

**WHAT'S NEW**

# Duotone 2026

True Kiteboarding

**Dear Kitesurf Community,**

**Welcome to the Duotone What's New brochure for 2026! Inside these pages, you'll discover our latest innovations across kites, boards, bars, apparel, and accessories—each developed with passion, precision, and a deep love for the sport. But before you dive in, I'd like to share a few reflections on where kitesurfing stands today - and where it's headed.**

Till Eberle, CEO Boards & More Group

Over the past two decades, we've witnessed numerous trends that have shaped the sport. It all began with Hooked Freestyle – spectacular high jumps with board-offs and impressive rotations. Followed by a Wakestyle era, where unhooked tricks and low-flying kites were in the spotlight. Parallel to this, Waveriding combined with Strapless Freestyle has evolved, and currently, we are experiencing a real hype around Big Air.

I personally view this development as enriching, because nothing fascinates more in kiting than jumping high. The spectacular shows delivered by pros like Andrea Principi often take my breath away. Every time I observe the courage and passion of these athletes as they push their limits, I get goosebumps – their creativity and technique inspire us all.

Influencers and testers who evaluate which kite performs the fastest rotations or is best for double kitemanoeuvres contribute to the marketing of these trends. Some smaller brands follow trends by producing highly specialized products. What surprises me is the interest in these trends, even though you rarely see kites at the beach who can actually perform a single kitemanoeuvre – let alone a double or triple. This leads me to conclude that most of our customers would be better served with equipment that performs excellently in light to moderate winds, covers a wide wind range, and is easy to jump with, delivering the most fun for everyone.

For 2026, I truly believe we've achieved something special. Whether you're chasing the next trick or just chasing the wind, these new products are designed to elevate your kiteboarding experience.

**Trends will come and go, but in the end, it's all about having the most fun on the water.**

Best regards,  
Till

**WHAT'S NEW 2026**

# The Experience and Know How of the Duotone R&D Team

**At Duotone, we place immense value on the composition of our team and its members to meet our high standards. It is crucial to emphasize that at Duotone, the team is at the forefront, and all other aspects are subordinate to the goal of innovation.**

To achieve our desired performance standards, it is essential to bring together the right individuals with the appropriate skills for each task. This not only involves technical expertise but also the importance of personality and teamwork.

## The Team

The Duotone R&D team currently consists of four product managers, four product developers, two material developers, four designers, and two trainees.

## Duotone Laboratory

What additionally sets us apart is our dedicated material development lab, which is progressively being expanded to material development, facilitate long-term testing, UV tests, abrasion tests and much more.

## Skill Set

The diverse skill sets of our team members cover key areas including product design, product development, mechanical engineering, fluid dynamics, aerodynamics, and electrical engineering. Recently, we have also incorporated competencies in fundamental research and materials development, supported by the own laboratory. This expertise is complemented by many years of experience in product development.

## Commitment

For Duotone, it is essential that every cog in the machine works seamlessly together, ensuring that the Duotone mechanism operates with the precision of a Swiss watch, thereby guaranteeing innovation and creativity.

## The Promise

As the innovation leader in the industry, Duotone is committed to pushing the boundaries of watersports equipment through a united team effort, no matter the discipline, resulting in countless innovations and patents that elevate the sport, season after season.

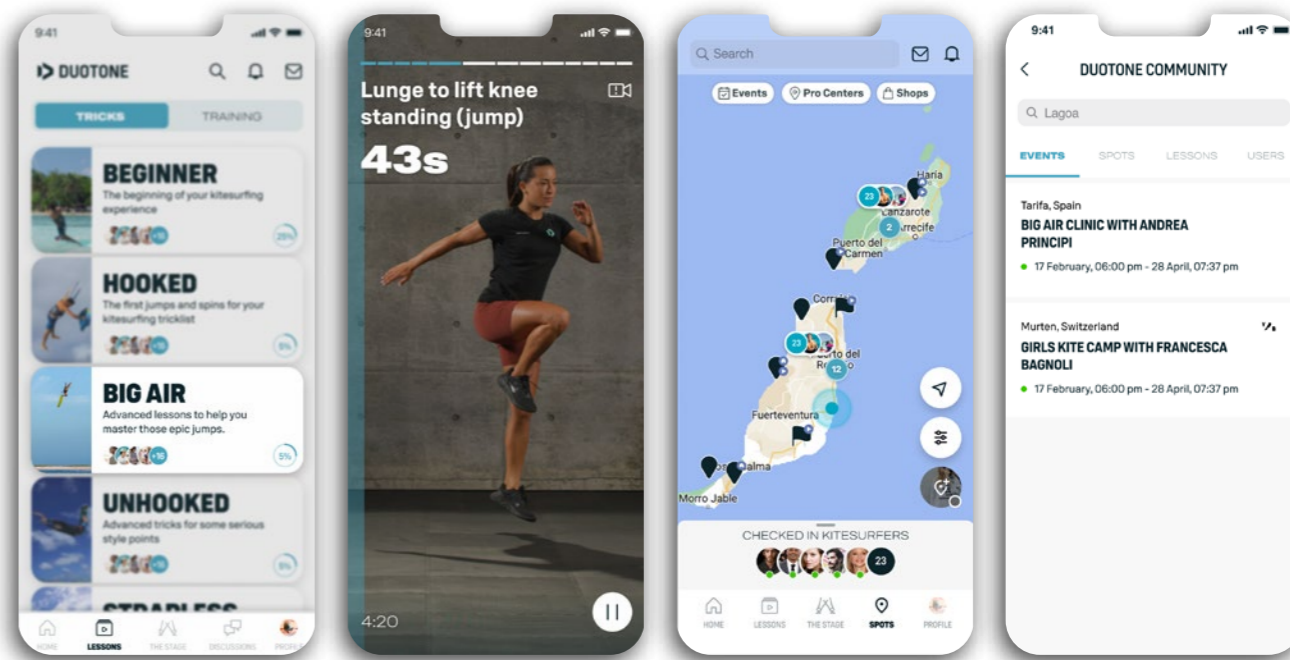

# The Duotone Academy Your Gateway to Kiteboarding Excellence!

We are thrilled to highlight the Duotone Academy, the revolutionary app designed specifically for kiteboarders eager to progress and connect with like-minded watersports enthusiasts. A true success story for Duotone, our Academy now features an exciting Big Air section, set to elevate your kiteboarding journey!

Coming soon is the Big Air Academy featuring tons of new big air tricks that cater to all skill levels, from first downloops to massive mega loops with tricks. From essential preparations and safety tips to advanced competition tricks, we ensure you have access to the knowledge you need to soar. Our content is filmed with the world's best Big Air riders, including Andrea Principi, Edgar Ulrich, and Liam Whaley, offering you invaluable insights straight from the pros.

Looking to up your game? Participate in our Big Air Camps and Events, also listed within the app, where you can learn directly from experts and connect with fellow kiteboarders. Enhance your skills with our Big Air Workouts, tailored to help you reach new heights and stay fit and healthy.

A new section for advanced Big Air tricks is coming soon.

New Big Air workouts to prepare your body for the tricks.

It's never been easier to find Big Air events and clinics nearby.

Stay connected and track your progress: We are continuously working behind the scenes to bring you a revamped Academy app with additional features, improved media players, AI integrations, and vibrant communities at your local spots. You'll be able to track your Big Air development accurately using WOO to measure jump heights and even compete against other riders.

Safety First: As you push your limits, remember that Big Air is an extreme sport that can lead to serious injuries. Always ride with a buddy and never venture out alone. Utilize our spot features to find other kites in your area and set up sessions together and double the fun.

Dive into the Duotone Academy and elevate your kiteboarding experience. Whether you're just starting out or aiming for competition-level tricks, we are here to support your journey every step of the way!

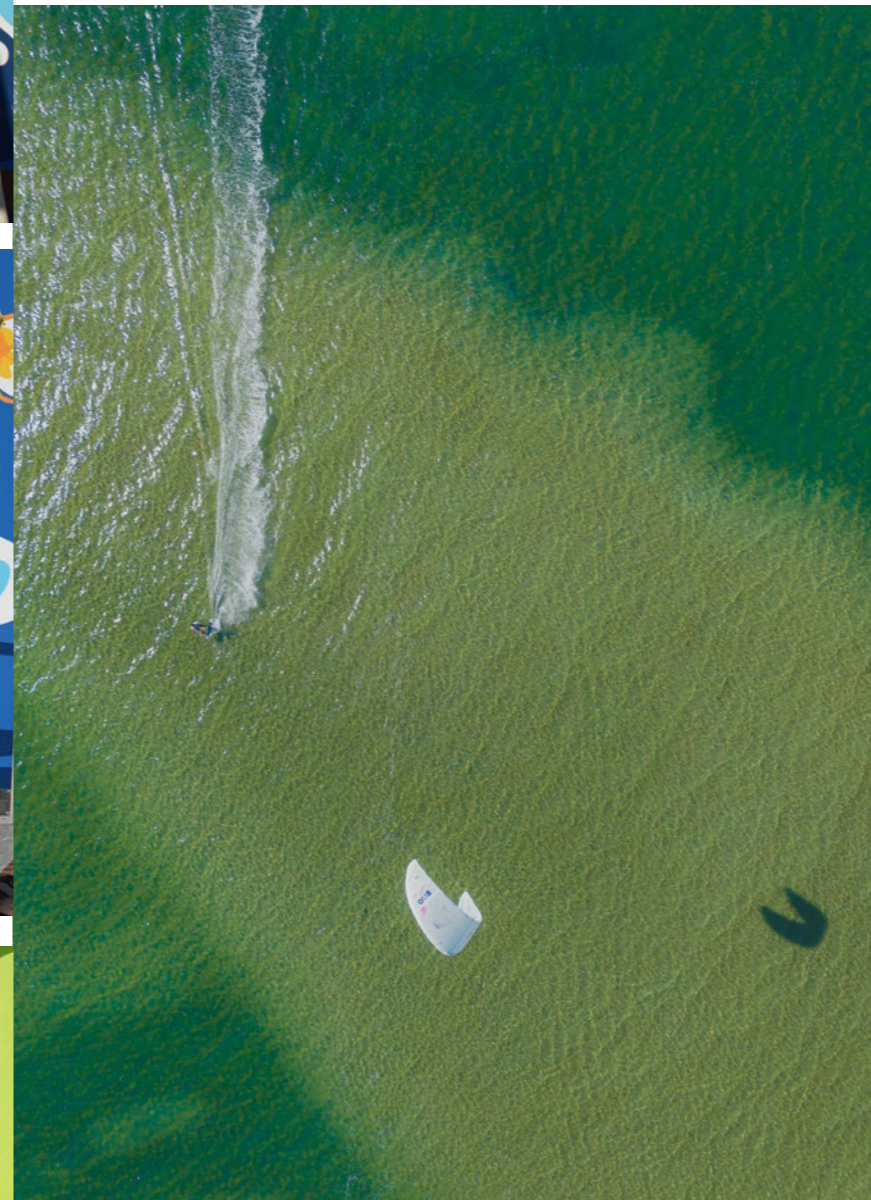

# Viva con Agua Partnership

Duotone Kiteboarding is thrilled to announce an inspiring partnership with Viva con Agua, a non-profit organization dedicated to promoting clean drinking water worldwide. At Duotone, we are acutely aware of our environmental impact and continuously seek sustainable solutions that align with our values, the Concept Blue range is great proof of that. This collaboration with Viva con Agua is a natural fit, allowing us to engage in meaningful initiatives that create a positive social impact.

Our first action under this partnership will focus on providing access to fresh water showers for the homeless in Cape Town, South Africa, supporting the innovative Viva con Agua mobile showers initiative. This endeavor not only addresses immediate hygiene needs but also emphasizes the importance of dignity and well-being for all.

Viva con Agua embodies a mission that resonates with our commitment to sustainability and community support. By fostering water, sanitation, and hygiene (WASH) projects globally, they ensure that clean water reaches those who need it most. This partnership will harness the spirit of positive activism, promoting our shared vision—"WATER FOR ALL - ALL FOR WATER."

