-melt reinforcement, wide Velcro™ Strap for a secure fit and the bellow-back design for reduced irritation behind the knee provide maximum comfort.

Thanks to Adaptive Sizing by SQlab, the K-Pact is available in two lengths per size –for a more precise ergonomic fit based on thigh circumference. Bottom line: The enhanced ION K-Pact combines top-level protection, comfort and eco-conscious design –ready for every trail.

## ION E-PACT

The ION E-Pact is your go-to elbow protector when uncompromising Level 2 safety, ergonomic precision, and trail-ready performance come together. Developed in collaboration with SQlab. Crafted from ReZro, an energy-absorbing, biodegradable and recyclable material, this pad delivers serious impact protection –while staying light, flexible, and breathable.

The 120° pre-shaped design ensures a perfect anatomical fit with fewer folds and greater freedom of movement. Whether you’re charging downhill or hitting technical freeride lines, the E-Pact stays securely in place, so you can stay focused on the ride.

The innovative spacer mesh offers next-level ventilation and comfort, while the abrasion-resistant front panel with hot-melt reinforcement stands up to the roughest conditions.

Thanks to the SQlab Adaptive Sizing, the E-Pact adapts to your body and your riding style. This is protection that doesn’t get in the way, so you can ride harder, longer, and with full confidence.

## ION ARCON CORE KNEE

For those taking their first serious steps into trail riding, the ION Arcon Core Knee offers the perfect introduction to knee protection.

This ultra-thin, Level 1-certified pad delivers outstanding flexibility, breathability and low weight –ensuring full freedom of movement on the bike. The bio-degradable and recyclable padding combines sustainability with high-performance protection. A durable, abrasion-resistant front panel shields against impacts and scrapes, while the stretchable sleeve construction ensures a secure and comfortable fit –even on longer rides.

Its short, compact design easily integrates with other protective gear and thanks to the new SQlab sizing concept, offers an optimized fit for every rider.

The Arcon Core Knee –lightweight, reliable protection that lets you ride with confidence and focus on the trail ahead.

## ION ARCON CORE ELBOW

The Arcon Core Elbow Protector is the ideal entry-level choice for riders seeking reliable protection without compromising comfort or mobility.

Designed to perform on any trail, it combines smart material selection with a construction focused on fit and function.

At its core lies an ultra-thin, Level 1-certified pad that is both lightweight and highly flexible –allowing for natural movement while still offering essential impact protection. The padding is made from biodegradable and recyclable materials, aligning performance with environmental responsibility.

A durable, abrasion-resistant front fabric ensures long-term resilience against contact and wear, while the stretchable, breathable sleeve construction guarantees a snug and secure fit throughout your ride.

The compact, low-profile design minimizes bulk and allows seamless integration with your gear.

 **E-Bike ready**  
E-Bike ready products are suitable for E-Bike use.

The E-Bike and E-MTB allow longer and steeper routes. You usually sit longer in the saddle. In addition, the E-Bike is significantly more stable due to the higher weight and the heavier wheels. SQlab saddles are generally characterized by the step saddle shape, which offers more grip in addition to improved pressure distribution. This is a big advantage for E-Bikes. The usually tighter padding is very well suited for a longer „saddle time“. In particular, the active function compensates for the high driving stability and brings back the comfort. The MTB saddles have a sturdy cover on the sides, as the usually heavier E-MTBs in a fall otherwise damage the saddle quickly.

	<b>E-Bike ready</b> E-Bike ready products are suitable for E-Bike use.
The E-Bike and E-MTB allow longer and steeper routes. You usually sit longer in the saddle. In addition, the E-Bike is significantly more stable due to the higher weight and the heavier wheels. SQlab saddles are generally characterized by the	step saddle shape, which offers more grip in addition to improved pressure distribution. This is a big advantage for E-Bikes. The usually tighter padding is very well suited for a longer „saddle time“. In particular, the active func-
	tion compensates for the high driving stability and brings back the comfort. The MTB saddles have a sturdy cover on the sides, as the usually heavier E-MTBs in a fall otherwise damage the saddle quickly.

We reserve the right to make technical, price and color changes. Prices incl. statutory VAT. Print errors and mistakes excepted.
