ROME

Winter 26/27

ALL WAYS DOWN

Welcome to the 26/27 Rome Snowboards Collection. A physical manifestation of our shared passion and unrelenting desire to create the best damn snowboard gear on the planet. From frozen street spots to untouched pow fields, we are All Ways Down. Thanks for riding with us.

Introducing the **all-new Viper Family**; these venomously versatile Directional Twins are an elite brood of all-mountain ATVs. Each model features our Directional Diamond 3D in the nose for all-mountain agility and Fusion Camber for predictable response. The **Vipers** also feature the unique power of Directional Double Kick in the tail; this unlocks a boost of stability for deep landings and adds torsional rigidity for 4WD confidence in variable conditions and at high speeds.

Our goal with the **Viper Family** was creating a dependable and playful, yet robust, all-mountain one board quiver. We wanted something to whip on a banked slalom course, cruise a sleeper pow day, or just crank a groomer morning to 11. Calm and collected on-piste but coiled and ready to strike when a storm rolls through, the **Viper Family** is a den of cold-blooded all-mountain thrillers.

The Viper family consists of the **Viper Pro**, **Men's Viper** and **Women's Viper**.

Introducing the
Viper Family

NEW

Viper Pro **Men's Viper** **Women's Viper**

Introducing the **Volt FASE® Family** of bindings; a new freestyle energy on the Fast Entry binding spectrum. The **Volt FASE®** are built on our all-new MonoFrame Chassis, a one-piece injected nylon chassis built for a uniform, smooth flexing, ride-it-all feel.

These mellow flexing bindings feature the new FASE® Kink Ladders, three toe strap positions, two forward lean positions, a six-degree pre-rotated highback and our universal mounting disc to maximize adjustment options and accommodate a wider range of boot sizes.

Both the **Men's** and **Women's Volt FASE®** come super-charged with our best-in-the-game OmniFlex ankle straps and ProGrip toe straps. Built for riders who want a smooth feel and predictable, press-friendly flex of a one piece injected frame binding, on the game changing FASE® Fast Entry system advantage, the **Volt** bindings keep the vibes high all season.

Introducing the all-new

Rene Collection

NEW

Rene Pro

Rene

Rene Rinnegangas is a true one-of-a-kind snowboarder. His otherworldly power and control are seemingly only outmatched by his own creativity and contagious energy. With a timeless style and trick selection, Rene's creative process is a wonder unto itself.

When we first set out to make a pro model with Rene, we couldn't begin to guess what the board would become; we only knew that it would have supernatural powers. **New for the 26/27 Collection**, we are proud to release the **Rene** and **Rene Pro** board models, designed so everyone can ride like Rene.

The **Rene Pro** is a high-octane cambered directional twin with our most burly Carbon Omega HotRods, Flax Impact Plates and Twin Flax sidewall reinforcement. The **Rene Pro** is Rene's weapon of choice for sending massive cheese wedges and must make street gaps.

The **Rene** is our offering for when Rene is laid back cruising the Ruka park or wanting a more pressable board for a backyard session. Built with the more forgiving Fusion Camber and the mellow pop of Bamboo Omega HotRods, the **Rene** lets us mortals tap into the vibe even if we can't ride like the Finnish destroyer himself.