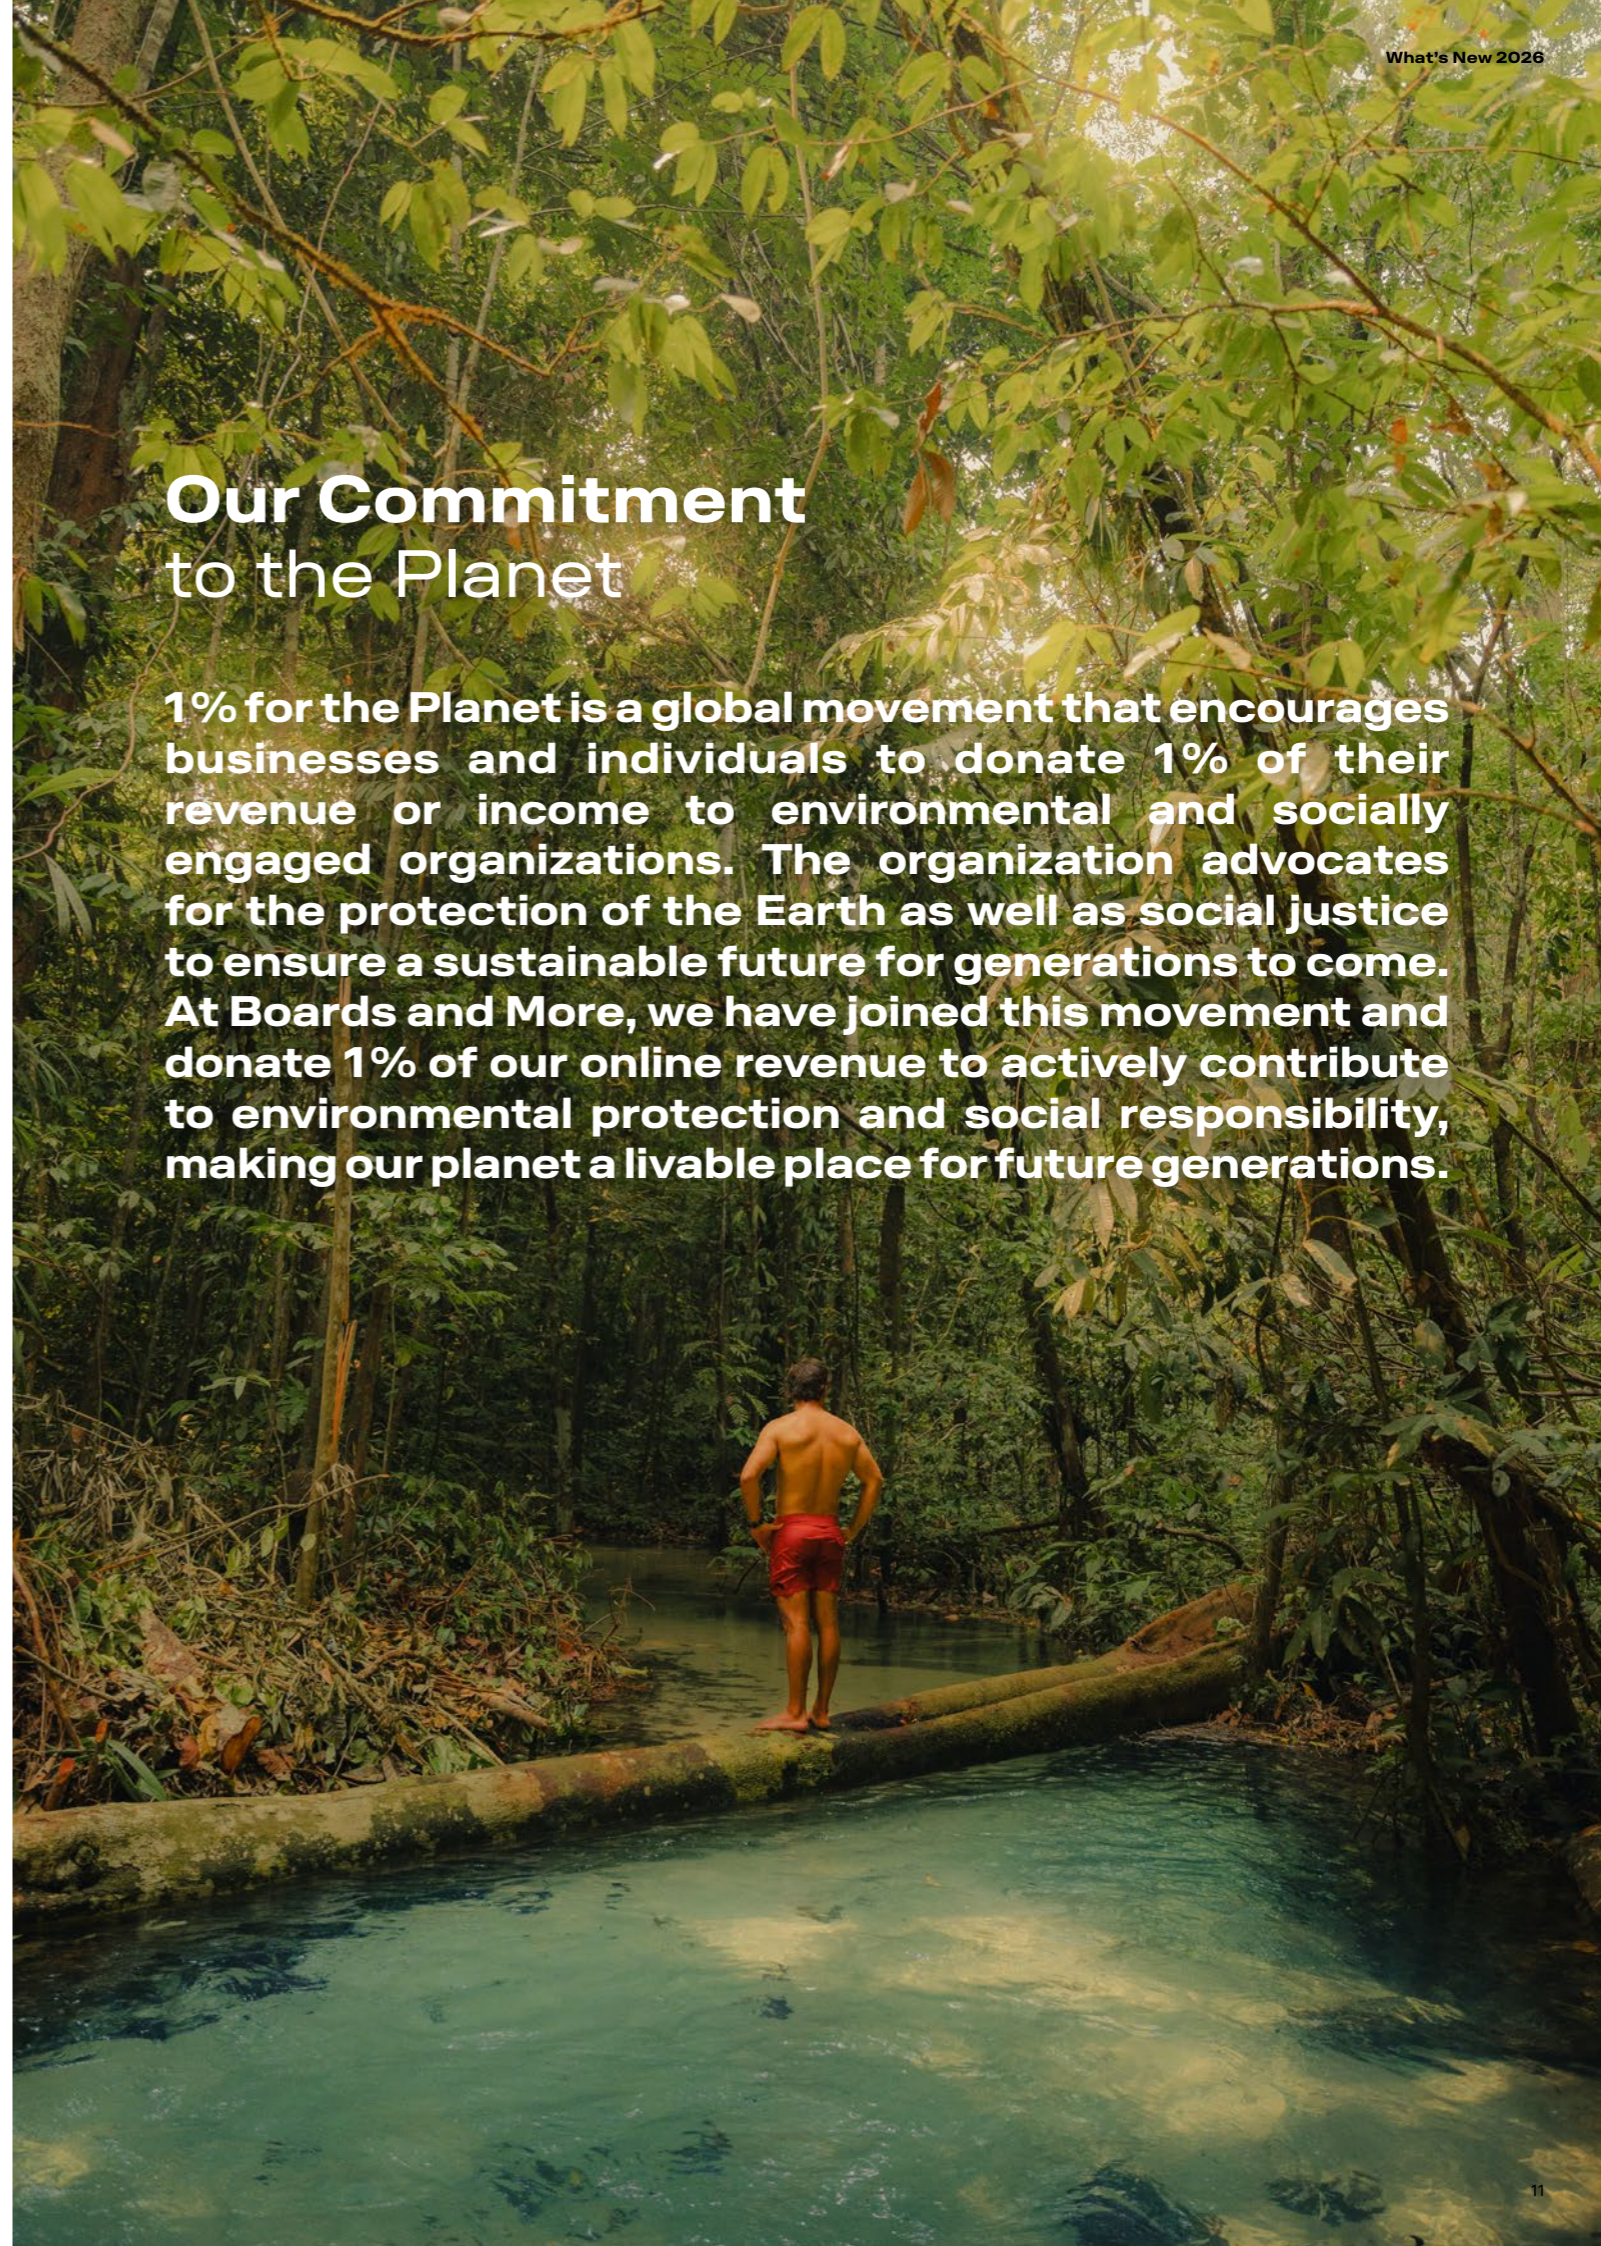

Together, we look forward to making a tangible difference in the lives of people while paving the way for a more sustainable future. Join us in this journey to create meaningful change, one wave at a time!

# 1% FOR THE PLANET

## Our Commitment to the Planet

1% for the Planet is a global movement that encourages businesses and individuals to donate 1% of their revenue or income to environmental and socially engaged organizations. The organization advocates for the protection of the Earth as well as social justice to ensure a sustainable future for generations to come. At Boards and More, we have joined this movement and donate 1% of our online revenue to actively contribute to environmental protection and social responsibility, making our planet a livable place for future generations.

# Duotone Pro Center

## Experience the World of Duotone

### Exciting Updates from Duotone Pro Centers!

At Duotone Pro Centers, we're committed to providing you with the best kitesurfing experience possible, backed by outstanding service, safety and the highest quality Duotone materials. All centers are located at some of the most stunning kitesurfing spots in the world, ready to cater to your adventurous spirit!

Here's an overview of the latest developments:

**DPC Dakhla:** This central project currently features three centers, with plans to expand to four. All centers are located in close proximity to each other, fostering cross-sport networking. Dakhla serves as a particularly strategic hub for kitesurfing enthusiasts from all over Europe. More and more direct flights from main European cities will follow.

**DPC Port Barcarès:** A significant location that holds high relevance for the Global Kitesports Association (GKA). With a strong focus on Big Air, Barcarès is a key player on the international kitesurf calendar, making it a must-visit spot.

**DPC Preá:** We are proud to announce our very first DPC on Brazilian soil! This expansion marks a significant entry into the Brazilian market and represents a vital step forward in our international growth strategy.

**DPC Adicora:** Currently in the onboarding process, this center enhances our global presence in a promising new region for kitesurfing, opening up exciting opportunities for riders.

**DPC Soma Bay, Egypt:** Poised to begin operations, we are just awaiting official approval from the Egyptian government. This center will introduce another high-quality kitesurfing spot on the Red Sea, with a focus on wing foiling.

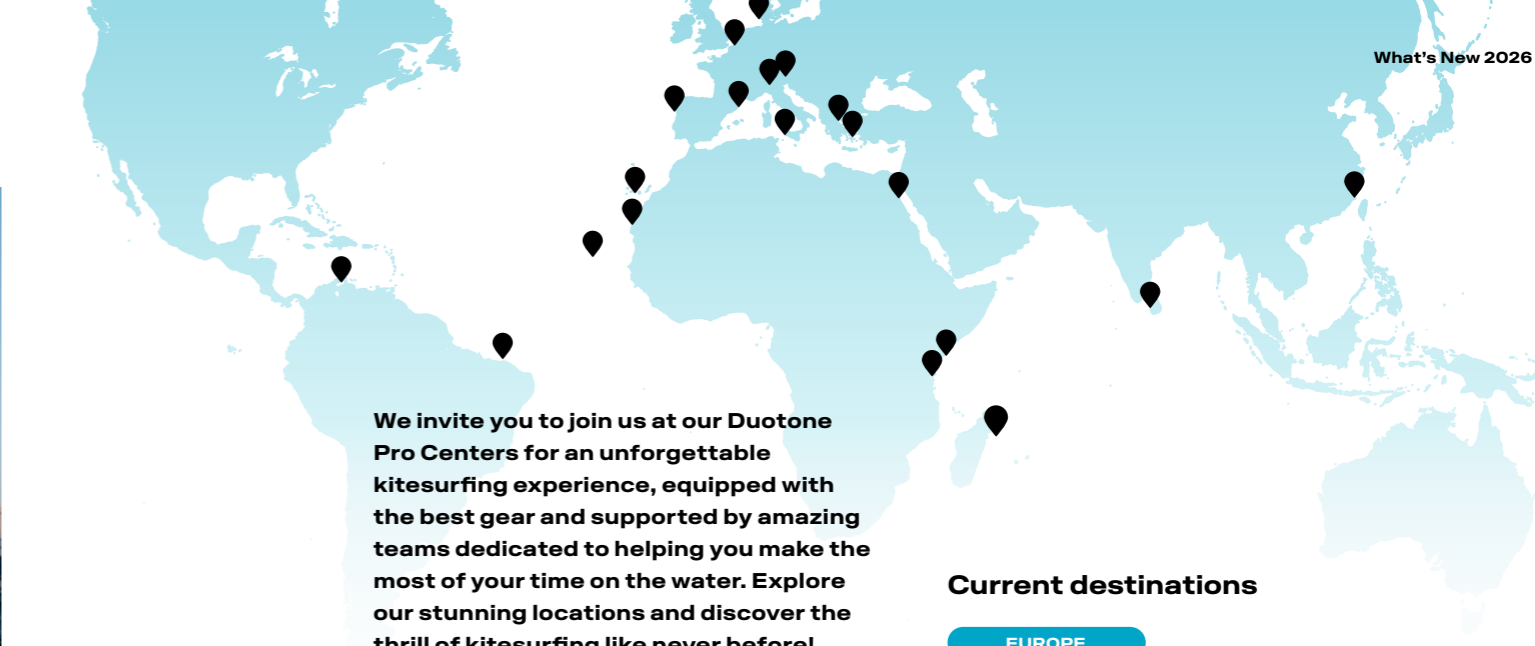

### Existing DPC Expansions:

**DPC Mykonos:** The adjacent Kite Mykonos Village will be officially integrated into the DPC, significantly enhancing the accommodation offerings available to our guests.

**DPC Limnos:** The station has acquired surrounding land, paving the way for a future transition from a mobile to a permanent infrastructure in the coming years.

For more information and the overview of all centers, please check out the webpage!

We invite you to join us at our Duotone Pro Centers for an unforgettable kitesurfing experience, equipped with the best gear and supported by amazing teams dedicated to helping you make the most of your time on the water. Explore our stunning locations and discover the thrill of kitesurfing like never before!

- + **DPC Soma Bay (Egypt)**

# DUOTONE WHAT'S NEW

# Duotone Kites 2026

True Kiteboarding

Over many years the Duotone R&D team together with experienced test riders and athletes have developed kites with new materials that fly in lighter winds, react faster, drift better and constantly enhance the overall performance. Our D/LAB and SLS constructions are the result of our relentless drive to create the absolute best-performing kites, and we are incredibly proud of these achievements.

**Concept Blue – A continuous process!**

Concept Blue is an established way of thinking and how to produce Duotone products. The more sustainable Concept Blue line is available with the Vegas, Neo, Evo, Evo SLS and Rebel SLS! This expansion opens up new possibilities for riders who seek the best performance alongside more sustainable manufacturing practices.

Concept Blue is Duotone's continued commitment to pushing the boundaries of kite technology while remaining mindful of environmental impact.

We are excited to offer even more

choices of kite models that align with both high performance and sustainability, paving the way for a greener future in kiteboarding.

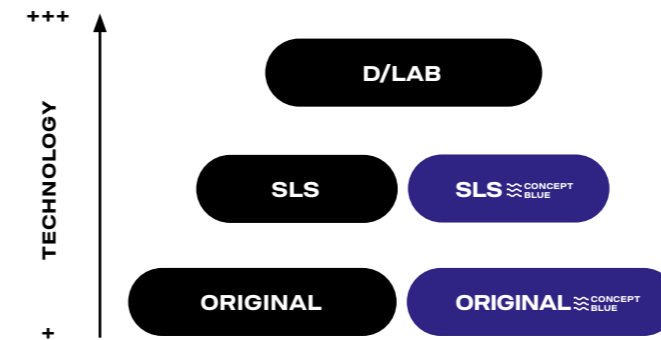

**Please be aware Concept Blue kites are offered as a color way in the order system!**

# Kite constructions SLS & D/LAB in combination with Concept Blue

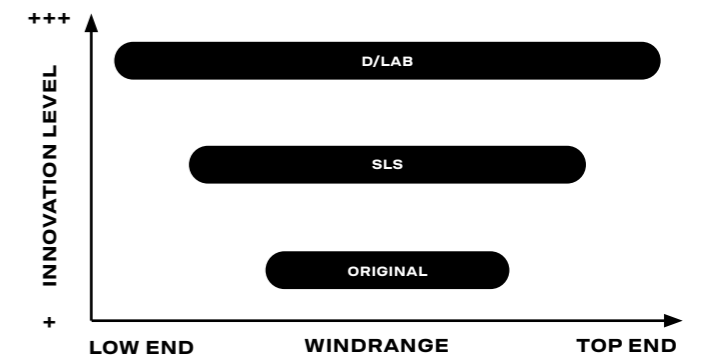

While D/LAB represents the absolute pinnacle of performance and technical feasibility, it is by no means essential to have maximum fun while kiting! The performance gains of a D/LAB kite are especially evident in medium to larger sizes, where reactivity and weight are substantial factors. However, the smaller sizes of the Neo and Evo, for example, offer incredible performance in strong winds, absorbing gusts and providing superior comfort due to the more forgiving flex properties of the inflated Dacron structure.

We use only the finest materials to ensure an amazing experience on the water for the intended user, and our kites set the standard within the industry, frequently winning in comparative tests with other brands and dominating the contest scene.

# Kite Construction highlights

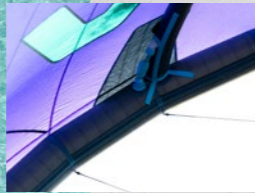

### Leading Edge Intersegment Seam Construction\*

The Leading Edge Intersegment Seam Construction increases the overall strength, stiffness, and direct flight stability of the airframe. Additionally, this is the lightest construction you can create for a kite.

### Micro Loop Connections

The new Micro Loop Connection is 40% smaller and part of the overall concept to reduce weight on the leading edge.

### Fusion Strut 2.0

The Fusion Strut 2.0 links the leading edge and struts with one single connection, delivering maximum stability, a precise and dynamic flying experience, and reliable performance even in tough conditions.

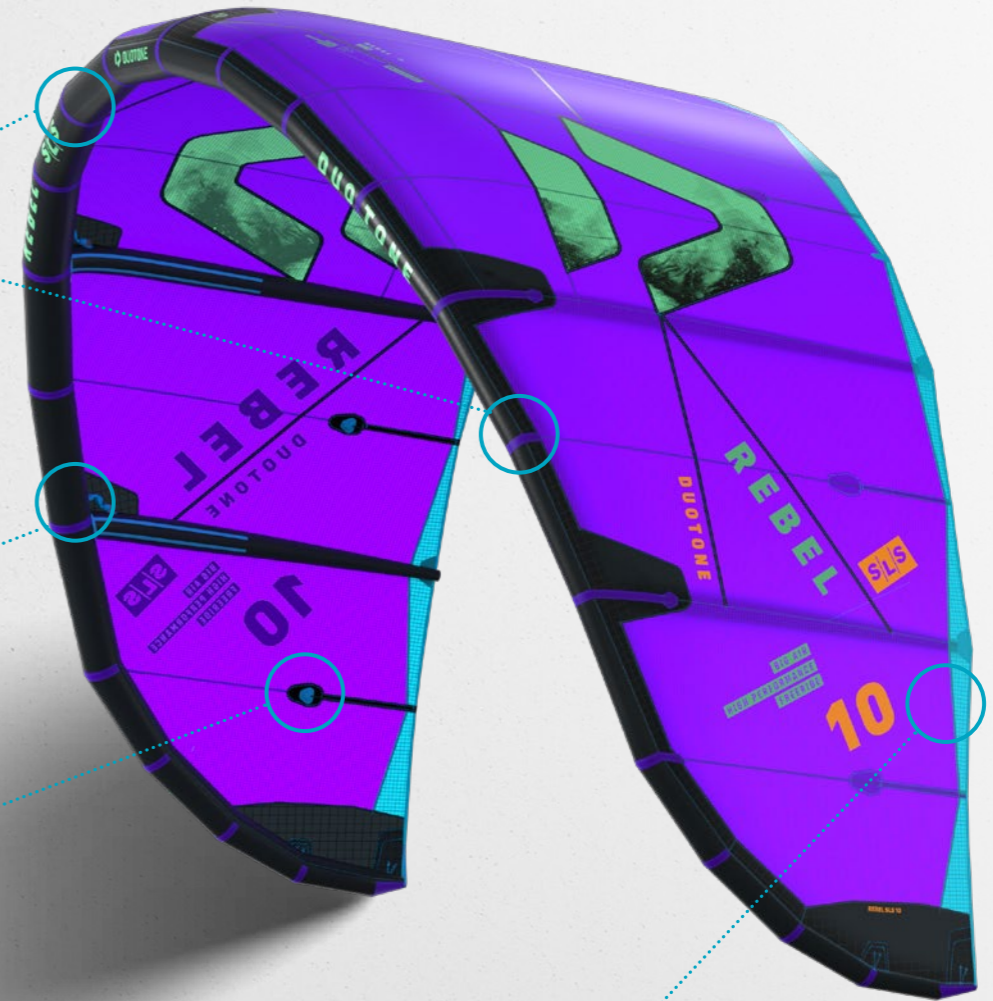

### Micro Batten Construction

The Micro Batten Construction is 40% lighter and part of the overall concept to reduce weight and provides a cleaner and sleeker look of the kite without compromising durability or performance.

### Single Stitch Trailing Edge

The Single Stitch Trailing Edge is a refined design feature that minimizes weight and reduces flutter, enhancing the kite's overall durability and performance. By streamlining the construction, we've achieved a cleaner, more aerodynamic profile that not only improves efficiency but also extends the kite's lifespan.

# Evo D/LAB

Freeride / Freestyle / Big Air

## What's New

- + Better upwind performance and more depower
- + More precise control and better riding feel
- + More agile response and a playful freeride feeling
- + Increased stability in strong winds
- + Optimized jumping and looping performance

EVO D/LAB C14

EVO D/LAB C15

Discover the ultimate high-performance multi-talent, the Evo D/LAB, a creation of unparalleled excellence straight from the Duotone Laboratory. Crafted with cutting-edge Aluula material, this kite exemplifies innovation and performance, standing as the kite of choice for World Champion Andrea Principi when tackling double and triple loops in 40 knots plus. Victorious in several big air competitions and the King of the Air, the Evo D/LAB is designed for ambitious riders who demand the absolute best.

The Evo D/LAB is the ultimate high-performance multi-talent, boasting unrivaled low-end power that ensures remarkable performance even in the lightest winds. Its incomparable top-end performance delivers unmatched control and stability, allowing riders to push the boundaries of what's possible with seamless precision. A completely new design sets the Evo D/LAB apart, featuring a 6-point bridle to

additionally stabilize the tip section. This ingenious design improves control and responsiveness, allowing riders to execute sharp, accurate movements with ease. The kite also incorporates a reduced leading edge diameter, optimizing profiles for higher jumps and enhanced ease of jumping. Experience floaty hangtime like never before. This kite ensures you stay in the air longer, adding grace and elegance to your tricks. Benefit from the kite's outstanding upwind capability, which makes returning to your starting point effortless and efficient, saving you time and energy. Enjoy a combination of massive power and complete depower in one kite, offering flexibility across a wide range of conditions. The Evo D/LAB should be inflated to 10 PSI, providing an exceptionally rigid frame that enhances performance and stability. This whole new Evo D/LAB sets itself apart with reduced flutter and minimal drag, resulting in quicker reaction times and smoother, more responsive turns and steering impulses. Preferred by World Champion Andrea Principi for tackling the most challenging aerial maneuvers, the Evo D/LAB is engineered to meet the demands of

weekend warriors to professional kiteboarders alike. If you're serious about big air and advanced tricks, this kite delivers an unparalleled combination of power, control, and stability.

Choose the Duotone Evo D/LAB for an unrivaled kiteboarding experience. With a completely new design, most modern materials, and features engineered for ultimate performance, this kite ensures you stay ahead of the competition. Whether you're chasing lofty hangtime or executing complex loops, the Evo D/LAB is your go-to kite for pushing the limits and making every session unforgettable. Adrenaline included.

### Key Features:

- The ultimate high-performance Multi-Talent
- Unrivaled low-end power
- Incredible top-end control and stability
- Effortless, floaty hangtime
- Superior upwind efficiency
- Massive power with absolute depower
- Biggest vertical boost in the Duotone range

## What's New

- + Better upwind performance & more depower
- + More precise control & improved riding feel
- + More agile response, faster turning, and easier relaunch
- + Superior low-end power for early planning
- + Responsive handling and dynamic performance due to Aluula D/TX material and optimized canopy frame

JUICE D/LAB C11

For years the benchmark in lightwind kites, the Juice D/LAB still is the ultimate low-end performer designed for riders who refuse to be limited by light wind conditions. Built with cutting-edge Aluula D/TX and Trinity TX materials, the Juice D/LAB delivers unmatched low-end power, making it possible to kite in the lightest of breezes and redefining early planing in the kiteboarding world.

This kite is engineered for those who want to maximize their time on the water, offering an ultra-light and reactive feel that enhances responsiveness and agility. The Juice D/LAB ensures exceptional upwind performance, allowing you to carve against the wind effortlessly, making it an ideal choice for twintips and foils.

One of the key advancements in the Juice D/LAB is its superior upwind performance and increased depower capability. The narrower leading edge reduces air resistance, enabling the kite to fly further forward in the wind window. This results in better upwind performance and

more effective depower, giving you the confidence to navigate even marginal conditions. For precise control and improved riding feel, the new 6-point bridle system helps maintain the kite's shape and stability, especially great during light wind sessions with stronger gusts, resulting in controllable overpowered situations. This design enhances your overall riding experience by ensuring that the kite responds predictively, allowing for smoother transitions. The Juice D/LAB is designed for more agile response, faster turning, and easier relaunch capabilities. The lower aspect ratio contributes to better handling, enabling quicker turns with reduced bar pressure, while also facilitating reliable water relaunches when needed. Experience superior low-end power like never before. The Juice D/LAB redefines early planning in light winds, ensuring that no matter what board you're on, you'll be the first to get up and ride, leaving your peers far behind.

Embrace the freedom to kite regardless of wind conditions with the Duotone Juice D/LAB, your partner for effortless low-wind adventures and limitless possibilities on the water!

# Rebel D/LAB

High Performance Freeride / Big Air

## What's New

- + More vertical takeoff with reduced lateral pull
- + Sharper and more direct bar feel
- + Faster and more reliable loop recovery
- + Lighter, more dynamic handling
- + Improved steering and responsiveness under load
- + Modernized big air performance with Rebel DNA

REBEL D/LAB C11

**Straight from the Duotone Laboratory: the Rebel D/LAB, the ultimate high performance freeride/big air machine engineered for those seeking an unparalleled experience in the skies. Crafted with high tech Aluula D/TX and Trinity TX materials, the Rebel D/LAB delivers effortless control, unmatched hangtime, and exceptional stability for the most challenging conditions.**

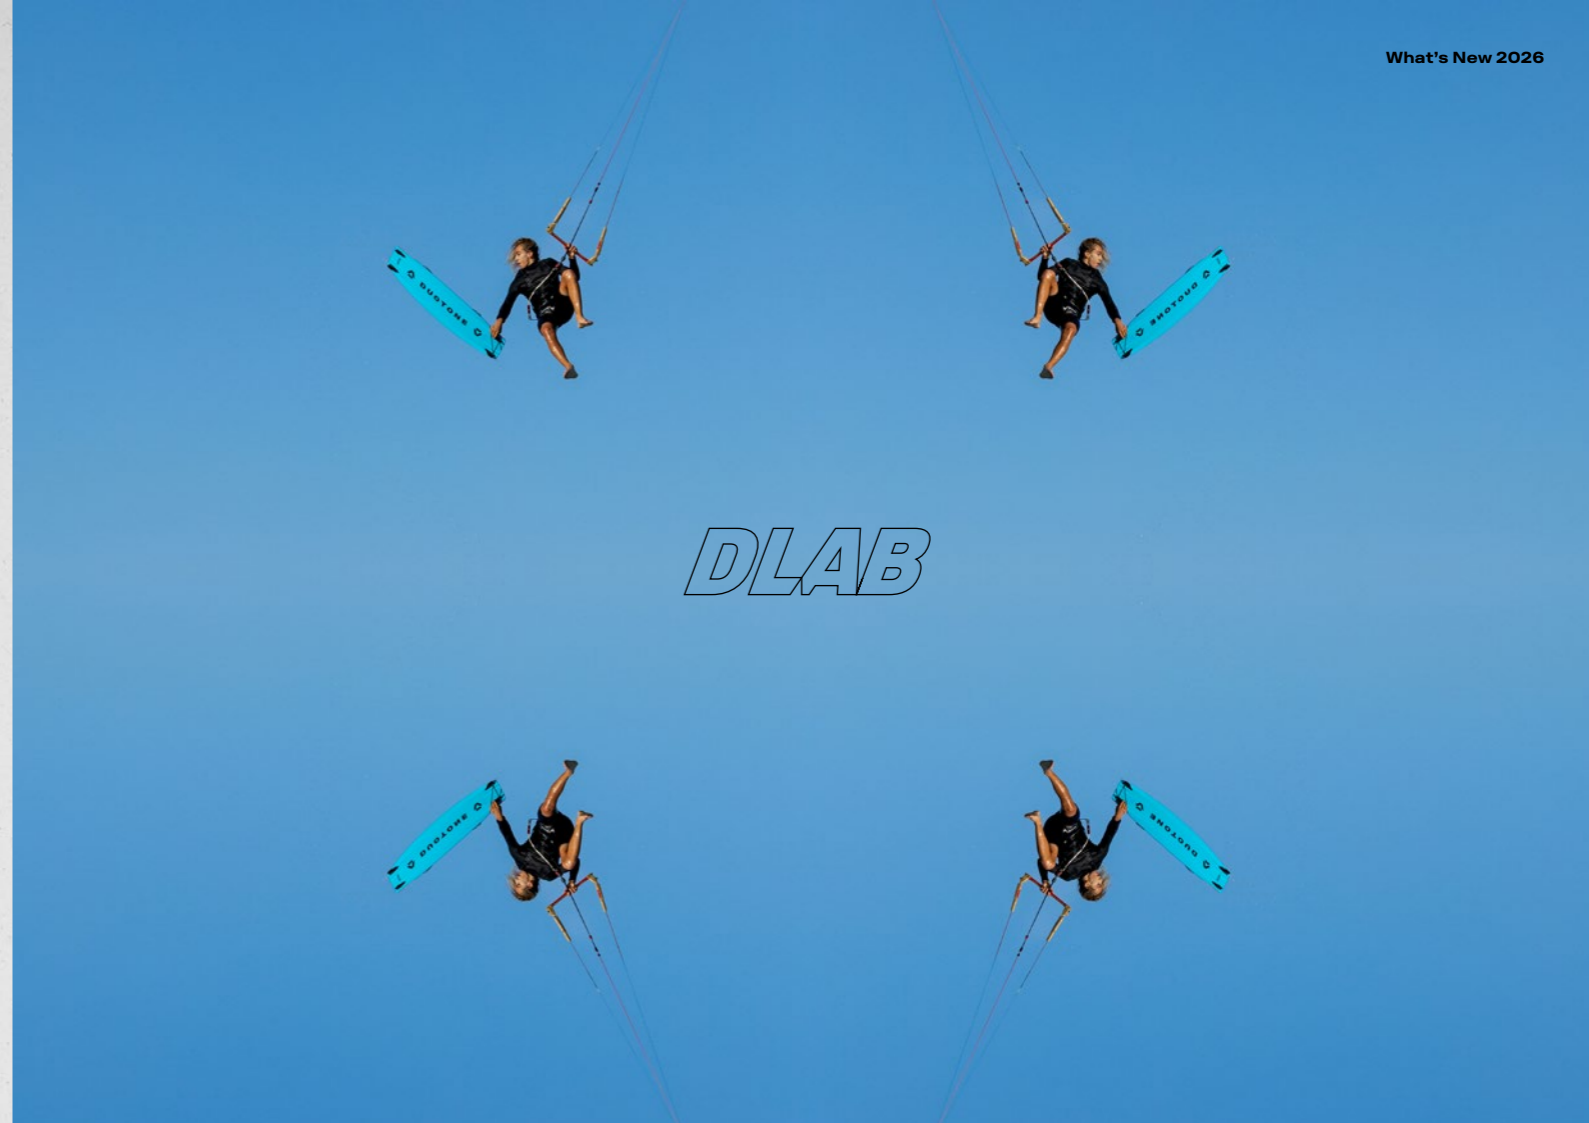

This kite is designed to provide an incredible big air experience, allowing riders to achieve prolonged airtime while maintaining stylish execution. With instant lift achievable with minimal input, the Rebel D/LAB empowers you to soar effortlessly. Experience the smoothest steering with the fastest depower, ensuring that you stay in control during every jump. One of the defining features of the Rebel D/LAB is its intuitive bar feedback, which offers total confidence as

you navigate the air. The kite's exceptional 5 strut stability keeps it reliably positioned, even in turbulent conditions, enabling you to tackle the most demanding wind scenarios with ease. The Rebel D/LAB achieves a more vertical takeoff with reduced lateral pull due to its shortened chord length and refined arc.

This combination creates a more aerodynamic shape that boosts upward propulsion while minimizing sideways drift during takeoff. A sharper and more direct bar feel is realized through the removal of pulleys in the bridle system, resulting in a crisper connection between the rider and the kite. This change significantly enhances precision and feedback, allowing for seamless maneuverability. Faster and more reliable loop recovery is another hallmark of the Rebel D/LAB. Refined arc and shape, paired with reduced bridle friction, enable the kite to climb back up quickly after loops, granting riders increased control and confidence during dynamic transitions. The incorporation of Aluula D/TX in the

leading edge and struts leads to lighter, more dynamic handling, making the kite more torsionally responsive and playful in the air. This enhancement contributes to improved steering and responsiveness, ensuring the kite maintains its shape in powered conditions, allowing for precise turning and control during high-performance maneuvers.

With modernized big air performance built on the legendary Rebel DNA, the Rebel D/LAB complements today's big air demands, making it ideal for hangtime, board-offs, and technical air tricks. Experience the pinnacle of performance and go beyond the imaginary with the Duotone Rebel D/LAB 2026.

| SIZES            | 6       | 7       | 8       | 9       | 10      | 11      | 12      | 13     |

# Rebel SLS

High Performance Freeride / Big Air

## What's New

- + Increased vertical lift without compromising hangtime
- + More direct feedback from the bar, improving control
- + Faster climbing to the edge of the wind window, especially during kite loops
- + Explosive vertical boost for greater dynamism
- + Enhanced agility and intuitiveness in high-performance riding scenarios

REBEL SLS C07

REBEL SLS C05

REBEL SLS C08

The legendary Duotone Rebel SLS, the ultimate high-performance kite designed for freeride and big air enthusiasts. Built with advanced Penta TX and Trinity TX materials, the Rebel SLS offers maximum hangtime and controlled power, setting the stage for powerful and stylish tricks on the water.

The Rebel SLS is engineered for those who crave huge hangtimes. With its remarkable ability to facilitate powerful jumps, this kite allows riders to perform their best tricks with confidence. Its "sheet and go" design makes for easy takeoffs, empowering you to launch into the sky with minimal effort. Experience powerful loops executed with full control, enabling you to navigate the air like never before. One of the standout features of the Rebel SLS is its direct bar feedback, which enhances precision and confidence during both ascent and descent.

This is complemented by explosive lift capabilities, giving riders vertical takeoffs and extended airtime that elevate the performance standard in the big air segment. Key improvements have been made to enhance vertical lift without compromising hangtime. By shortening the chord length, the Rebel SLS presents a sleeker, more aerodynamic profile that facilitates efficient upward propulsion during jumps. The removal of pulleys from the front bridle simplifies the kite's setup, leading to a more responsive feel on the bar. This adjustment not only improves direct feedback from the bar but also enhances the rider's ability to maintain precision control during dynamic maneuvers. With a decreased leading edge sweep angle, the kite can now climb faster to the edge of the wind window, particularly during kite loops. This optimization of airflow over the kite enables rapid ascents, making it easier for riders to execute quicker loops with explosive vertical boosts. The overall structural adjustments made to the Rebel

SLS significantly enhance vertical acceleration, allowing for more dynamic jumps and aerial maneuvers. Additionally, modifications to the bridle system enhance agility and intuitiveness in high-performance riding scenarios, ensuring that every steering input translates seamlessly into kite response. This results in a more intuitive flying experience, allowing riders to tackle complex tricks with increased confidence. The Duotone Rebel SLS is your ticket to the skies. With its combination of powerful lift, responsive handling, and advanced technology, this kite is designed for riders who demand the very best in performance and style. Elevate your kiteboarding experience and reach your full potential with the Rebel SLS 2026.

Powerful loops with full control

Direct bar feedback for precision and confidence

Explosive lift for vertical takeoffs and extended airtime

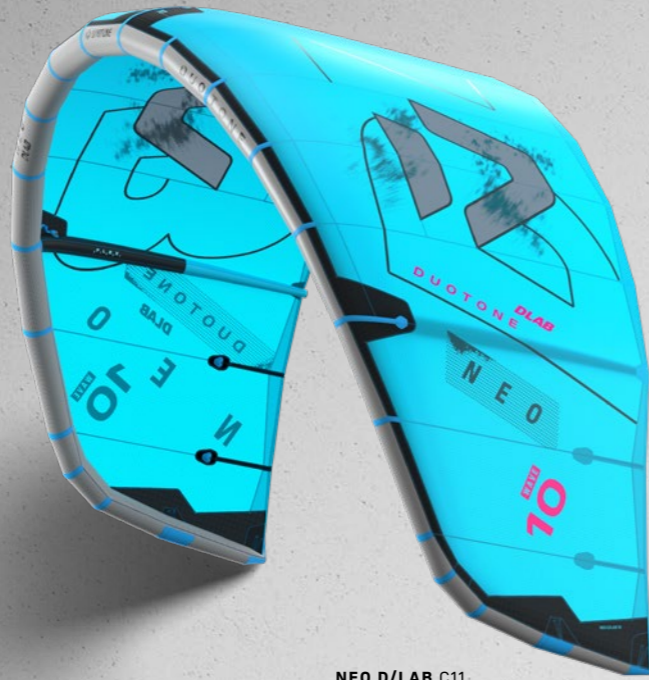

ITEM NO. 44260-3024

# Neo D/LAB

Wave

## What's New

- + Sharper steering response through new Aluula D/TX
- + Improved down-the-line drive from refined arc and sweep
- + More stable drift and depower control
- + Increased torsional stiffness for cleaner input-to-canopy transfer

NEO D/LAB C11

The Duotone Neo D/LAB, the pinnacle of wave kite innovation and performance. Engineered with cutting-edge Aluula D/TX and Trinity TX materials, this kite represents the most refined wave kite, designed for unmatched precision and control on the water.

The Neo D/LAB sets the standard with best-in-class drift, offering ultimate wave freedom. Experience ultra-smooth and responsive handling that allows for outstanding steering response, making it the ideal choice for riders who demand the very best. With the maximum wind range in the Neo line, this kite is versatile enough to excel across various conditions. One of the key advancements of the Neo D/LAB is its sharper steering response, achieved through the incorporation of Aluula D/TX in the leading edge. This revolutionary material reduces weight while significantly increasing stiffness, allowing for an immediate transfer of steering input to the kite. The result is noticeably quicker and more

direct turning, which is crucial for reactive surfing in tight sections. Subtle refinements to the arc shape and sweep angle also enhance down-the-line drive. These changes shift the kite's position further forward in the wind window, keeping it actively engaged and pulling when riding slack lines. This design offers smoother flow and consistent forward drive on fast wave faces, elevating your surfing experience. Stability is further enhanced with improved drift and depower control. The combination of structural stiffness and aerodynamic refinement allows the kite to hold its shape when depowered, reducing deformation and flutter. This results in a cleaner and more controllable drift, particularly in offshore or gusty conditions. Furthermore, the increased torsional stiffness provided by Aluula D/TX minimizes unwanted flex in the leading edge during aggressive input. This leads to a crisper, more predictable steering feel, allowing for precise maneuvering, especially under pressure or during hard transitions.

With the Duotone Neo D/LAB, you have the ultimate wave kite at your disposal. Experience unparalleled performance and precision, designed for the most ambitious riders who seek the perfect balance of innovation and control in the waves.

### Key Features:

- The most refined Wave Kite for unmatched precision
- Best-in-class drift for ultimate wave freedom
- Ultra-smooth and responsive handling
- Outstanding steering response
- Maximum wind range in the Neo line
- Intuitive bar feedback for total wave focus

## What's New

- + Carry over product
- + New color way

NEO SLS C10

NEO SLS C02

**The Duotone Neo SLS, the precision wave kite crafted for committed riders seeking unmatched performance on the water. Utilizing advanced materials like Penta TX and Trinity TX, the Neo SLS redefines what a wave kite can achieve, optimizing shape retention for exceptional control during powered turns.**

Engineered with the lightweight trailing edge battens and reinforcements, the Neo SLS increases canopy stability during aggressive maneuvers, allowing riders to push their limits and tackle challenging conditions with confidence. Experience sharper, reactive steering thanks to clever strut construction that enhances responsiveness for tighter turns, enabling you to time your waves perfectly. The Neo SLS is designed for greater composure in gusty conditions, structural tuning ensures more consistent handling,

allowing you to maintain control and stability even in variable wind situations. This kite's explosive turning response, made possible by its Hybrid Flex Strut, propels you into dynamic maneuvers and swift transitions, enhancing your overall riding experience in strapless freestyle and wave riding. With exceptional drift capabilities, the Neo SLS is especially ideal for aggressive down-the-line surfing, providing the speed, control and precision you need in critical situations. The instant bar feedback ensures that every input is communicated clearly, enabling you to navigate challenging waves with confidence. The Neo SLS also boasts a massive wind range, making it an incredibly versatile kite for various conditions.

Whether you're carving through waves or launching into the sky, the Duotone Neo SLS is your ultimate companion, designed for the serious rider who demands performance without compromise.

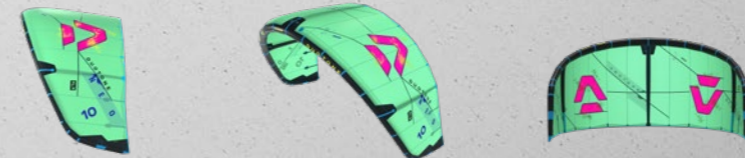

### Key Features:

- The precision Wave Kite for committed riders
- Explosive turning response with Hybrid Flex Strut
- Exceptional drift for aggressive down-the-line surfing
- Crisp, precise control in critical situations
- Instant bar feedback
- Massive wind range

## What's New

- + Improved handling with faster turning and better relaunch
- + Increased structural consistency under load
- + Enhanced control during depowered riding
- + Classic Neo handling preserved

NEO C09

NEO C05

**Discover the Neo, the reliable wave kite designed for smooth and predictable handling. Perfectly suited for down-the-line surfing, the Neo offers outstanding drift, allowing you to maximize your performance on the water with confidence.**

Engineered for intuitive handling in every situation, the Neo delivers smooth power delivery and predictable control for both strapless and surf riding. Its enhanced design includes advancements that significantly improve handling, promising faster turning capabilities and exceptional relaunch performance. The reduced aspect ratio results in quicker, more responsive maneuvers with lighter bar input, providing precise feedback in a variety of conditions. One of the standout features of the Neo 2026 is its increased structural consistency under load. The innovative intersegment construction

allows the kite to maintain its shape reliably, even in gusty or variable winds. This ensures a smoother and more composed feel without compromising agility, enabling you to ride confidently in challenging conditions. When it comes to depowered riding, the Neo excels. Even when drifting or light wind sections, this kite maintains its shape and responsiveness, enhancing control when riding off the front foot or during slack line situations. This reliable performance gives riders the confidence to push their limits and explore new techniques. While the Neo benefits from significant upgrades for 2026, it retains its classic handling characteristics that riders cherish. With easy steering, smooth drift, and balanced performance, the Neo stands out as a refined choice for wave enthusiasts.

Step into the world of waves with the Duotone Neo 2026 and experience reliability and smoothness like never before.

### Key Features:

- The reliable Wave Kite for smooth and predictable handling
- Outstanding drift for down-the-line surfing
- Intuitive handling in every situation
- Smooth power delivery
- Predictable control for strapless and surf

SIZES 6 / 11 m

**The Duotone Dice SLS, the ultimate sporty freestyle and wave allrounder crafted for advanced riders. Built with premium Penta TX and Trinity TX materials, the Dice SLS offers pure and intuitive control on three struts, providing an exhilarating experience whether you're performing technical tricks or riding the waves.**

This kite is designed for those who demand explosive pop and crisp slack in their freestyle maneuvers. Spicy it up and experience effortless drift while navigating waves, allowing you to maintain speed and control as you harness the energy of the ocean. With smooth and balanced power, the Dice SLS delivers the kind of performance that inspires confidence in any session.

The Dice SLS features speedy turning capabilities, making it a solid performer in all conditions. One of the key advancements is the longer depower

stroke, which enables smoother power delivery. The refined arc shape, with a more open center and aggressively pulled-in tips, enhances the depower range while maintaining progressive power development for smooth transitions. Lighter steering is achieved through improvements to the canopy tension and attachment at the tip. This enhances the transfer of steering input, resulting in reduced bar pressure without compromising feedback, giving riders a more engaging experience on the water. Faster and more controlled turning is another highlight of the Dice SLS. With adjusted batten positions and an improved canopy structure, tip flutter is minimized, allowing for tighter, quicker, and more precise turns—essential for both loops and tight maneuvers. When it comes to wave riding, the Dice SLS offers playful and reactive handling. Enhanced steering responsiveness and balanced power delivery make it lively and easier to maneuver in dynamic wave conditions, allowing riders to carve through the surf

with ease. Moreover, the optimized bridle setup and improved load distribution provide increased control in gusty or challenging conditions, ensuring stability when faced with unpredictable winds. To top it off, the Dice SLS has been fine-tuned for freestyle performance. A deeper position in the wind window, combined with a refined shape, delivers explosive pop and clean slack, making it easier to execute hooked or unhooked technical tricks with confidence. Challenge yourself with the Duotone Dice SLS 2026, the perfect combination of performance, versatility, and cutting-edge technology for those ambitious riders who thrive in both freestyle and wave riding scenarios.

Freeride / Freestyle

## What's New

- + **Faster turning for a more playful feel**
- + **Improved bar feedback and handling**
- + **More intuitive and responsive steering**
- + **Reduced tip flutter in loops and tight turns**
- + **Better loop and catch performance**

EVO SLS C012

EVO SLS C05

EVO SLS C13

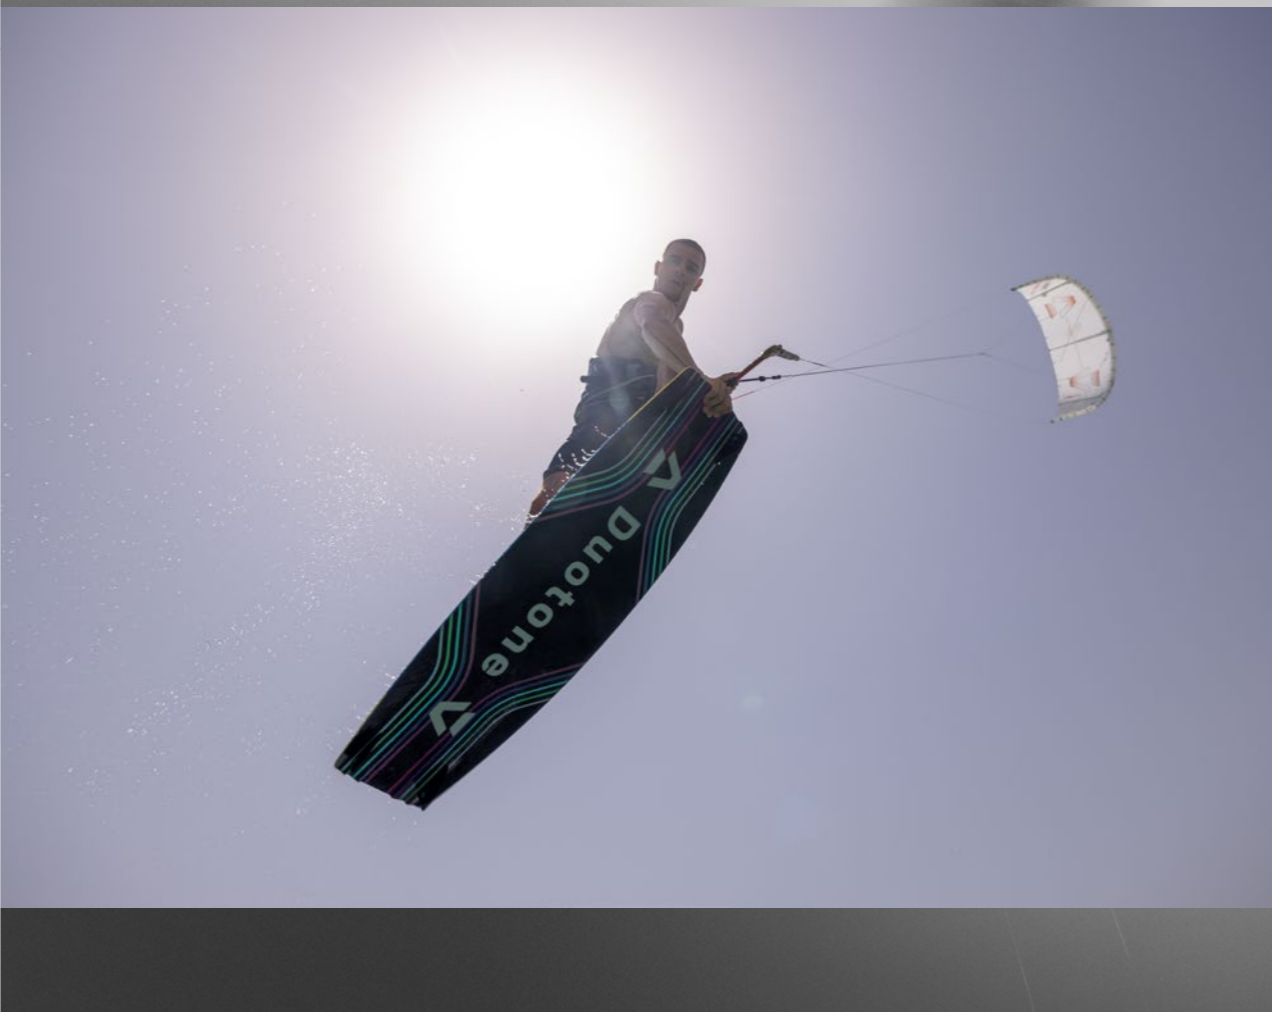

**The Evo SLS, the ultimate performance allrounder designed for progressive riders who seek versatility across freeride, freestyle, and even wave riding. Built with advanced Penta TX and Trinity TX materials, the Evo SLS delivers explosive lift, dynamic jumping, and outstanding hangtime, making it the go-to kite for technical tricks and high-performance sessions.**

Engineered for maximum control across all conditions, the Evo SLS empowers riders to push their limits with confidence. Its SLS (strong, light, superior) construction enhances agility, ensuring that every maneuver feels responsive and effortless. One of the standout features of the Evo SLS is its faster turning capability, which results in a more playful feel on the water. The refined tip construction features more aggressive tapering and an additional leading edge segment,

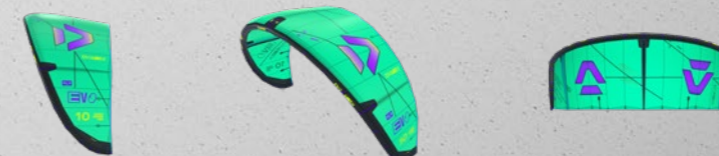

significantly increasing steering speed and responsiveness. This allows for quick adjustments to your direction, whether you're carving through waves or preparing for a freestyle trick. The Evo SLS offers improved bar feedback and handling, thanks to changes made to the canopy attachment at the tip. This results in a cleaner and more balanced bar feel, establishing a better connection between rider and kite, crucial for effective control during dynamic conditions. With enhanced steering responsiveness, the Evo SLS provides more intuitive handling. The better transfer of steering forces into the canopy allows for a more direct and predictable reaction to bar input, giving riders the confidence to execute complex maneuvers. Moreover, reduced tip flutter during loops and tight turns is achieved through structural improvements in the tip area. This minimizes flutter during aggressive maneuvers, enhancing control and precision to ensure that your transitions are seamless and your movements are sharp.

The kite's performance is further optimized with better loop and catch capabilities. With increased turning speed and stability, kitemanoeuvres are quicker, and the kite catches more reliably after a rotation, enabling you to focus on nailing your tricks without hesitation.

Experience the freedom and versatility of the Duotone Evo SLS 2026, the performance "can do it all" kite that adapts to your style and challenges you to reach new heights, whether you're cruising the waves or launching into the air.

## What's New

- + Smoother steering with no tip flutter
- + More direct handling and precise bar feedback
- + Balanced and comfortable riding feel
- + Enhanced stability and control in gusts

EVO C017

EVO C05

EVO C16

The Duotone original Evo is since years known as the allround performer designed to excel in all conditions, making it the perfect choice for riders of all skill levels. This kite offers versatile performance for various riding styles, ensuring that you can enjoy every session, whether you're just starting or as an experienced rider.

With its intuitive handling and user-friendly features, the Evo Original empowers you to progress quickly and confidently on the water. This kite is built for effortless jumping, allowing for fast progression as you master new tricks and techniques. The Evo Original delivers smooth power delivery and full control, enabling you to focus on your performance and enjoy the thrill of kiteboarding. Key to its exceptional performance is the updated design that ensures smoother steering with no tip flutter. The clean

aerodynamics provide a more solid feel, resulting in smoother turning and faster steering response. Additionally, the new intersegment seam increases structural stiffness between panels, allowing for more direct handling and precise bar feedback. This means quicker reactions and effective power transfer without extra load. Despite its added responsiveness, the Evo Original maintains a balanced and comfortable riding feel. Power development remains smooth and consistent, making it accessible and enjoyable in a wide range of conditions. Enhanced stability and control in gusts are also key features, as the reduced flutter and stiffer frame connection allow the kite to handle gusty winds predictably, providing reliable control and a stable feel across the wind range.

Experience the freedom and versatility of the Duotone Evo – the kite that adapts to your style and elevates your performance. Redefine your kiteboarding experience with the Evo, where performance meets reliability!

# Juice

Freeride / Lightwind / Foil

## What's New

- + Improved frame stability with reduced drag
- + More direct steering and enhanced bar feedback
- + Better efficiency and extended lightwind performance
- + Easier relaunch in marginal conditions
- + Smoother power delivery and a more playful ride

JUICE C19

JUICE C118

JUICE C21

**The Duotone Juice is the lightwind freeride machine designed for uncompromising performance in minimal wind conditions. With its optimized lightwind construction, this kite maximizes efficiency, allowing for smooth, consistent power delivery even when the breeze is barely there. Experience early planing in minimal wind, ensuring that you can make the most of every session, regardless of the conditions.**

This kite is built for effortless water relaunch, making it easy to get back in the air even when the wind is light. The optimized upwind performance allows you to ride confidently in marginal conditions, ensuring that you can stay in the action longer. Key to its exceptional performance is the improved frame stability with reduced drag. The new 6-point bridle allows for a slimmer leading edge diameter, significantly cutting drag while keeping the frame compact and stable.

This design ensures reliable performance across all wind conditions. Additionally, the more direct steering and enhanced bar feedback come from the redesigned tip geometry, which features an additional segment that transfers steering input more effectively into the canopy. This results in sharper, faster responses and a more precise feel on the bar. The Juice also boasts better efficiency and extended lightwind performance. With the thinner leading edge, the kite moves forward faster in the wind window and generates more grunt in general for those lightwind sessions. The lighter overall construction makes water relaunch noticeably smoother and more reliable, even when the wind is just enough to keep the kite flying.

Experience smoother power delivery and a more playful ride with the Duotone Juice. The combination of the 6-point bridle, lighter frame, and refined tip design ensures consistent, balanced pull with intuitive handling, turning every lightwind session into an enjoyable freeride experience.

### Key Features:

- The lightwind freeride machine for uncompromising performance
- Ultra-light construction for maximum efficiency
- Smooth, consistent power delivery
- Early planing in minimal wind
- Effortless water relaunch in light wind
- Optimized upwind performance in marginal conditions

### Key Features

#### Click-In safety system:

Allows for quick and secure locking of the loop for enhanced safety while riding.

#### Precise backline trim:

Facilitates millimeter precision adjustments for optimal control and performance.

#### Adjustable line length:

Customize line lengths according to personal preferences and riding conditions.

#### Precise steering due to FLITE99 2.0 and FLITE99 2.0+ lines:

Offers superior responsiveness, ensuring a direct feeling for high jumps and tricks.

#### Optional low V position:

Designed to be compatible with most kite models, enhancing versatility.

#### Iron Heart VI Click-In safety system:

Ensures quick and reliable release in critical moments for increased rider safety.

**The unique Duotone Click Bar 2026 continues to lead the kiteboarding industry, showcasing advancements in safety, functionality, and user-friendly design. This model is built to empower every kiteboarder with exceptional safety, performance and confidence, ensuring a seamless riding experience with its array of innovative features.**

At the forefront of the Click Bar 2026 is the Click-In safety system, which allows riders to quickly and securely lock their loop, enhancing safety while riding. Coupled with a precise backline trim, this feature enables precise adjustments for optimized performance tailored to varying conditions. The adjustable line length adds versatility, catering to personal preferences and adapting to different riding styles. The Click Bar 2026 is equipped with new FLITE99 2.0 lines for the backlines and the new FLITE99 2.0+ lines for the frontlines, offering superior responsiveness and a direct feel that enhances maneuverability and performance during high jumps. The frontlines, made from FLITE99 2.0+ lines, have a thickness of 1.5mm with higher breaking load, ensuring a robust performance. A new monofil layout was invented to minimize friction between the lines. Additionally, the optional low V position ensures compatibility with the majority of kite models on the market, making the bar ideal for diverse setups. Safety remains

paramount with the inclusion of the Iron Heart VI Click-In safety system and an automatic untwisting mechanism that simplifies the experience after rotations or loops. A removable floater allows for easy inspections of the leader lines, ensuring they remain in good condition, while minimalistic pigtails are only sleeved in necessary areas, reducing clutter. The design also features a metal ring as a V-Distributor, making disassembly and reassembly easy while preventing tangled lines. Riders will appreciate the flexibility of using either a 4 or 5 lines setup, with the 5th line upgrade kit available for those seeking additional customization e.g. on C-kites. The suicide ring option provides advanced riders with a fixed suicide mode. Environmentally friendly design is also addressed, with 20% BLOOM (algae additive) incorporated into the EVA bar grip, reducing the usage of virgin raw materials. Upgraded center part bearings enhance the steering angle and therefore the overall functionality and durability of the Click Bar 2026. Experience the pinnacle of kiteboarding control with the Duotone Click Bar 2026. Designed for both performance and safety, this bar empowers riders to push their limits and explore new heights on the water. Whether you're a seasoned pro or just starting, the Click Bar 2026 offers a seamless blend of innovation and comfort, allowing you to focus on what truly matters—enjoying the ride. Elevate your kiteboarding experience, connect with confidence, and embrace the thrill of the adventure with the Duotone Click Bar 2026!

**What's New**

- + **New FLITE99 2.0 lines**
- + **New monofil layout for less friction between the lines**
- + **Frontlines made of FLITE99 2.0+ lines: 1.5 mm thickness with higher breaking load**
- + **Backlines made of FLITE99 2.0 lines: 1.3 mm thickness**

The well known Duotone Kiteboarding Trust Bar is engineered to provide kiteboarders with unparalleled control and versatility in a single, dynamic setup. This bar combines innovative safety features with precision steering, allowing riders to confidently navigate their kiteboarding adventures while adapting effortlessly to various conditions.

At the core of the Trust Bar is the advanced Click-In safety system, which ensures a quick and secure locking mechanism. Riders will appreciate the precise steering offered by FLITE99 2.0 lines, enhancing responsiveness for optimal maneuverability. Designed for adaptability, this bar features adjustable line lengths and bar widths, meaning it can accommodate a wide range of setups effortlessly. The optional Low-V position makes the Trust Bar compatible with most kite models, including an edition specifically tailored for schools. A unique frontline depower setup utilizes DPL24 as depower line, which provides a smooth and effective way to control power. The complete depower line setup includes a custom-developed Dyneema depower line with a 24 mesh cover (DPL24) to minimize wear and deliver excellent tactile feedback, a safety bungee line, and a Vario Cleat with an adjustment clip to neatly store depowered lines. Safety is paramount with the inclusion of the Iron Heart VI Click-In safety system, enhancing reliability in

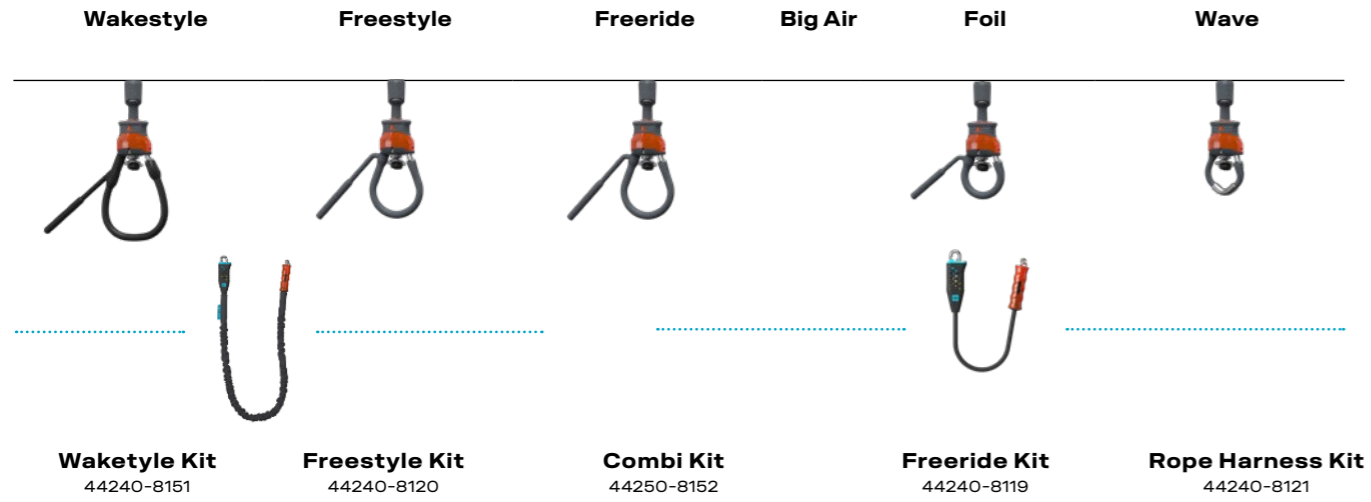

critical moments. Thanks to a friction bearing, the bar is easy to untwist during use, ensuring a hassle-free experience. Minimalistic pigtails are constructed to reduce clutter, while FLITE99 2.0 on backlines and FLITE99 2.0+ on frontlines contribute to enhanced performance, leveraging a new monofil layout that reduces friction. The frontlines, made from FLITE99 2.0+ lines, have a thickness of 1.5 mm with higher breaking load, ensuring a robust performance. The Trust Bar is equipped with a metal ring as a V-Distributor for easy assembly and disassembly, along with a suicide ring for those seeking a fixed suicide mode. 20% of the EVA bar grip is made from more sustainable BLOOM (algae). Available with only 4 lines, it ensures simplicity while maintaining optimal safety.

Embrace the freedom of kiteboarding with the Duotone Kiteboarding Trust Bar, a perfect fusion of safety, adaptability, and precision. Designed for all riding styles, this bar empowers you to navigate with confidence and ease. Whether you're exploring new tricks or breaking height records with ease, the Trust Bar ensures that every ride is a safe and thrilling adventure. Experience ultimate control and redefine your kiteboarding journey with the Duotone Trust Bar!

**Key Features**

- Click-In safety system:  
Quick and secure locking mechanism that enhances rider safety.
- Precise steering due to FLITE99 2.0 and FLITE99 2.0+ lines:  
Superior responsiveness allows for optimal maneuverability and performance.
- One bar for all setups:  
Adjustable line length and bar width create versatility for various riding styles.
- Optional Low-V position:  
Compatible with most kite models, including a school edition for enhanced usability.
- Unique frontline depower setup:  
Features DPL24 as the depower line, ensuring smooth and effective control over power.
- Iron Heart VI Click-In safety system:  
A reliable safety feature that ensures quick release in critical situations.

# Volt D/LAB

Small waves

## What's New

- + **New shape – the new shorter, rounder outline makes the Volt very responsive and agile – perfect for small waves**
- + **Layup update**
- + **New sizes**

**Introducing the Volt D/LAB, the ultimate surfboard designed for those smaller wave days when conditions may not be ideal, yet you still crave a fun session on the water. Specifically crafted for the adventurous rider who values performance even in less-than-perfect conditions, this board transforms the smallest of waves into thrilling kite sessions.**

The Volt D/LAB features a high-performance design that begins with its Low Entry Rocker and Double Concave Bottom, ensuring excellent speed generation. This new shorter and rounder outline delivers responsiveness and agility, making it perfect for small waves. What truly sets the Volt apart is its extra width under the front foot, which allows riders to maximize fun during mellow surf while still providing remarkable performance when the waves are good. Constructed with innovative materials, the Volt D/LAB incorporates Innegra for vibration damping and enhanced crack resistance, a feature that ensures durability and comfort. The RMF (reflex memory foam) Shock Absorber 3.0 contributes to your comfort, delivering the most connected feeling possible while riding waves. With its carbon construction, you'll enjoy a very responsive board, making every session memorable.

The Volt D/LAB is your go-to board for small wave riding, designed to enhance your experience and push your limits. Don't let the conditions hold you back – grab your Volt D/LAB and redefine your sessions!

### Key Features

- High performance small wave board
- Low Entry Rocker and Double Concave Bottom for speed
- Shorter, rounder outline for responsiveness and agility
- Extra width under front foot for fun in less than perfect conditions
- Innegra for vibration damping and crack resistance
- RMF Shock Absorber 3.0 for comfort

# Whip D/LAB

Small to medium waves / Strapless Freestyle

## What's New

- + Carry over shape
- + New colorway
- + New D/LAB layup

**Duotone Whip D/LAB, the most loved board in our range over the past years, renowned for its exceptional performance in small to medium waves and its versatility in strapless freestyle. The premium D/LAB (Duotone Laboratory) version, crafted for those who demand the very best.**

The Whip D/LAB features a high-performance small wave and freestyle design, allowing riders to enjoy snappy top turns with ease. The hip-squash tail design and increased rocker work together to provide dynamic maneuverability, making it perfect for stylish riding and impressive turns on the wave. Experience incredible speed generation with the fast rocker and channel bottom, which facilitates rapid acceleration. Whether you're slicing through waves or executing a trick, the Whip will have you zooming across the water with confidence and flair. Constructed with Innegra, this board absorbs vibrations while maintaining crack resistance, ensuring durability and longevity. The integration of the RMF (reflex memory foam) Shock Absorber 3.0 provides remarkable comfort, making every ride smooth and enhancing the overall feeling on the wave. The carbon construction enhances responsiveness, allowing for quick reactions and a lively ride that empowers riders to push their limits. The Whip D/LAB truly excels in performance, making it an ideal choice for those looking to master strapless freestyle or simply enjoy the thrill of wave riding. Elevate your surfing experience with the Duotone Whip D/LAB 2026 - where performance meets innovation and design.

### Key Features

- High-performance small wave and freestyle board

# Blur D/LAB

Medium to big waves

## What's New

- + Carry over shape
- + New colorway
- + New D/LAB layup

Introducing the Duotone Blur D/LAB, the ultimate surfboard engineered for pure wave riding. Designed to excel in medium to big waves, this board has been expertly crafted for performance, for some of the best in the sport. Trusted by team riders James Carew, Matchu Lopes, and Pedro Matos, the Blur D/LAB shines in challenging conditions, such as the iconic wave One Eye in Mauritius or the powerful Ponta Preta in Cape Verde.

As a wave specialist, the Blur D/LAB features maximum rocker to facilitate tight turns in the steepest sections of the wave. This design ensures that riders can carve with precision and control, making it easier to navigate powerful swells and execute sharp maneuvers. The round tail enhances stability and control at speed, allowing for smooth transitions and confident handling when charging down the line. Whether you're tackling big waves or looking to improve your turns, the Blur D/LAB is designed to meet the demands of medium to advanced wave riders. Constructed with Innegra, the board boasts exceptional vibration damping and crack resistance, ensuring durability in heavy surf. The inclusion of the RMF (reflex memory foam) Shock Absorber 3.0 offers unparalleled comfort, enhancing your overall experience and feeling on the wave. With a carbon construction, the Blur D/LAB delivers the most responsive ride possible, allowing riders to make quick adjustments and fully engage with the wave. Experience the thrill of wave riding with the Duotone Blur D/LAB 2026 and take your skills to the next level in proper wave conditions.

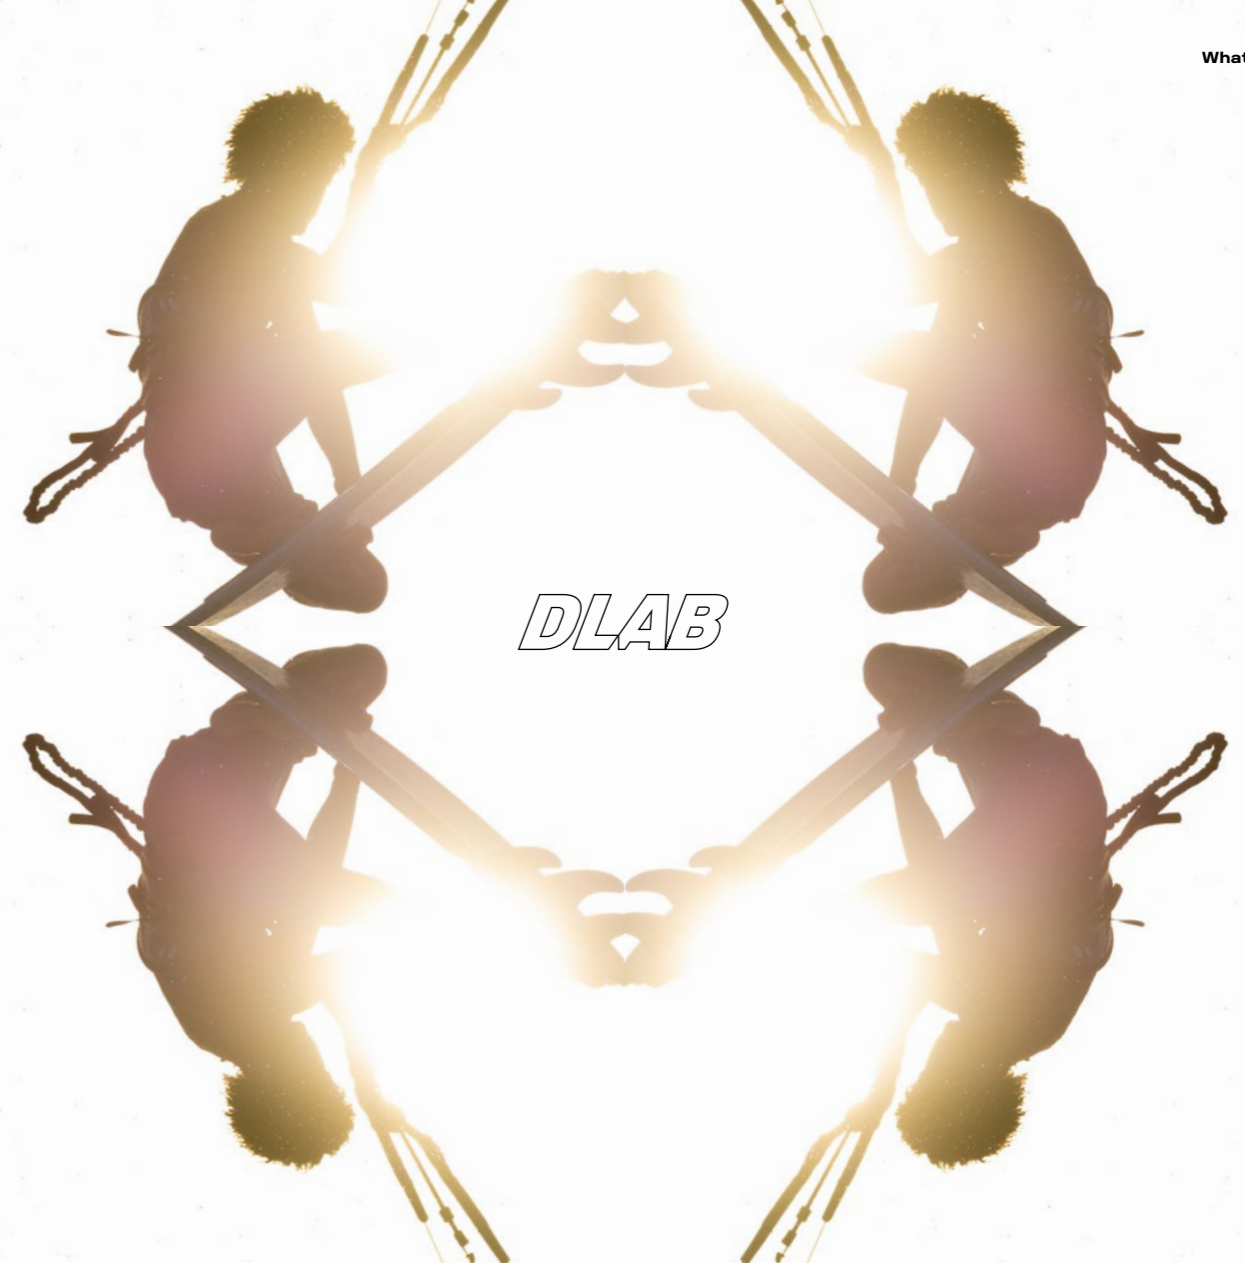

### Key Features

- Versatile surfboard for medium to big waves, optimized for maximum performance
- Maximum rocker for tight turns in steep sections
- Round tail for enhanced control at speed
- Innegra for vibration damping and crack resistance
- RMF Shock Absorber 3.0 for comfort and improved wave feeling
- Carbon construction for the most responsive ride

# Provoke

Strapless Freestyle

### What's New

- + **New outline - Rounded outline and medium rocker for playfulness and stability**
- + **Increased nose rocker for easier landings and better handling in choppy conditions**

Introducing the Duotone Provoke, a pure strapless freestyle machine with a new outline, built to meet the demands of athletes like Strapless Big Air World Champion James Carew. Designed for performance, the Provoke delivers exceptional prowess in the air, enabling riders to push their limits and elevate their tricks. This board features a parallel outline and a medium rocker that optimize speed and stability, allowing you to gain momentum while maintaining control.

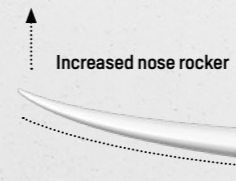

An additional nose rocker was added for easier landings and a better handling in choppy conditions. Whether you're negotiating choppy conditions or gearing up for your next trick, the Provoke is designed to keep you grounded and confident. The wide tail is engineered for explosive pop, making it the perfect companion for lofty airs and

dynamic maneuvers. Riders will appreciate the ability to launch high and land smoothly, capturing the essence of strapless freestyle. Aggressive bottom channels enhance performance, providing fast and stable landings that allow for smooth transitions. With every jump, you can expect reliable support as you descend, ensuring you can focus on your execution and style. Crafted with Carbon Innegra Construction, the Provoke balances durability with lightweight performance, ensuring it withstands the rigors of intense riding while delivering superior responsiveness. The Vacuum Epoxy Assembly method further enhances its strength, providing a reliable and consistent ride. The Provoke is equipped with a Full PVC High Impact Core, ensuring resilience against impacts and prolonging its lifespan, so you can ride hard without worry. Experience the power and precision of the Duotone Provoke 2026, the ultimate board for strapless enthusiasts looking to take their riding to the next level.

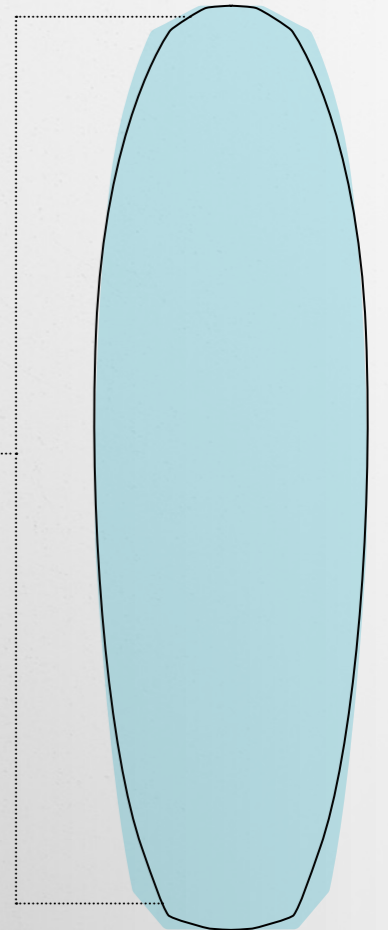

### Key Features

- Strapless freestyle machine built for maximum performance
- Parallel outline and medium rocker for enhanced speed and stability
- Wide tail for explosive pop when launching into the air

# Soar SLS

Kitefoil board

## What's New

- + New shape
- + New layup
- + Open foil tracks

The Duotone Soar SLS is a high-performance kitefoil board designed to enhance your riding experience especially in lighter wind conditions. Featuring increased volume under the front foot, this board ensures effortless waterstarts, making it an excellent choice for any foiler. The high nose rocker combined with an expanded surface area grants a forgiving ride, allowing for smooth transitions and easy maneuverability.

Constructed with full carbon, the Soar SLS offers exceptional board control while maintaining a lightweight profile, which results in increased durability and performance. The multiple footstrap options enable riders to customize their setup for maximum comfort and efficiency, catering to individual preferences. Additionally, the optimized rails significantly improve upwind performance, ensuring you get the most out of every session. With its completely new shape and layup, along with open foil tracks, the Soar SLS redefines kitefoiling, making it a standout choice for those looking to elevate their riding capabilities on the water.

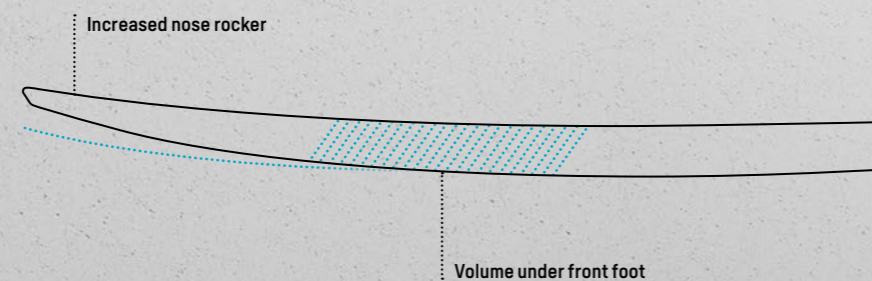

### Key Features

- Increased volume under the front foot for easy waterstarts in light conditions
- High nose rocker and increased surface area for forgiveness and ease of use
- Full carbon construction for better board control, reduced weight, and increased durability
- Multiple footstrap options for personalized comfort
- Optimized rails for improved upwind performance
- New shape and layup for enhanced performance

# Surfboard Pads 2026

## Enhanced Grip and Comfort!

**What's New**

- + **New Insert Pad**
- + **New Courdoroy cut**
- + **Revised tail cookie**

**Introducing our latest surfboard pads, engineered and tested together with our world champions, designed for maximum performance and comfort while riding. These high-density EVA foam pads are designed for those who demand the best out of their surfing experience, ensuring that you maintain optimal control and grip on your board - no matter what the conditions.**

The newly developed Courdoroy cut provides greater comfort while preserving the exceptional grip. Additionally, the cutouts are strategically placed to save weight without compromising grip, allowing for a more responsive feel underfoot. Each pad is ready to incorporate the new Insert Pad, offering unparalleled versatility for riders who enjoy using straps. The Insert Pad gives you the freedom to ride any board you desire with straps, enhancing your control and stability. Furthermore, we have revised the tail cookie shape to offer better control in the waves, empowering you to make precise maneuvers and turns. The new Duotone surfboard pads bring together comfort, innovative design, and improved functionality. Elevate your surfing game with our premium pads and experience the difference in your ride today!

**Key Features**

- High-density EVA foam for durability
- New Courdoroy cut for greater comfort and grip
- Cutouts for weight savings and enhanced grip
- Ready to incorporate the new Insert Pad for versatile use
- Insert Pad allows for strap use on any board
- Revised tail cookie shape for improved wave control

Performance Freeride

## What's New

- + Double Concave Bottom for more comfort and speed
- + Angled Rails for better upwind abilities and more grip
- + Updated Space Flex to control flex characteristics
- + New Graphic Design

Introducing the Duotone Select SLS, a performance-driven freeride board designed for those who demand excellence in every ride. With a perfect blend of innovation and comfort, this board is tailored for riders seeking a fast performance board with lots responsiveness.

At the forefront of the Select SLS is the new Double Concave Bottom, which offers exceptional damping for a smooth ride even in choppy conditions. This design not only enhances comfort but also ensures that you can enjoy extended sessions without the fatigue typically associated with rough water. The use of Textreme Innegra keeps the board lightweight while providing outstanding comfort. You'll feel the difference as you efficiently glide over the water, allowing for effortless early planing that makes every ride a pleasure. New Angled Rails enhance the upwind capabilities of the Select SLS, enabling you to ride against the wind with ease and create strong pop. This feature maximizes your efficiency, ensuring that no effort is wasted while you explore various conditions. Smooth carving is a hallmark of the Select SLS, thanks to the updated Space Flex Technology. This innovative design promotes a comfortable ride while allowing for responsive handling when executing turns and tricks. The combination of this flexibility with the responsive and lightweight Biax Carbon Construction empowers riders to push their boundaries and enhance their skills. The Select SLS boasts a medium flex, offering the ideal balance between comfort and performance. With tip channels that improve grip and stability, this board is an excellent choice for both novice and seasoned riders looking to elevate their freeriding experience. Experience a new level of performance with the Duotone Select SLS 2026. Whether you're carving through waves or charging upwind, this board is designed to help you achieve your riding goals with confidence.

**Introducing the Duotone Shred, the ultimate freeride and freestyle board designed specifically for young riders. With a focus on performance and fun, this board provides everything that groms need to enhance their skills while enjoying their time on the water.**

The Shred features a narrower outline tailored for youngsters, making it easier for them to maneuver and control as they develop their riding abilities. This thoughtful design ensures that young riders can confidently tackle both freeride adventures and freestyle tricks. With updated Space Flex Technology, the Shred delivers a comfortable ride with exceptional early planing capabilities. This feature allows young riders to get up on the water swiftly and smoothly, maximizing enjoyment from their very first session. The new Double Concave Bottom design provides excellent damping, ensuring a smoother ride in various water conditions. This innovation minimizes impact, allowing groms to have fun without the discomfort that can come from choppy waters and hard landings. Durable Biax Carbon Construction guarantees that the board can withstand the rigors of learning and exploring, ensuring it remains reliable session after session. Angled Rails add to the board's upwind capabilities, enabling kids to ride with confidence as they venture into the wind. The Shred features a soft flex, which is ideal for young riders, providing them with the responsiveness they need while maintaining comfort and stability. Tip channels enhance grip, allowing for smooth carving and precise control during turns. Get ready to unlock the potential of the next generation of kiteboarders with the Duotone Shred 2026. It's time for young riders to embrace the joy of freeriding and freestyle and make lasting memories on the water.

# Jaime SLS

Performance Freestyle

## What's New

- + **New Double Diffusor Bottom for more speed whilst maintaining the same grip**
- + **Revised Double Concave for softer landings with more control**
- + **New Graphic Design**

The legendary Duotone Jaime SLS has been a staple in kiteboarding for decades, and it continues to be THE freestyle freeride board of choice for ambitious riders eager to improve their skills. This board is designed to provide an exceptional balance of performance and comfort, making it the perfect companion for nearly any sportive rider.

At the heart of the Jaime SLS is the innovative Double Rockerline Concept, which delivers massive grip for outstanding take-offs for freestyle and also impressive big air capability. When you're looking to soar into the sky, this board's design provides the stability and confidence you need to execute your maneuvers with finesse. Experience incredible pop thanks to the inclusion of Biax Carbon, offering responsiveness that translates into powerful launches and exciting airtime. The Angled Fins provide additional grip, allowing for precise control as you carve and maneuver, enhancing your overall riding experience. Soft landings are a crucial aspect of freestyle and freeride riding, and the Jaime SLS is equipped with a Double Diffusor Bottom. This innovative feature absorbs impact, ensuring a smooth and comfortable landing every time you hit the water after an exhilarating jump. The Double Rockerline not only enhances grip for remarkable upwind performance but also ensures a buttery-smooth ride across the water. Riders will appreciate the level of comfort and fluidity provided by this advanced design, making each session enjoyable and effortless. With a hard flex, the Jaime SLS boasts the responsiveness and stability that dedicated riders demand. This board is an excellent choice for those looking to refine their techniques and elevate their skills.

Embrace the legacy and experience the unparalleled performance of the Duotone Jaime SLS 2026. Join the ranks of accomplished riders and take your kiteboarding to new heights.

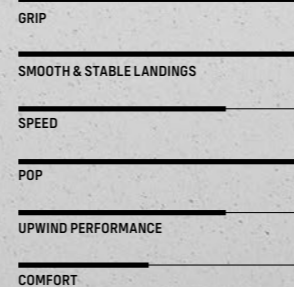

### Key Features

# TS Big Air SLS

Competition Big Air

## What's New

- + **New Outline** for more grip during over-powered riding and a more playful board
- + **New Double Diffusor Bottom** for more speed whilst maintaining the same grip
- + **Revised Double Concave** for softer landings with more control
- + **New Graphic Design**

The Duotone Teamseries Big Air SLS has been a resounding success since its inception, and for a good reason. This board is not just a favorite among the team; it's the very board that propelled Andrea Principi to victory at the King of the Air. Designed for serious big air enthusiasts, it's built to handle the most demanding conditions while delivering exceptional performance.

Central to the Teamseries Big Air SLS is the innovative Double Rockerline Concept. This cutting-edge feature ensures massive grip, allowing riders to achieve explosive take-offs and unparalleled big air manoeuvres. Pop like never before with the combination of Biax Carbon and Textreme Innegra, which provide remarkable responsiveness while keeping the board lightweight. You'll experience fantastic explosiveness that translates into thrilling jumps and airtime, giving you the competitive edge required for the most challenging tricks. Directional grip is crucial, and the Teamseries Big Air SLS excels in this area with its Angled Fins, ensuring precise control during aggressive manoeuvres. Coupled with the Double Diffusor Bottom, which optimizes soft landings, this board minimizes impact, allowing you to ride with confidence even after the most ambitious jumps. Designed with a Suspension Flex Cap to provide minimum reverse flex, this board enhances control and stability while riding. The Torsion Flex also contributes to greater upwind performance, ensuring that you can ride smoothly, no matter the conditions. The Teamseries Big Air SLS features a hard flex, allowing you to push your limits while retaining the responsiveness needed to master complex tricks. With an updated outline and a new Double Diffusor Bottom, this board continues to set the bar for big air performance. Embrace the challenge, push your boundaries, and dominate the WOO leader boards like never before.

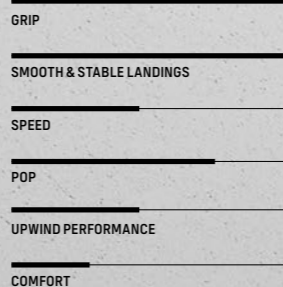

### Key Features

- Double Rockerline Concept for massive grip and explosive take-offs

**Introducing the Duotone Spike SLS, the ultimate lightwind board! This board not only enhances your riding experience in lower winds but is also equipped to handle some freestyle maneuvers, making it a versatile addition to any rider's quiver.**

The classic outline is engineered for smooth carving and exceptional upwind control, enabling you to navigate effortlessly through varying conditions. With Angled Rails designed for optimal upwind performance, the Spike SLS ensures you can make the most of every breeze, allowing you to get back to your favorite spots with ease.

Featuring a large surface area underfoot, the Spike SLS makes water starts a breeze, allowing you to get up and riding quickly, even in the lightest winds. The Flat Rocker further enhances its performance in low wind conditions, offering effortless riding and maintaining speed when others might struggle. Constructed with Textreme Innegra, this board is not only lightweight but also provides great comfort, meaning you can enjoy longer sessions without fatigue. The responsive and light Biax Carbon enhances your overall performance, allowing for quick transitions and exciting freestyle tricks, despite its larger size. With a Medium Flex, the Spike SLS strikes the ideal balance between comfort and performance, catering to riders of all skill levels. Its thoughtful design ensures both stability and responsiveness, making it a favorite for those looking to excel in light wind while having fun with freestyle maneuvers. Experience the thrill of light wind riding without compromise with the Duotone Spike SLS 2026. Redefine your limits and enjoy every session on the water.

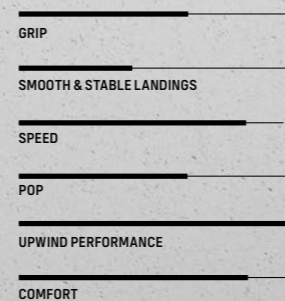

### Key Features

- New Outline for smooth carving and upwind control
- Angled Rails for the best upwind performance
- Large surface area underfoot for easy water starts
- Flat Rocker for effortless low wind riding
- Textreme Innegra for lightweight performance and comfort
- Biax Carbon Construction
- Responsive and light Biax Carbon Construction

Freeride

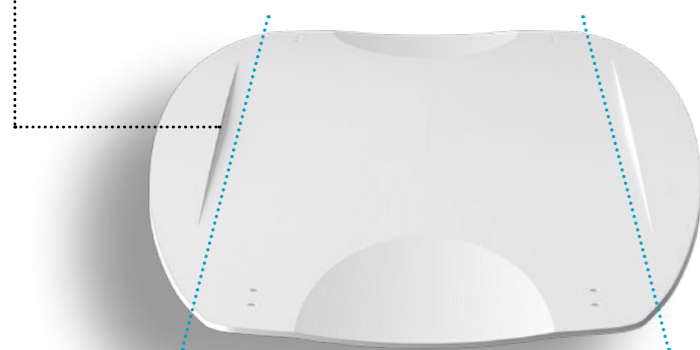

## What's New

- + Rail Channels
- + New Graphic Design

Introducing the Duotone Gonzales, the entry-level freeride board that has undoubtedly helped countless individuals take their first steps into the world of kiteboarding. Designed to cater to a wide range of riders, this board is perfect for everyone - from small to tall, whether male or female, and available in five different sizes to accommodate all riders.

The Gonzales features a round outline that offers exceptional control and smooth carving, making it forgiving for beginners while providing the confidence needed to advance. Its Soft Flex ensures great comfort while riding, allowing new riders to build their skills without the discomfort that can come from stiffer boards. With Absorption Flex Tips, the Gonzales delivers a comfortable ride that minimizes impact, making it ideal for those learning to navigate the water. Whether you're taking your first lessons or moving on to your first carves and jumps, this board is designed to support you every step of the way. The Mono Concave Tips enhance the ride quality, offering quicker planning and a more comfortable experience, enabling riders to enjoy their time on the water without frustration. Constructed with a Biax Fiber and Light Wood Core for durability and flexibility, the Gonzales is designed to withstand the rigors of learning while delivering performance that can grow with you. The step Mono Concave further enhances performance, ensuring a smooth glide and great maneuverability. Start your kiteboarding journey with the Duotone Gonzales 2026 and experience the joy of transforming into a kite surfer. With this board, you'll be able to progress from your very first session to confidently carving and jumping in no time!

- + Rail Channels make the board:
  - faster and give additional grip
  - more comfortable

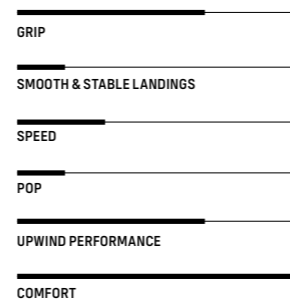

### Key Features

- Round outline for excellent control and smooth carving
- Very forgiving Soft Flex for great comfort while riding
- Absorption Flex Tips for a more comfortable ride
- Available in five sizes for all types of riders
- Mono Concave Tips for faster planning and enhanced ride quality
- Light Wood Core for a lightweight and responsive feel

# Duotone Big Air Handle 2026

## What's New

- + Duotone's First Big Air-specific handle for board-off control
- + Universal Mounting Range - Compatible with all Duotone boards and most competitor models
- + Integrated WOO compartment with external control lever—no more sticky pads
- + Durable injection-molded construction

**The Duotone Big Air Handle is specifically designed for twintips, making especially no foot big air tricks easier and more accessible for riders looking to elevate their big air game.**

This handle features an ergonomic grip profile that ensures secure mid-air handling, allowing for fast grabs and confident releases. Whether you're launching into the sky or executing complex maneuvers, the Big Air Handle provides the control you need to push your limits. One of the standout features of the Big Air Handle is the optional concealed WOO housing with external button access. This innovative design allows you to activate your WOO from outside the handle, keeping it clean, safe, and protected while you ride and you can still see the WOO LED lights. The impact-resistant, lightweight composite build delivers strength without adding unnecessary swing weight, ensuring that you can focus on your performance without distractions.

The Duotone Big Air Handle also boasts a plug-and-play setup using standard M6 screws, meaning you can get ready to ride in under a minute with any classic screwdriver. This convenience allows you to spend more time on the water and less time preparing.

### Key Features

Designed for fast grabs and confident releases, ensuring optimal control during big air tricks.

Activate your WOO from outside the handle—clean, safe, and protected.

Delivers strength without added swing weight, enhancing your performance.

No tools, no modifications—ready to ride in under a minute.

Tailored for riders looking to master big air tricks with ease.

Compatible with all Duotone boards and most competitor models for added versatility.

Integrated WOO compartment with external control lever  
No more sticky pads—enjoy a clean and efficient setup.

Built to withstand the rigors of kiteboarding while maintaining performance.

### WOO Kiteboard Sensor Package 4.0

# Duotone Lazepump

What's New

+ E-Pump for Kites, Wings, SUP and more

**Power Up Faster, Ride Longer! The all-new Duotone E-Pump delivers game-changing inflation performance for every watersport enthusiast. This compact powerhouse efficiently inflates your kites, wings, SUPs, and more, freeing you from the exhaustion of manual pumping so you can focus on what matters most – maximizing your time on the water! Are you ready to revolutionize your pre-session routine? Because that's exactly what the Duotone Lazepump delivers! With impressive output capacity and versatile compatibility across all inflatable equipment, this essential accessory represents the perfect balance of performance, portability, and precision.**

Experience unmatched convenience with the E-Pump's powerful motor that delivers precise inflation up to 1.4 Bar (20 PSI), ensuring optimal rigidity for peak performance. The integrated filter system protects against sand and debris, significantly extending your pump's lifespan even in challenging beach conditions. Weighing just 1.3 kg, this lightweight companion easily fits in your gear bag without adding unnecessary bulk.

The E-Pump's exceptional battery efficiency means you can inflate an impressive 10 kites (9 m<sup>2</sup>) to 10 PSI, 8 wings (5 m<sup>2</sup>) to 10 PSI, or 3 – 5 SUPs on a single charge. When it's time to power up, the quick 2 – 3 hour charging time ensures you're ready for your next session with minimal downtime.

Designed for riders who demand both performance and convenience, the Duotone Lazepump is the ultimate addition to your equipment arsenal. Simply the best solution for efficient, precise inflation across your entire quiver. Lazepump delivers exceptional inflation performance for kites, wings, SUPs, and more in a compact, portable package. Simply the best solution for efficient, precise inflation with maximum convenience.

## Key Features

**Impressive Capacity:** Inflate up to 10 kites (9m<sup>2</sup>), 8 wings (5m<sup>2</sup>), or 3-5 SUPs on a single charge.

**Precise Pressure Control:** Delivers accurate inflation up to 1.4 Bar (20 PSI) for optimal equipment performance.

**Integrated Filter System:** Protects against sand and debris for extended durability in beach environments.

**Rapid Recharge:** Quick 2-3 hour charging time minimizes downtime between sessions.

**Ultra-Portable Design:** Lightweight 1.3 kg construction for easy transportation and storage.

**Universal Compatibility:** Works seamlessly with all Duotone inflatable products and other brands.

| Product Profile | The Duotone Teamseries Park is the ultimate board for park enthusiasts, ready to conquer any feature. Built for durability and performance, it's the perfect companion for park riders who demand something wild and nearly undestroyable.   | The Duotone Teamseries Freestyle SLS 2026 is the go-board for hardcore freestyle riders aiming for the top. Ride with the spirit of champions and take your skills to the next level.   | The Duotone Teamseries Big Air SLS, the board of the King of the Air, is designed for big air excellence. Embrace the thrill of soaring to new heights and experience the freedom of flight.   | The Duotone Jaime SLS is a legendary freestyle freeride board embraced by riders for decades. Perfect for those looking to improve their skills, it delivers an exceptional riding experience across all conditions.   | The Duotone Jaime Concept Blue combines the legendary performance of the Jaime series with a sustainable approach, making it the ideal freestyle board for environmentally conscious riders.  | The Duotone Select SLS is a performance freeride board that combines innovative design with exceptional comfort. Perfect for riders looking to maximize their potential in various conditions.   | The Duotone Select Concept Blue is the eco-friendly version of the renowned Select SLS, delivering an exceptional freeride experience for riders committed to sustainability.  | The Duotone Soleil SLS is the performance freeride board designed for women, combining elegance and exceptional performance to empower riders on the water.  | The Duotone Soleil Concept Blue is the freeride board designed for women, featuring sustainable materials and exceptional performance. Perfect for riders who value style and environmental responsibility.   | The Duotone Shred is the perfect freeride/freestyle board for the next generation, designed to enhance performance and fun for young riders. With a focus on comfort and responsiveness, it's the ideal board for aspiring groms.   | The Duotone Gonzales is the premium entry-level freeride board designed for aspiring kiteboarders. With its focus on comfort and accessibility, it's perfect for anyone looking to begin their kiteboarding adventure.  | The Duotone Spike SLS is the go-to freeride board for light wind conditions that also allows for freestyle fun. Amplify your performance and enjoy a smooth, enjoyable ride no matter the wind strength.  | The Duotone Spike Concept Blue is the eco-friendly alternative to the classic Spike SLS, designed for optimal performance in light wind conditions. This board allows riders to excel while maintaining a focus on sustainability.   |   |

Kitefoil board

Category

With its completely new shape and layup, along with open foil tracks, the Soar SLS redefines kitefoiling, making it a standout choice for those looking to elevate their riding capabilities on the water.

Product Profile

- + Performance Kitefoil board
- + Increased volume under front foot for easy waterstarts in light conditions
- + The high nose rocker and the increased surface area are the reason for forgiveness and a board really easy to use
- + Full carbon construction for better board control, reduced weight and increased durability
- + Multiple footstrap options allow to mount the footstraps simply perfect for your personal preferences
- + Optimized rails for better upwind performance

Key Features

- + New Shape
- + New Layup
- + Open Foil Tracks

Freerace Performance

Surf / Freestyle / Prone / Kite

Surf / Freestyle / Prone / Kite

Performance Features

- + Fast designs for maximum control at high speeds
- + 550 for Defi-Type of riders
- + 800 for high speeds in light wind conditions with decent pump
- + 3BS+ connection system for rock solid stability up to highest speeds

- + Improved pump & glide over previous Carve 2.0 D/LAB range
- + More drive and speed when on the wave
- + More direct reactions with improved control
- + Fluid rail-to-rail reactions enable razor-sharp turns, allowing riders to carve with precision and confidence in any condition
- + Improved pitch stability enhances control during high-speed runs, ensuring a smooth and predictable ride even in challenging situations
- + Great pop characteristics unlock a new level of freestyle potential, empowering riders to launch into aerial maneuvers with ease and style

- + Improved pump & glide over previous Carve 2.0 SLS range
- + More drive and speed when on the wave
- + More direct reactions with improved control
- + Fluid rail-to-rail reactions enable razor-sharp turns, allowing riders to carve with precision and confidence in any condition
- + Improved pitch stability enhances control during high-speed runs, ensuring a smooth and predictable ride even in challenging situations
- + Great pop characteristics unlock a new level of freestyle potential, empowering riders to launch into aerial maneuvers with ease and style

Technical Details

- + Low drag D/LAB design minimizes resistance, allowing for effortless acceleration and maintained high speeds
- + Gullwing style curvature ensures exceptional control and balance, even when pushing the limits at top speeds
- + 3BS+ system with an additional 4th M6 screw in the new 47 cm D/LAB tail prevents flex at extreme velocities, maintaining optimal performance
- + Special stabilizer with winglets provides enhanced directional stability and fine-tuned control across all riding conditions

- + Optimized profiles and curvature for each size ensure peak performance across the entire range, tailored to specific rider needs
- + Noticeably lower drag compared to the screw-on SLS concept translates to increased speed and improved overall performance
- + Each wing is perfectly positioned for its size and target, offering riders the ideal balance of lift, speed, and maneuverability for their style
- + Lightweight HM Carbon layup with optimized fiber mix and orientation delivers unparalleled strength-to-weight ratio for enhanced responsiveness
- + Minimal visible screws contribute to maximum drag reduction, allowing for smoother water flow and increased speed
- + Compatible with two D/LAB tail options and all masts with 3BS connection provides riders with extensive setup possibilities to suit various conditions and preferences

- + Optimized profiles and curvature for each size ensure peak performance across the entire range, tailored to specific rider needs
- + Light and strong Carbon layup for a great mix of weight, stiffness and strength
- + Compatible with Aero AL and AL 3BS fuselages, the Carve 3.0 SLS offers riders versatile setup options to optimize their foiling experience

- + Sleek design that merges perfectly with the D/LAB front wings
- + Engineered connection with single part glider performance and the benefit of small packing size
- + Lightest weight and highest performance

- + Sleek design that merges perfectly with the D/LAB front wings
- + Engineered connection with single part glider performance and the benefit of small packing size
- + Lightest weight and highest performance

- + Reduced drag, due to the smaller cross section and the sleek design of the fuselage
- + Recess at the rear for the stabilizer to sink into and improve the hydrodynamics
- + Lightweight and playful
- + Direct steering through solid 3BS connection

- + High-end full monobloc design
- + Slim and extremely low drag
- + Playful and direct turning behavior
- + Extremely rigid for maximum control
- + Each size individually designed for its intended use

- + Stiff Carbon mast with Quickmount system – ideal for mid sized foils
- + Carbon mast with mid profile right between D/LAB & SLS Masts
- + Two piece concept: Base plate Mast adapter (Mono Claw)
- + Fast and easy foil mounting
- + No tools needed to mount mast

- + Extra stiff Carbon mast – ideal for mid sized to large foils
- + Carbon mast for multiple foiling disciplines
- + Incredibly stiff and direct even with wings of high span
- + High flex response
- + Great weight to strength ratio

- + Highest stiffness and strength due to the optimized mix of intermediate and high modulus fibers
- + 3BS+ additional 4th M6 screw prevents bending at highest speeds (47 cm only)
- + Unique connection to glider with hidden Titanium screw
- + Compatible with all Duotone D/LAB front wings

- + Highest stiffness and strength due to the optimized mix of intermediate and high modulus fibers
- + 3BS+ additional 4th M6 screw prevents bending at highest speeds (47cm only)
- + Unique connection to glider with hidden Titanium screw
- + Compatible with all Duotone D/LAB front wings

- + Weight optimized, due to smaller cross section and cut-outs at the front wing mounting area
- + Increased strength
- + Fuselages with extra large mounting area for a bulletproof connection
- + Compatible with all Duotone D/LAB & SLS Masts

- + Highest level HM Carbon mix with optimized fibre orientation for highest bending and torsional stiffness
- + New drag optimized base plate design for earliest take-off
- + Tapered chord length and thickness for optimized strength vs. lowest drag
- + Profile with high resistance to ventilation (with special focus on profile of 94)
- + 3BS connection for all 3BS Fuselages and D/LAB Wings

- + Extremely rigid Carbon layup
- + Compatible with all Duotone AL 3BS, Duotone SLS and Fanatic Carbon fuselages
